PBL Phase I & II
Course Goals

Goals

1. Communicate patient information concisely, thoroughly and clearly via a History and Physical note and Oral Presentation.
2. Find and utilize resources to answer medical questions and evaluate the appropriateness of the resource(s) selected.
3. Thoughtfully discuss the impact that economic, cultural, ethical, professional and societal factors make on the decisions physicians make regarding patient care.
4. Develop clinical reasoning skills by improving his/her understanding of the relevance of clinical information and how this is used to appropriately diagnose and treat patients.

Learning Objectives

1. Session learning objectives are not listed due to the nature of problem-based learning sessions.
