LOOKING TO HELP WOMEN WITH MS?

Are you a friend or family member of a person living with MS?

Would you like to help advance MS Research, improving the care of all MS patients?

We are currently looking for healthy female participants for an MS research study.

With this study, we will examine the differences in brain scans and self-reported quality of life between MS patients taking natalizumab (Tysabri) and individuals without MS.

You may qualify if you are a healthy individual age 40 to 55 years without MS.

To see if you qualify, contact:
Eric Engebretson
Professional Research Assistant - Neurosciences
University of Colorado Denver
