A mysterious polio-like illness that paralyzes people may be surging this year

“We are definitely hearing of cases from our colleagues across the country,” said Teri Schreiner, a neurologist at the University of Colorado and Children’s Hospital Colorado. “It’s a trend that’s worrisome … what I’m hearing from others seems to be coming at a tempo similar to what happened in 2014.”

One glimmer of good news came from Kenneth Tyler, chair of neurology at the CU School of Medicine: “It looks like we’re seeing protection with IVIG in the mouse model.”

Washington Post, Sept. 21, 2016

UCHealth Broomfield Hospital opens for patients

Richard Zane, UCHealth’s executive director of emergency services and chair of the department of emergency medicine at the CU School of Medicine, said: “UCHealth is nationally recognized for providing the highest quality care along with advanced treatments including clinical trials through our partnership with the CU School of Medicine. UCHealth Broomfield Hospital will continue that tradition of excellence in this comfortable and more convenient location.”

**The drug industry might finally have an answer for migraines**

Any advance, even an incremental one, would be a major leap for the field, said **Emily Bates**, who studies the genetic causes of headaches at CU. Like many patients, she didn’t respond to any of the preventative therapies available. “The pain is more than anything I’ve ever experienced, and I’ve run on broken legs before,” she said. “I felt like my life was being stolen from me.”

**Giving babies eggs and nuts early may avert allergies**

**Matthew Greenhawt**, a researcher at the CU School of Medicine: “Most children are not at risk for developing food allergy and thus, they wouldn’t need any specific intervention or supervision.”

**Advocacy group makes concessions for jail access**

**Jeffrey Metzner**, a professor of psychiatry at the CU School of Medicine who has been a consultant to judges, state departments of corrections, city and county jails and the U.S. Department of Justice: “It looks like before this MOU, they were going to have to litigate in order to get access to the jail. They probably would have won, but it would have taken time.”
