

“A generic framework for thinking about environmental and occupational health: illustration by reference to aerosol exposures”

March 26, 2010

Mountain and Plains Education and Research Center Visiting Scholar Lecture

Location: Colorado State University - EH Room 120

Time: 3:00pm - 4:00pm (reception to follow)

**Broadcasted to Anschutz Campus, Building 500, 3rd floor
Rm E3333**

For More Information Contact: Sarah Broomhall

JAMES H VINCENT PHD

Professor Vincent's academic background is in physics, with a B.Sc and Ph.D. from the University of Durham in England. He also holds a D.Sc. from the same institution, awarded in 1991 in consideration of “...work of high distinction constituting a substantial and original contribution to science”. He is widely experienced in the occupational and environmental health sciences. He has worked in industry, in non-academic research institutions, and in three universities (Strathclyde University in Britain where he taught physics, University of Minnesota, and – now – the University of Michigan). His work over the past 30 years has included studies in aerosol science and fluid mechanics, and their application to the atmospheric transport of pollutants, emission control from large-scale industrial processes, exposure assessment and control of airborne pollutants in environmental and occupational settings, inhalation toxicology and pharmacokinetics, occupational exposure standards setting, and international occupational health policy. In these areas he has published over 200 peer-reviewed works and four books. He is a Past-President of the British Occupational Hygiene Society, and was Chair of the Air Sampling Procedures Committee of the American Conference of Governmental Industrial Hygienists. He served on the board and executive board of the Michigan Public Health Institute during 1998 to 2004, serving twice as Vice-President. From 1988 to 1999 he was Editor-in-Chief of the *Journal of Aerosol Science*. He was until recently Chairman of the Editorial Board of the *Journal of Environmental Monitoring*. In 1994 he was awarded the *Sinclair Award*, the premier recognition of the American Association for Aerosol Research. In 1998 he received the *Meritorious Achievement Award* from the American Conference of Government Industrial Hygienists. In 2004 he was elected a Fellow of the Royal Society of Chemistry. In 2008 he was awarded the *Cummings Award*, the premier recognition of the American Industrial Hygiene Association. Until 2004 he was Chair of the Department of Environmental Health Sciences at the University of Michigan. He became Professor Emeritus of Environmental Health Sciences in December 2008. He remains active in a wide range of research areas.
