We are thrilled to announce that DSST Public Schools will open our newest school - Aurora Science & Tech (AST). AST will be located in northwest Aurora and will open with 6th grade in fall 2019. DSST Public Schools operates some of the highest-performing middle and high schools in Denver – we expect AST to rank equally well in Aurora! We seek families interested in enrolling students as 6th graders for fall 2019. AST will form a diverse community in northwest Aurora and we hope to enroll students from across the district as well those whose parents/guardians work on the Anschutz Medical Campus. For more information about the school and to receive updates, please see our website: [https://www.dsstpublicschools.org/aurora-science-and-tech](https://www.dsstpublicschools.org/aurora-science-and-tech).

Aurora Science & Tech is the first school in the DSST Public Schools network to be located in Aurora, in partnership with Aurora Public Schools. AST will open in August 2019 serving ~150 6th grade students – the school will grow one grade level per year until the school is a full 6-12th grade program. AST will find its permanent location on the north side of the Anschutz Medical Campus. This unique location will allow us the opportunity to provide in-depth learning experiences with and alongside the scientific and medical professionals on the campus. We are designing AST to have a world-class and innovative STEM program, connected to the medical professionals and institutions.

**Where/when will it be?**
- In 2019-20 Aurora Science & Tech will be located temporarily on the Fletcher Elementary School campus (10455 E 25th Ave, Aurora, CO 80010)
- 2020 and beyond: Aurora Science & Tech will be permanently located on what is currently the Fitzsimons golf course, on the north side of the Anschutz campus in a brand new facility
