

**THE GRADUATE EXPERIENCE FOR MULTICULTURAL STUDENTS (GEMS) PRESENTS:
THE GEMS SUMMER RESEARCH PROGRAM**

PROGRAM SUMMARY

GEMS interns participate in an intense 10-week summer research experience consisting of lectures, workshops, and a mentored laboratory research project. Students live in dormitories at CU Denver in the heart of downtown, a modern metropolis that offers a variety of cultural and culinary experiences, and conduct research at CU Anschutz, which is home to state-of-the-art health, research, and core facilities.

EVENTS AND HIGHLIGHTS

- Laboratory research project
- Academic skills workshops
- Lectures in biochemistry and molecular biology
- Research seminars
- Social activities
- CU Anschutz Graduate School application fee waiver

APPLICATION REQUIREMENTS

Minimum GPA of 3.0 overall, 3.2 in sciences; current transcript (copy acceptable); two (2) letters of recommendation (at least one from a science faculty member); personal statement (interest in graduate education and future career goals).

QUICK FACTS

Deadline

February 1

Stipend

\$4,000

Housing

Provided for out-of-state participants at 1/3 the cost (\$500)

Eligibility

Intend to pursue a biomedical science research career, underrepresented minority, 2 years of college completed OR demonstrated aptitude in science lab courses

Travel

All travel costs are covered (travel to and from Denver, bus pass, intercampus shuttle)
