Postnatal (Constitutional) Specimen Requirements

**Peripheral Blood**

2 – 3 ml  Chromosome analysis, 5-cell chromosome analysis, and FISH
- Collect in 4 ml *sodium heparin* (green top) tube and store at room temperature.
- Label tube with patient’s name and second identifier (e.g. DOB).

2 ml  Chromosomal microarray (CMA) or targeted CMA (follow-up familial/parental CMA)
- Collect in 4 ml *EDTA* (purple/lavender top) tube and store at room temperature.
- Label tube with patient’s name and second identifier (e.g. DOB).

For combined chromosome analysis AND chromosomal microarray (CMA),
IF total volume available is < 4 ml: collect 2 ml in *sodium heparin* (green top) tube;
IF total volume available is < 2 ml: call laboratory to discuss testing options.

**Saliva**

Call lab to request saliva collection kit(s)  CMA
- Collection instructions are included in each kit. Store sample at room temperature.
- Label tube with patient’s name and second patient identifier (e.g. DOB).

**Skin Biopsy**

3 - 4 mm³
- Collect desired tissue using aseptic technique.
- Place in sterile, screw-top tube/container filled with sterile transport media or sterile saline solution. Transport media is available (upon request).
- Label container with patient’s name, a second patient identifier, and the type of tissue obtained.
- Store at room temperature; or refrigerate at 4° if overnight.

FEDERAL EXPRESS OR LOCAL COURIER SERVICE PROVIDED AT NO CHARGE
TRANSPORT MEDIA, SUPPLIES, AND KITS PROVIDED AT NO CHARGE
