Developmental-Behavioral

- Perform comprehensive histories and physical and neurodevelopmental examinations to make accurate diagnoses for patients presenting with developmental-behavioral concerns from infancy through young adulthood.

- Recognize and longitudinally manage behavioral variations, problems, and disorders in typically developing children and children with developmental disorders.

- Recommend appropriate medical laboratory workup and evidence-based medical, therapeutic, educational, and behavioral interventions for children with developmental-behavioral disorders.

- Effectively communicate with families to facilitate their understanding of their child's developmental-behavioral diagnoses and to promote their engagement in clinical decision-making and treatment.

- Effectively advocate for children and families affected by developmental and behavioral disorders.
