In 2017, CU Denver joined EAB’s Student Success Collaborative, a membership of more than 475 colleges and universities across the country working together to improve student outcomes and the student experience. The Student Success Collaborative combines technology, research, and predictive analytics to help institutions positively change outcomes with at-risk and off-path students, helping us reach our graduation and retention goals. As a part of the collaborative, we have begun to implement and utilize NAVIGATE, a student success management system that brings together advisors, faculty, support staff, and students to create a coordinated care network that enables targeted intervention and proactive, strategic support for every CU Denver undergraduate student.

NAVIGATE will allow advisors, faculty and staff the ability to:

- View a comprehensive student academic overview to provide quick, personalized guidance.
- Identify and prioritize students in need of support who require the most urgent attention.
- Maintain and share notes from student appointments and interactions.
- Set appointments with students and send email and text appointment reminders.
- Track advising appointments and walk-in traffic.
- Communicate with students directly from the NAVIGATE platform.
- Run campaigns to reach out to students based on specific criteria and easily schedule and track appointments.
- Issue alerts on students needing additional support.
Advisor Homepage

1. To access NAVIGATE, click on (ucdenver.campus.eab.com) or copy and paste this link in a new browser.
2. Login in with your UCDenver PassportID credentials.
3. You will be brought to the page below:

➢ Your first step should be to Add Availability.
Set Up Your Availability

The Student Success Center will be running a Campaign to bring students in for appointments. You must configure your personal availability for when you will be willing to meet with students.

病症 by choosing the days of the week.

病症 The time range you are available.

病症 Select Appointments.

病症 The Duration should be for the current term.

病症 Select your Location

病症 Select all Services that apply.

病症 Add in any additional details you want the student to know. An example is listed to the right.

I’m available on
8:00a - 5:00p

Student Profile: At-A-Glance Tabs

The student profile contains information about the student and their academic performance. The information available helps to proactively identify students at risk of not graduating in their major. Advisors can gather a great deal of information as they move along the information tabs.

• Important academic information in a quick and easy-to-access format
• Allows for more in-depth conversations during advising appointment

Student View slider – when sharing screen with student, turn the “Student View” on

- **Overview:** You can learn a great deal about the student prior to their arrival to your appointment in 30 seconds – EAB calls this the 30 second gut check. Jot down notes about the data points on the student profile that you can use to prepare for advising appointments and learn more about your students' success and progress.

- **Success Progress:** The Success Progress tab details the success markers the student has completed, missed, or that are upcoming. Success Markers are important courses in a student’s major that indicates their progress toward success in that major. There are also charts to visually see GPA and credit trends along with a table of the data points.

- **History:** This page shows any reminders you may have set to follow up with the student on as well as the various appointments the student has had with you or other advisors and offices on campus and any notes or reports filed.

- **Class Info:** The class info tab has information that you likely would have looked for in Campus Connection. The classes that the student is currently enrolled in as well as the transcript information for the student that shows semester by semester enrollment. The bottom of the page shows the students’ ACT scores and any other placement exam score information.

- **Major Explorer:** Additional majors at NDSU that based on risk score, students have shown previous success in earning their degree.

- **More:** Calendar, appointments, conversations

- **Categories:** Information brought in from the Student Information System to better help you identify your students for outreach, interests, and advising.

The student profile page also displays the current major for the student, any second majors, the student ID and contact information, as well as their current academic classification and term of most recent enrollment.
Scheduling Individual Student Appointments

Step 1. Search for the student. You can use the student’s name, ID number, or even email address.

Step 2. On the right side of the screen, locate the quick actions link and select “Schedule an Appointment”.

Step 3. Select filters for the appointment. These MUST match the filters the advisor selected when setting up their availability.

If not, the advisor may not appear as an organizer.

Step 4. Select the advisor you want, the meeting length (if not prefilled), and a time that works for the student.

Most importantly, do not forget to SAVE.
Tracking Student Contact

“Advising Reports” and “Notes” allow faculty and staff to create, store, and share academic information about a student. Notes are accessible across campus by faculty, advisors, and student support staff. While, students do not have access to their notes, they are always able to request their information. Benefits to widely accessible notes include improved communication, coordination, efficiency, transparency, and a more personalized student experience in advising.

Benefits of shared notes:
- Help advisors and other student support staff communicate and provide consistent, coordinated service
- Create an “institutional memory” of contacts and recommended actions
- Personalize the advising experience by refreshing the advisor’s recollection of previous conversations

The Family Educational Rights and Privacy Act (FERPA) entitles students to access any notes considered part of their academic record. Any notes completed in NAVIGATE advising platform are considered part of a student’s academic record and are accessible by students, open records requests, and court subpoenas.
Advising Reports and Notes

There are two primary forms of documentation in SSC Campus. They are the Advisor Report and the Note.

A Note is like an electronic sticky note. It is information you want to associate with a particular student but isn’t necessarily a formal documentation of a meeting you had with them. Common examples are name pronunciations, preferred pronouns, forms or other documents, logistical information (ex. student commutes several hours to class), and any other useful information that might be helpful for someone advising the student to know.

To add a Note, select Add a Note on this Student from the box on the right-hand side:

- The text field is where you’ll enter most of your information.
- The Note Reason is set by your institution and can help with organization of notes for reporting purposes.
- The Visibility allows you to hide this note from other advisors by selecting {your name} Only. Please be aware that even a note with restricted visibility is subject to FERPA regulations.

The Advisor Report is opened by selecting Report on Advising.

- The Appointment Details field is where you will document the Reason you met with the student, what type of appointment, and when & where the appointment occurred.
- The Attendees field is where you will mark when the student arrived and departed. You may also mark the student as a No-Show.
- The Appointment Summary is the text box where you will enter the summary of your meeting with the student.
- The Report Details is customizable by institution and is not required to complete before saving.
Advanced Search

NAVIGATE stores current student information including their historical engagement with CU Denver and current NDSU student data and provides an easy way to apply multiple filters to query desired information at your fingertips. You can locate information that in the past may have taken a formal data request.

1. Select the “Show Advanced Filters” box in upper right corner to see additional search fields.
2. Enrollment Term – indicates the term’s data you are searching by.
3. My Students Only – search parameters will only return students that are assigned to you as their advisor
4. Include Inactive – the search defaults to only include students active in the term in which you are searching. If you select “Include Inactive” you will then include students from past terms as well
5. Search and view your list of students that matched your parameters
6. From the list, you may perform different actions: you can send the student an email to schedule an advising appointment, save the search, or export the results to Excel to work offline.

You may save two types of lists of students:

Practice: Create one advanced search with your students that is of interest to you.
Example: Find all currently enrolled students assigned to you with 3.5 cumulative GPA and above.
- Select Show Advanced Filters
- In “Performance Data” area
- enter 3.5 as Min Cumulative GPA
- Select “My Students Only” near the search button - Search
