INTRODUCTION TO FOX TRIAL FINDER

Accelerating Clinical Trial Recruitment Online
MJFF WAS FOUNDED WITH CLEAR OBJECTIVES

Drive the best Parkinson’s disease research

Deliver improved therapies and a cure
HOW DO WE GET TO CURES?

- It typically takes $1 billion and decades to develop new treatments.
- Clinical trials are the final step on the path to drug development.

Recruiting Parkinson’s patients and healthy control volunteers is a rate limiting step in the drug development process.
CLINICAL TRIAL PARTICIPATION IS CRITICALLY IMPORTANT

- 85% of all clinical trials face delays and 30% never get off the ground due to a lack of volunteers

- Though 60% of people with Parkinson’s say they would be willing to participate in a trial, fewer than 10% actually enroll

Under-enrollment in trials slows the progress toward breakthroughs and deters investment in Parkinson’s research
WHAT CAN BE DONE TO MAKE DRUG DEVELOPMENT FASTER AND LESS EXPENSIVE?

» Hundreds, sometimes thousands of volunteers are needed at the clinical stage

» Both Parkinson’s patients and healthy control volunteers are eligible

» The more volunteers we have for Parkinson’s clinical trials, the sooner we will have new treatments, and ultimately, a cure

No amount of funding or resources can make up for a lack of clinical trial volunteers
FOX TRIAL FINDER MATCHES VOLUNTEERS TO TRIALS THEY MAY QUALIFY FOR

ABOUT FOX TRIAL FINDER

Fox Trial Finder was created by the Michael J. Fox Foundation to help increase the flow of willing participants — both people with Parkinson’s and control participants who do not have Parkinson’s — into the clinical trials that need them, accelerating the Parkinson’s drug development process.

Clinical trials are a final and crucial step on the path to developing better treatments for Parkinson's patients today. Around the world, between 45% and 70% of trials face delays because of a lack of volunteers.

Fox Trial Finder will not only list ongoing PD clinical trials and research studies, but will match registrants to the trials that need them and are best-suited to their specific traits. Fox Trial Finder also has a secure and anonymous messaging system, making it much easier to find and act on suitable opportunities to get involved.

JOIN THE 35,948 CLINICAL TRIAL VOLUNTEERS WHO HAVE ALREADY STEPPED UP.

FROM MICHAEL J. FOX

“The answer is truly in all of us, working together. International collaboration is essential for speaking a cure for the 3 million Parkinson’s patients worldwide.”

— Michael J. Fox

TRIAL TEAMS

Do you need volunteers for your clinical trial? Find them with Fox Trial Finder.

Learn More
OUR GOAL: HELPING YOU KNOW WHAT IS AVAILABLE

» Fox Trial Finder is about making sure that you know about the trials going on in your own backyard

» Both Parkinson’s patients and healthy control volunteers are eligible

» Volunteers are matched to trials that are looking for someone with the same demographic characteristics, medication history, diagnosis duration, etc…

» Volunteers can then connect directly – online and anonymously – with members of the trial team to learn more

Fox Trial Finder makes it easy to act on the intention to get involved in research

EXPLORING THE MATCH PROCESS: SUGGESTED MATCHES

» Volunteers can review their suggested matches in more detail by clicking on the name of the trial.
EXPLORING THE MATCH PROCESS: TRIAL DETAILS

» Trial details provide in depth information about the trial, including:
  – Purpose
  – Description
  – Focus
  – Inclusion/Exclusion Criteria
  – Site Locations
  – Contact information
TAKING ACTION: INDICATE INTEREST OR SEND A MESSAGE

» Indicate interest
» Send messages to trial teams
» Name, email and all identifying information will never be released, unless provided by volunteer
NOTIFICATIONS ABOUT FUTURE TRIALS

Email alerts are sent when a new message is added to the database and when a new trial begins recruitment.

Dear Claudia,

There has been an update to your Fox Trial Finder trial matches. See some of your most recent match(es) below. To review all of your current trial matches and contact the trial coordinators to learn more, log in to Fox Trial Finder and visit your dashboard.

Thanks again for joining the growing community of people raising their hands to accelerate the pace of research with Fox Trial Finder.

Sincerely, The Fox Trial Finder Team

Your recent match(es) include:

A Study of Brain Imaging With Nuclear Medicine Technology in Individuals With and at Risk for Parkinson's Disease  
Location: Institute for Neurodegenerative Disorders, New Haven, Connecticut, United States

Walking While Talking: The Effect of Doing Two Things at Once in Individuals With Neurological Injury or Disease  
Location: Stony Brook University RRAMP Laboratory, Stony Brook, New York, United States

To view all of your new matches, log in to Fox Trial Finder.
