Strategic Plan 2008 – 2020

“Characterized by challenging encounters with important issues, a liberal education prepares graduates both for socially valued work and for active citizenship in a diverse and globally engaged democracy.” Association of American Colleges and Universities

The University of Colorado Denver (UCD) College of Liberal Arts and Sciences (CLAS) Strategic Plan for 2008-2020 incorporates strategic intentions and priorities detailed in its 2007 Strategic Plan, in alignment with UCD’s 2008-2020 Strategic Plan.

We define liberal education to include four major components:

1. Central elements of knowledge, including:
 - knowledge of the diversity and significant dimensions of human culture and a specific understanding of United States’ culture(s);
 - aesthetic awareness and appreciation of cultural contributions to the human experience by the social sciences and humanities;
 - an understanding of methods of inquiry and development of knowledge that form the bases of progress in the natural and physical sciences
2. Essential skills for analysis, writing, computation, communication, and decision-making;
3. Developing a constructive orientation toward society through enhancing students’ capacity to make informed and responsible choices based on democratic principles of due process, civil liberties, and the balance between individualism and the common good;
4. The ability to apply knowledge of the arts and sciences to society’s specific needs.

CLAS works to instill in students an understanding of these components through required skills and core courses and through knowledge and skills required by each major program. We are organized into four divisions (humanities, natural and physical sciences, social sciences, and integrated sciences) that include 20 baccalaureate degrees, many with optional areas of emphasis; 17 master's degrees, with specialized concentrations in most disciplines; three Ph.D. programs (Health and Behavioral Sciences, Applied Mathematics, and Clinical Health Psychology); several certificate programs (undergraduate and graduate); numerous minors; and, seven Interdisciplinary Signature Areas that seek to become distinctive areas of excellence for the College. The College operates through a system of shared governance among the Dean’s Office, CLAS Council, the Council of Chairs, and various committees.

Mission: To foster academic excellence, to create and impart knowledge critical to a modern society and a global economy, and to ensure the acquisition of skills essential for professional careers and graduate study.

Vision: By 2020, CLAS will have enacted a new paradigm for a liberal arts education that retains the proven values of a broad education while imparting career-oriented skills throughout the curriculum.
