ANDES: STUDIES FOR IMPROVING MATERNAL/CHILD HEALTH IN BOLIVIA

Principal investigators:
Lorna G. Moore, PhD (Professor Ob-Gyn)
Colleen G. Julian, PhD (Asst Prof, Medicine)

Collaborators:
James M Roberts, MD (Univ Pittsburgh)
Sheana Bull, PhD (Colo Sch Public Health)
Lilian Toledo-Jaldin, MD (Hosp Materno Infantil, La Paz)
Alexandra Heath, MD (Kardiozentrum, La Paz BO)
Funding: NIH R21TW010797 (PIs: Moore and Julian)
       NIH R01 HL138181 (PI: Julian)

Duration: 10/1/2017 – 9/30/19 and 04/2018 – 03/31/2022

Language requirement: Sufficient Spanish language familiarity to read medical records and manage day-to-day transactions

Foreign travel required: Yes (to Bolivia)
Project specifics:

a) Determine the efficacy of efforts to improve the diagnosis and treatment of preeclampsia and other hypertensive complications of pregnancy by the conduct of a medical records review in La Paz, Bolivia before vs. after the workshop.

b) Conduct a prospective study to identify mechanistic links between pregnancy complications (i.e., preeclampsia and fetal growth restriction) and impaired cardiopulmonary vascular function during infancy. Studies will be performed in La Paz and Santa Cruz de la Sierra, Bolivia.

Focus on training/education or research: Both
