

Please consider participating in the first annual Interprofessional Education Values & Ethics Case Competition! During this competition a minimum of THREE (3) students from at least TWO (2) different health professions on the Anschutz Medical Campus will author a short case scenario of an ethical issue that might be faced in the health professions. **Deadline for the competition has been extended until November 30, 2018.** First prize will be awarded \$600, and 2nd prize will be awarded \$300.

All current students on the Anschutz Campus are welcome to join in on a team, including:

- Anesthesiologist Assistant
- Dental Medicine
- Medicine
- Nursing
- Pharmacy
- Physical Therapy
- Physician Assistant
- Public Health
- Genetic Counseling

Note: students can participate in only one team.

Cases will be selected by an interprofessional panel of students and faculty members from health professions across our campus based on the attached rubric. The winning case will be evaluated for possible use during the spring 2019 Interprofessional Education and Development (IPED) course. (**Note:** Because not all cases will be suitable for use in the IPED course, the final decision on adaptation will be made by the IPED Course Director and the Curriculum Leads).

Theme:

Our first case competition is inspired by themes from the *Deadly Medicine* exhibit, which was displayed in the Fulginiti Pavilion from March 22-May 22, 2018. Design a case that explores an ethical topic related to lessons learned from the legacy of health professionals' voluntary involvement in the WWII Genocides/Holocaust.

Specific Topics to Consider:

- Weighing the considerations of the individual patient against the broader population (beneficence\ non-maleficence of individual parts v beneficence\ non-maleficence of the whole);
- Questioning/challenging professional ethics (misalignment of professional ethics vs. personal ethics; conflicts of interest);

- Informed consent;
- Justice

Entry Requirements:

- Case word limit 1,000 words
 - The case must fall under one of the following ethical themes covered in IPED:
 - Privacy/Confidentiality
 - Professional Boundaries
 - Informed Consent
 - Conflicts of Interest
 - Justice
 - The case must be applicable to more than one health profession
- Compiled background literature for uses as pre-reading (maximum 10 pages, must be freely available for educational use)
- 3 multiple choice questions for use on individual/team readiness assessments
- A brief summary of how the case relates to ethical themes of health professional voluntary involvement in the WWII genocides/Holocaust.

Best of luck!
