Other U.S. Burden or Cost of Foodborne Illness Studies

Teisl, Mario F., and Brian E. Roe. "Consumer willingness-to-pay to reduce the probability of retail foodborne pathogen contamination." Food Policy 35, no. 6 (2010): 521-530.

U.S. Foodborne Disease Incidence Studies:

Non-U.S. Burden or Cost-of Foodborne Disease Studies

Reviews:

McLinden, Taylor, Jan M. Sargeant, M. Kate Thomas, Andrew Papadopoulos, and Aamir Fazil. "Association between component costs, study methodologies, and foodborne illness–related factors with the cost of nontyphoidal Salmonella illness." *Foodborne pathogens and disease* 11, no. 9 (2014): 718-726.

In other high income countries:

**Canada**

**Netherlands**

Cost-of-illness and disease burden of food-related pathogens in the Netherlands, 2011 Marie-Josée J. Mangen a , Martijn Bouwknegt b , Ingrid H.M. Friesema b , Juanita A. Haagsma b , Laetitia M. Kortbeek b , Luqman Tariq b , Margaret Wilson c , Wilfrid van Pelt b , Arie H. Havelaar b,d

**Sweden**

Toljander, Jonas, Anna Dovärn, Yvonne Andersson, Sofie Ivarsson, and Roland Lindqvist. "Public health burden due to infections by verocytotoxin-producing Escherichia coli (VTEC) and Campylobacter spp. as estimated by cost of illness and different approaches to model disability-adjusted life years." *Scandinavian journal of public health* 40, no. 3 (2012): 294-302.
UK

EU

The burden of Campylobacter-associated disease in six European countries M.-J.J. Mangena,* A.H. Havelaar b,c,d, J.A. Haagsmaa,e M.E.E. Kretzschmar a,b

Australia

New Zealand
