13121 E. 17th Ave., 5th Floor, C234
Aurora, CO 80045

Funding acknowledgement
Federal core funding that supports JFK Partners comes from:
- University Center of Excellence in Developmental Disabilities Education, Research, and Service Grant (90DD0632) - Administration on Developmental Disabilities
- Leadership Education in Neurodevelopmental Disabilities (LEND) Grant (T73-MC11044) - HRSA / MCHB

Funding for ENRICH Services
ENRICH works closely with Early Intervention Colorado, health care providers, and family service coordinators to help families access ENRICH services which are identified in their child’s IFSP.

Funding options include, but are not limited to:
- private insurance
- public insurance (such as Medicaid)
- Community-Centered Boards.

Connecting with other families
ENRICH sponsors Community Day Outings, occasions for ENRICH families to participate in fun community activities while connecting with other families. Visits to places such as the zoo, fire houses, local parks, and the petting zoo provide opportunities for children and their loved ones to interact with others in a positive, enjoyable setting outside the home.

FOR MORE INFORMATION
ENRICH is an early intervention team that provides supports and services to families who have children up to three years of age who have been identified with developmental disabilities. ENRICH has been supporting young children in Colorado since 1994.

Children with developmental disabilities sometimes need extra support to fully participate, learn, and enjoy daily routines or activities such as playing, communicating with others, moving around their environment, eating, sleeping, and bathing. ENRICH supports children’s learning and development during everyday activities in their home, childcare programs, and community settings.

**Getting Started with ENRICH**
The first step is to contact Colorado’s Early Intervention Colorado Program. EI Colorado provides assessment for children birth to three years of age at no cost to families. EI Colorado also assures eligible children and their families access to early intervention supports and services. If you have not yet been in touch with your local EI Colorado Program, ENRICH can assist you in contacting them.

Based on an evaluation, if a child is eligible for early intervention services, a service coordinator is provided to work with their family to develop an Individualized Family Service Plan (IFSP).

This document is developed based on the family’s priorities and goals for their child. Specific support services or therapies are recommended. At that time, the service coordinator will provide information on services being delivered by various kinds of providers, which might include team delivery of services or single discipline. The IFSP also identifies support services to help a child and their family to achieve their goals. ENRICH strives to enable families to accomplish these goals.

**Early Intervention Colorado**
is Colorado’s Infant and Toddler Initiative under the Individuals with Disabilities Education Act (IDEA)

**How ENRICH works with your family**
An ENRICH team member is designated to support the child’s unique needs and address the goals on their IFSP. The family, the ENRICH team member, and a service coordinator will discuss how to put the IFSP into action. Another ENRICH team member, of a different discipline, may provide consultation during visits with the child and family if this is specified in the IFSP.

ENRICH strives to provide services that can be easily integrated into daily routines, ensuring that families do not need to add ENRICH services into their day. Rather, they can simply make the services and practices a part of their everyday activities.

The ENRICH team meets weekly to talk with one another to discuss how to best serve the children and families in the program. The primary team member then brings the team ideas back to the individual family.

The ENRICH team includes highly trained professionals from a variety of fields:

- Early childhood special education
- Occupational therapy
- Parents of children with special needs
- Physical therapy
- Speech-language pathology

Additional services can be provided within the fields of nursing, nutrition, psychology, and social work.

If your child attends a childcare program, ENRICH can also spend time with your childcare provider to promote consistency between what your child is doing at home and at childcare.
