In April, community members, families, HTC staff and NHF Colorado staff all gathered for the 2019 Education Empowerment Days weekend. The 3-day event was held at the Denver Marriott South at Park Meadows in Lone Tree, and was well attended by many in the bleeding disorder community.

The weekend began on Friday evening with a delicious dinner and presentation of the William Hathaway Visionary Award to Dr. Marilyn Manco-Johnson, our HTC Director. Dawn Rotellini, NHF Sr. Vice President of Program Development presented the award along with a touching tribute to Dr. Manco-Johnson. Members of the bleeding disorders community whole-heartedly joined in thanking and celebrating Dr. Manco-Johnson for her contributions and the many years of exceptional service to patients and families!

Saturday began early with a HTC directed self-infusion clinic led by our nursing and psychosocial staff. These self-infusion clinics are always a beneficial opportunity for our families who appreciate the opportunity to gather more tips and tricks.

At breakfast, we had the pleasure of hearing from Jeanne White-Ginder, a fantastic advocate for hemophilia patients and those living with AIDS and HIV throughout the world. Her son, Ryan White passed away in 1990 after contracting AIDS through transfusions of contaminated blood.

Multiple talks, classes, and panels were offered throughout the weekend, and giving families and patients the opportunity to learn and connect with staff and experts in a variety of topics.

[Continued on page 2]
Several breakout sessions were offered including “Ask the Experts” with our HTC staff as well as a teen session with our HTC Psychologist Emily Wheat. Other sessions addressed advocacy, ways to get involved, mental health, and pain and addiction.

Later that day, all groups reconvened to hear from Lieutenant Governor Dianne Primavera and learn about advocacy in our community.

On Sunday, Dr. Mike Wang, our HTC Clinical Director, gave a fascinating presentation on new drug therapies and medical advancements in the bleeding disorders field. He was followed by Michelle Witkop from NHF who led an educational session on medical marijuana.

We would like to thank NHF Colorado for their efforts to plan and host another wonderful Education Days weekend. A special thanks to all who attended, volunteered and presented.

For more information on NHF Colorado and the resources they offer to patients please go to www.cohemo.org.

Did you know that the Hemophilia Federation of America and the Smithsonian Institute’s National Museum of American History in Washington D.C. are working together to collect historical artifacts related to the history of hemophilia?

The project is collecting historical items, personal journals, articles, newsletters, other documents, photographs, oral histories (including those from HTC physicians and staff members) to preserve the history of bleeding disorders.

Their project is in its first phase of collecting these items, as well as asking for financial contributions to support the effort to share the history of the bleeding disorders community and preserve it for future generations.

You can learn more about this project at hemophiliafed.org and look for the 2019 History Exhibit page under their “Understanding Bleeding Disorders” tab. There they have a link to contribute items for their exhibit.

You can also participate financially to support this project by donating at give.onecause.com/hfa.

Our next Pediatric Stroke Parent Support Group will be on Tuesday, May 14, 2019 from 6–7:30 pm here at the HTC.

This group is open to families of children of all ages and of all types of pediatric stroke. Stroke patients do not need to be patients at our stroke clinic to join these free meetings. Dinner and childcare are provided at each meeting.

Please RSVP by May 10, 2019 to strokesupport@childrenscolorado.org or 303-724-6163 so we know how many to plan for.

See more details at our website at www.medschool.ucdenver.edu/htc under the COMMUNITY tab.
Mile High Summer Camp is July 14-19, 2019 with our Leadership Camp starting on July 12-13, 2019. Camp is once again at Rocky Mountain Village Easterseals Camp near Empire, Colorado. This is a great opportunity for kids with bleeding disorders to grow and have tons of fun. Campers can attend starting at age 7 and are divided by age group. The 12-13 year olds can attend an adventurous wilderness program. Our 14-17 year olds are eligible for our leadership program. Graduated campers can even apply to be a “Bleedership Counselor” when they are 18.

Our nursing, physical therapy, social work, pharmacy and clinical staff are on hand throughout camp to help teach and provide support. Registration is open until May 1, 2019 and spots are filling fast. Please go to cohemo.org to register and for more information.

Our next Self-Infusion Clinic will be held on Saturday, June 8, 2019 here at our HTC from 9 am to 11 am. At each clinic our nursing staff is on hand to provide support, experience, and guidance as we help patients practice infusing. You can practice with saline or bring your own factor to infuse that day.

This infusion clinic is open to families and caregivers as well as patients of all ages. While we don’t have separate childcare at this clinic, you are welcome to bring your children to this clinic with you.

While NHF Colorado normally handles registration for this clinic, they are currently undergoing staff changes. For this Self-Infusion clinic, please direct questions and RSVP directly to us at the HTC by email at hemophilia@ucdenver.edu or contact Christine Mashburn at 303-724-0724.

If you do not live in the Denver Metro area, one of our Outreach Clinics might be an easier option for your regular comprehensive care. Our Outreach Clinics offer care and support from our medical, nursing, physical therapy, psychosocial, and research teams. Our experts come to you!

**Upcoming Outreach Clinics:**

May 24, 2019—Colorado Springs, CO
June 25-28, 2019—Billings, Montana
July 31-Aug 2, 2019—Missoula, Montana
