A Career Opportunity for Community College Graduates

Have you considered an academic major that leads to an exciting, dynamic, stable, career and financial success? A career in the Risk Management and Insurance industry may be for you. Every business, individual, and family need to manage their individual and corporate financial risks; all need help understanding their risk options. Become a risk professional and help guide individuals and corporations with these choices.

RMI graduates enjoy full employment, participate in paid internships, and are invited to participate in many industry events and luncheons. Scholarships are available for students enrolled in RISK classes.

Career opportunities in the risk management and insurance industry are growing, as many industry executives are at retirement age. This looming talent shortage creates exciting career possibilities for college students who are analytical, motivated, and ambitious. Join the RMI program and launch your exciting career in the risk industry.

The Risk Management and Insurance (RMI) major provides specific focus on insurance products and their use in commercial and personal situations.

If you are interested in the following skill sets and career opportunities, please consider transferring your community college credits to pursue the Risk Management and Insurance (RMI) major at the University of Colorado Denver Business School.
