Mid-Career Faculty
Women’s Leadership Program

When will applications be open?
The annual application process is November 1-November 30. Final cohort participants announced early to mid-December. (2019 deadline extended through December 6 to allow for the holiday weekend!)

What does the application require?
The application is an online form consisting of a short series of questions. This form is to be submitted with a brief letter from you outlining your professional experiences, career goals and a short reflection on how the program objectives align with your goals. In addition, you will upload a short letter of support from your Division Head (template is provided with the form) and your most up to date CV.

What is the letter of support?
The letter of support is a letter coming directly from your Division Head. This letter indicates to the Department that your Division leadership is aware and supportive of your potential attendance of the program and will help set you up for success in the program.

How many participants are selected each year?
Approximately 25

What is the selection criteria?
It is most important that participants are the right fit with the design and learning objectives of the course. In addition we will strive to have a diverse cohort, as one of the major benefits of the program is networking with peers both similar and different to the ones you work with every day. To help make this happen a number of factors will be taken into consideration when selecting applicants other than their academic and clinical qualifications, such as: degree, primary location, Division / specialty, length of experience in academic medicine, research area, scholarship area, professional goals, and much more. Considering all the factors of an individual’s application will support selection of a dynamic and diverse class to ensure participants have the best learning experience.

Is this program the right fit for me?
The program is designed for mid-career academics to help build and polish your existing leadership skills, build community with peers in the Department of Medicine and support you as you move towards the next level or stage of your career.

Similar to the American Association of Medical Colleges (AAMC), the DOM PAGE Mid-Career Women’s Leadership Development Program is designed for faculty at the associate professor level, ideally with 1-2 years elapsed since appointment to this rank. However, recognizing every faculty member’s career progresses at a different pace, generally, this program is designed for faculty who have been in academic medicine 8 – 15 years. Applicants should have a significant amount of experience in academic medicine and demonstrated leadership ability, either in formal administrative or other leadership roles.

In addition mid-career faculty

Updated November 2019
Considering other programs? Wondering how this program differs from other programs available to Department of Medicine faculty?

The key to selecting the program which will be the best fit for you is to first reflect on your individual professional goals and what skills, knowledge or experiences will best meet your development needs.

Brief descriptions of program offerings, learning objectives and target audience are included below along with contact information for each program.

Specific questions on which program might be a good fit for you? Contact Penny Archuleta, Associate Chair for Faculty Advancement, penny.archuleta@cuanschutz.edu, 303.724.9534.
