TEAM INFORMATION

Team Name/Project Title: RRP North Metro Rail Line
Department: Civil Engineering (CVEN)
Faculty Advisor(s): Peter Marxhausen
Team Members: Michael Matz, Edgar Perez, Kening Wang, Yinkai Wang, Andrea Zavislan

PROJECT INFORMATION

Description:
Analysis and design of the user interface of the new North Metro Rail Line in the Denver Metropolitan area.

Abstract:
The North Metro Rail Line is a Design-Build project building an 18.5 mile electric commuter rail line that will run from Denver Union Station through Commerce City, Thornton and Northglenn to Highway 7 in North Adams County. At 72nd Avenue, the line will follow the path of the historic Union Pacific Rail Line, known as the Boulder Industrial Lead. RTD selected Regional Rail Partners as the Contractor on the North Metro Rail Line in December of 2013. The Design/Construction element of the Project is broken down into two phases. The 144th Avenue and 162nd Avenue Stations, which are located along the route is a critical commuter facility that will service multiple neighborhoods in Thornton, CO.
