Belong. And Be Yourself.

AURORA SCIENCE & TECH MIDDLE SCHOOL
A New School for Aurora

A Welcoming & Close Community

Close, caring relationships are at the heart of our approach. Our school culture intentionally fosters strong relationships between teachers and students. Every student is known at DSST. Through activities like all school Morning Meetings and small group Advisories, students are given opportunities to contribute meaningfully to the school community all while understanding their unique identity and building their voice.

Structured for Student Success

DSST strives to create a learning environment where classmates become each other’s biggest cheerleaders and we build in programmatic elements to set students up to be their best selves. Our students learn to organize their work, take responsibility for their actions and lead and follow in teams.

PART OF THE DSST PUBLIC SCHOOLS NETWORK

100% College Acceptance
Runs 4 of the top 8 Denver middle schools
Rated 2018 Top Workplace

World-Class & Diverse

Your child will receive a world-class education while engaging with other students with a diversity of backgrounds, experiences and viewpoints. This ensures that our students become fluent in interacting across lines of difference – helping them to understand their own identity and value the identities of others.
Aurora Science & Tech is the first school in the DSST Public Schools network to be located in Aurora, authorized by Aurora Public Schools. AST will open in August 2019 serving 150 6th grade students. The school will then grow out one grade level per year until the school is a full 6-12th grade program. Aurora Science & Tech will reside in a temporary location in northwest Aurora for the 2019-20 school year only and will then move into its permanent location and new facility on the north side of the Anschutz Medical Campus. Located on the medical campus, Aurora Science & Tech will build a rigorous and dynamic hands-on STEM program with multiple pathways for integrated learning with the medical and scientific institutions present.
