Annual Surveys

January-April
Staggered release in three groups

ACGME Resident Survey
- The ACGME’s Resident/Fellow survey is an additional method to monitor graduate medical clinical education and to provide early warning of potential non-compliance with ACGME accreditation standards.
- Programs are scheduled in five-week windows within which their residents/fellows must complete the survey.
- When at least 70% of a program’s residents/fellows have completed the survey and at least four residents/fellows have been scheduled, reports will be available annually. For those programs with fewer than four residents/fellows scheduled for the survey who meet the 70% compliance rate, reports will only be available on a multi-year basis after at least three years of survey reporting, but may contain up to four years of data.

January-April
Staggered release in three groups

ACGME Faculty Survey
- Programs are scheduled for windows approximately five weeks in length within which faculty members must complete the survey.
- When at least 60% of a program’s faculty members have completed the survey and at least three faculty members have responded, reports will be available annually to the program.

May

University of Colorado School of Medicine GME Graduate Survey
- Data required for the Dean, and all Annual Reports
- Satisfaction with training
- Professionalism
- Graduates’ future plans
- Demographics
- Debt

May

University of Colorado Housestaff Association Survey
The purpose is to communicate resident feedback on their educational and work environment. Data is collated by the Housestaff Association by program and site, and is shared with the Program Directors for programs with 70% response and ≥ 4 trainees
