BS/MSIS 4 + 1 Degree Design

Overview
The BS/MSIS 4 +1 degree program allows CU Denver business students to complete the BS and MSIS degree in as little as five years through substituting two graduate courses for two undergraduate courses. The graduate courses count towards both the BS and MSIS degrees. Additionally, students in this unique program can take advantage of customizing their MS degree, through possible course substitutions with advisor assistance. Substitutions are based upon coursework taken as an undergraduate business student at CU Denver.

Contact your undergraduate advisor
If you are considering this BS/MSIS 4+1 degree program, it is important to contact your undergraduate advisor as soon as possible, preferably no later than your sophomore term, so that you can appropriately plan your coursework.

Submission of Application
Business students who are interested in the BS/MSIS 4 + 1 degree program should apply to the MS Information Systems (MSIS) program when they have one academic year remaining in their undergraduate degree. Please Note: When applying to the MS program, be sure to select a start semester which occurs after the completion of your undergraduate degree. Please review our admissions page for application details and deadlines.

GMAT Waiver Option
If a CU Denver business student has an undergraduate cumulative GPA of 3.25 or higher at the time of application to this program, they may request to have the GMAT waived by contacting the Business School Graduate Admissions team at: bschool. admissions@ucdenver.edu.

MSIS Course Substitutions for Undergraduate Courses
With the assistance of their undergraduate advisor, students will select two graduate MSIS courses to substitute for senior level undergraduate information systems courses. Students should review the MSIS specializations because substitutions vary depending on the MSIS specialization chosen as a student in the graduate program (as seen in Table 1).

Some of the undergraduate level ISMG classes cover the same topics with the graduate level classes. Please see table 2 for graduate classes that students may not take if they have taken the undergraduate level classes.
