

MSA2

Mentored Scholarly Activity 2

Course Goals

Goals

1. Demonstrate ability to formulate a specific problem statement, question, hypothesis or aim.
2. Demonstrate ability to work effectively with a mentor.
3. Demonstrate ability to critically review and analyze literature on an important scholarly topic.
4. Demonstrate ability to prepare a scholarly project with appropriate methods and develop a plan to complete the project
5. Demonstrate ability to synthesize and present results of a scholarly project.
6. Demonstrate progress through the Phases and display independence and collaboration.
7. Demonstrate the ability to use the scientific method to test and or verify hypotheses in clinical and translational research.

Spring 2019

Mentored Scholarly Activity 2

Session Learning Objectives

MSA Work in Progress Presentations

1. Present work in progress (WIP) to peers and faculty in an oral presentation
2. Effectively respond to comments and questions from peers and faculty about your scholarly work
3. Demonstrate effective interaction with the mentor on the scholarly project.
