

Individuals with medium chain acyl-CoA dehydrogenase deficiency (MCADD) do not have a properly functioning medium chain acyl-CoA dehydrogenase enzyme. Therefore, their bodies are not able to correctly convert fats into energy.

The purpose of this book is to provide a resource to help answer some of the questions associated with MCADD.

**Our clinic is pleased to be able to offer this resource free of charge as a result of a family supported grant. If you are requesting shipment outside of the United States or Canada please inquire about shipping and handling costs in such cases.**

**We request that you only order 10 booklets at a time to be able to meet demands.**

To request booklets, please contact Laurie Bernstein at [Laurie.Bernstein@childrenscolorado.org](mailto:Laurie.Bernstein@childrenscolorado.org)
