

## Instructions for Printing:

- Calculate how many copies of each page you will need to print
  - Each participant should have one of each card option (A & B)
  - Each page will generate 2 cards (for 2 participants)
  - $24 \text{ participants} \div 2 \text{ cards/page} = \text{print } 12 \text{ copies of each page}$
- Print page 2 (A) of this document on Color Y paper (e.g. red) and page 3 (B) on Color Z paper (e.g. blue)
- Cut each page into two cards
- Laminate each card
