

Adding a eCollege Mobile icon to your mobile device

This document provides step-by-step instructions for adding a icon to your mobile device's home screen to make accessing the application a snap!

Displaying a shortcut (icon) to eCollege mobile on your iPhone/iPod touch

1. Open Safari on your iPhone/iPod Touch
2. Navigate to the eCollege mobile login page by entering the the eCollege mobile URL into the address bar: <http://m.ecollege.com/Login.HTML?cs=cu>
3. Once the log in page has been loaded, tap the "share" button at the bottom (It looks like a box with an arrow in the middle. Older version may display an icon with a plus symbol)
4. Choose the "Add To Home screen" button
5. The next screen provides the option to rename or keep the current default that will be used to label the button on the home screen. We suggest renaming it to "eCollege"
6. After a label has been determined, tap the "Add" button in the top right corner.
7. The shortcut (icon) to the eCollege mobile page will be appear on your home screen.

Displaying a shortcut (icon) to eCollege mobile on your Google Android phone

1. Open the Browser
2. Navigate to the eCollege mobile login page by entering the the eCollege mobile URL into the address bar: <http://m.ecollege.com/Login.HTML?cs=cu>
3. Once the log in page has been loaded, click the menu button to access the bookmarks button. Click on "bookmarks" to store the site.
4. Choose the Add bookmarks then click on "OK"
5. From the list of bookmark, tap and hold on the bookmark you created. This will pop open a menu with the option to "Add shortcut to Home". Select this option.
6. You phone will now have an icon on its home screen that you can tap to directly access the eCollege mobile site link you created.
