

## **Dr. Lori Sussel named the Sissel & Findlow Family Endowed Chair in Stem Cell Research**

On February 13, Lori Sussel, PhD, professor of pediatrics and director of basic and translational research at the Barbara Davis Center was named the initial holder of the Sissel & Findlow Family Endowed Chair in Stem Cell Research. [Lori's lab](#) is one of the world leaders in understanding the networks that regulate development, differentiation and function of the pancreas. This chair was jointly funded by the Gates Frontiers Fund, the Children's Diabetes Foundation, and the Sissel family. Mary and George Sissel recently completed the funding for the chair with a \$1 million gift. We thank all the Donors for their support that helps our Center stay at the forefront of research and clinical care for people with diabetes.
