What subject matter would you like included in future programming?

Responses

- critical pedagogy on race, gender, sexual orientation, disabilities and class
- Transgender/Genderqueer focus.
- disability studies, fat studies, more on narrative medicine as a method
- more health humanities work in clinical settings and other health education training
- race and diversity
- film/media studies
- funding sources
- sharing of methodologies and curricula
- theatre, dance and music
- history of medical humanities going back centuries
- community engagement issues
- interprofessional content--was still very heavy on medical education
- Social justice/ ethics
- more on digital tools
- Humanities role in medical school applicants.
- Rhetoric of science and medicine
- performance
- mental illness
