With your past connections to the CU Department of Medicine and UCHealth’s University of Colorado Hospital at the Anschutz Medical Campus, we thought you would like to see some of our recent progress. Today, we are emerging as one of the top programs in the country with more than 1,000 faculty, 616 researchers and 192 residents. In addition, our department outpaced the growth of NIH support two-to-one over the past five years, and our clinical activity has doubled during the past eight years. Since your history with the CU Department of Medicine has contributed to our achievements and growth, we wanted to share the highlights with you.
