Radiology Faculty Development Grants

The Radiology Faculty Development Grant Program was developed to support prospective or retrospective clinical research, novel process improvement or quality control projects, or educational projects that will result in a publication in a peer-reviewed journal. Up to $10,000 is available to support a project.

Eligibility

Department of Radiology Adult Radiologists and Medical Physicists are eligible. Research projects that would qualify for a Pilot Research Grant are not eligible.

Successful applicants may be asked to review applications submitted for future grant cycles.

Content

Please submit a 4-page proposal which includes:

- PI name and contact information
- Other key personnel, if applicable
- Project title
- Projected project period (typically less than 1 year)
- Summary
- Background (include literature citations)
- Specific Goals
- Detailed Project Plan including an evaluation plan
- Detailed Budget and Justification
  - propose use of internal research personnel whenever possible (use budget template)
  - funds can be used for software and other operating expenses
  - funds cannot be used for investigator salary support
  - PLEASE NOTE: If you have other funding such as a start-up package, please explain why those funds could not be used for your project.
- References can be included in the 4-page proposal or submitted in addition to it
- The journal to which you will submit your study and meetings where you will present your results
- Suggestions for independent reviewers (optional)

Format

As per NIH formatting, applications must be typed in Arial, Helvetica, Palatino Linotype, or Georgia typeface, a black font color, and a font size of 11 points or larger. Type may be no more than six lines per inch. Margins should be ½” wide. Applications that do not comply with these requirements or that do not follow the grant application format will be returned.

Application Review

Applications will be reviewed by the Radiology Research Review Committee and external experts in fields applicable to the proposals received. Proposals will be evaluated based on potential impact, feasibility, innovation, likelihood of improving care, and potential for publication. Multidisciplinary, collaborative proposals are encouraged.

Funded investigators will be asked to submit an interim progress report 6 months after initiating the study and a final report of the results within 1 month of the completion of data analysis.
Submission Dates and Instructions

Proposals can be submitted for the following deadlines: March 1 and September 1.

Please direct questions concerning the eligibility of a potential project to Dr. Jody Tanabe (Jody.Tanabe@ucdenver.edu) and submit applications to Karen Kimes (Karen.Kimes@ucdenver.edu). Pilot funding for PET/CT scans and/or radiopharmaceuticals may be available from C-TRIC. Check ctric.org for details.
