RELAXIN: CARDIOVASCULAR ACTIONS AND THERAPEUTIC POTENTIAL

Date: February 9th, 2018
Time: 12:30pm - 1:30pm
Location: Bioscience 2 Room Y18-1008

Dr. Sanjeev Shroff is a Distinguished Professor and Chair of the Department of Bioengineering, and Professor of Medicine in the School of Medicine at the University of Pittsburgh. Trained as an electrical engineer (B.Tech., Indian Institute of Technology, and M.Eng., McMaster University), Dr. Shroff obtained his doctoral degree in Bioengineering from the University of Pennsylvania.

His research focuses on contractile and regulatory proteins and post-translational regulation of cardiac contraction, and the role of vascular stiffness in cardiovascular function and potential therapeutic applications of vascular stiffness-modifying drugs/hormones. His research efforts have been supported by numerous grants from NIH (continuous funding since 1986), AHA, NSF, and industry partners.

The next seminar in the series will be: February 23, 2018
