Teleconferencing now available for rural or out of state clinicians! Visit website for details.

Optimizing Rehabilitation After Total Joint Replacement in a Changing Healthcare Landscape

Category 1 Colorado Continuing Competency (8 hours)

Saturday, September 17, 2016
8:00 AM – 5:30 PM
Registration: 7:30 AM

University of Colorado
Anschutz Medical Campus
Building: Education 2 North Room: 2104
13120 East 19th Ave.
Aurora, CO 80045

Register at:
www.cuphysicaltherapy.org/marquette

Jennifer Stevens-Lapsley, PT, PhD
- Professor at the University of Colorado Physical Therapy Program
- 15 years of clinical research experience in patients with OA planning to undergo joint arthroplasty
- Actively involved in recent efforts to support better and more efficient care for patients with arthroplasty through the Comprehensive Care for Joint Replacement (CJR) model

Michael Bade, PT, DPT, PhD, OCS, FAAOMPT
- Assistant Professor at University of Colorado Physical Therapy Program
- Over 10 years of experience in treating individuals after total knee arthroplasty (TKA) in the acute, home health, and outpatient settings
- PhD focus on improving rehabilitation in individuals after TKA

Dana Judd, PT, DPT, PhD
- Assistant Professor at the University of Colorado Physical Therapy Program
- Research interests: optimizing muscle performance, movement quality, physical function, and quality of life following total joint replacement
- Dedicated to making research and evidence accessible to practicing clinicians and students

Andrew Kittelson, PT, DPT, PhD
- Research focus on understanding heterogeneity in knee osteoarthritis with the goal of tailoring conservative therapies to the factors most relevant to knee pain at the individual level
- Post doctoral emphasis on data science and prediction methods to improve clinical decision-making for individuals undergoing TKA
