CU Anschutz Campus-wide Wayfinding Signs
Project Number: 19-182047
Request for Qualifications

Tuesday, October 22, 2019
ADDENDUM 1

Below is a list of questions received by CU Anschutz for the above-titled project. Answers and their attachments as referenced follow.

QUESTIONS/RESPONSES:

1. Can you provide a map of the current intended locations of the wayfinding signs?
   
   Response: Please see attached document.

2. Can you expand on what type of projects qualify as “similar scope and complexity” regarding the second minimum requirement for the project? Specifically regarding the “CM/GC experience’’?
   
   Response: Projects of “similar scope and complexity” is an open-ended question allowing the design team to cite past successful projects with similar scope. You can identify portions of past projects that demonstrate experience and knowledge to portions of this project. Examples could include: site electrical, signage, wayfinding, irrigation modification, etc.

   In regards to Minimum Requirement 2, please use this update to requirement 2: Demonstrated specific CM/GC experience on projects of similar scope and complexity with preference to State CM/GC contract.

   Understanding that landscape architects may regularly be retained by an Architectural firm on projects and not directly with the State, please show experience with CM/GC delivered projects, with a preference for projects contracted under the State CM/GC agreement.

2. Would Arthouse be operating as a subconsultant to the chosen Landscape Architect as part of this project?
Response: The selected design firm will need to retain Arthouse as a subconsultant for this project. Once a design firm is selected through this RFQ, a conversation can be initiated during the preparation of the fee proposal as to the extent of services Arthouse will be required to provide.

2. Can you confirm the date for the oral interviews?

Response: Due to the Thanksgiving holiday, the Oral Interview date is changed to Monday, November 25.

2. Does Karsh/Hagen and Arthouse Design have a current branding and signage design package that can be provided for consideration?

Response: The branding and signage design has not been fully approved by the University Design Review Board. Attached are a few documents to provide insight into the design. The massing and overall design of the signs are not expected to change, however, small details may evolve.

END OF ADDENDUM
Yellow Arrows Indicate Information Kiosk Signs
Orange Arrows Indicate Directional Signage
Red Arrows Indicate Alternates

Phase 1 base signs and alternate locations
DIRECTIONAL SIGNAGE
ANSCHUTZ MEDICAL CAMPUS // SIGNAGE

GENERAL NOTES
1. Logo and lettering are routed and backed with white acrylic.
2. Base clad with sandstone.
3. Returns are brushed aluminum.

PROVIDED AS AN EXAMPLE.
