June 16, 2015

To JFK Community:

As you may know, JFK Partners (JFK), University of Colorado School of Medicine, the Child Development Unit (CDU) within the section of Neurodevelopmental Behavioral Pediatrics, Children’s Hospital Colorado have been working together over the past year to integrate our two clinical programs. We began with a tiered integration in August 2014. At that time, interdisciplinary team diagnostic assessments were transitioned from JFK to CDU under the Children’s Hospital Colorado system, adding to an already comprehensive array of evaluation services provided by CDU. Even though our pediatric diagnostic assessments have been conducted under a new organizational structure this past year, we have been able to maintain the same high quality interdisciplinary model and service excellence.

We are now ready to integrate the second tier of clinical services, which will include all pediatric therapies delivered by psychologists, speech/language pathologists and occupational therapists. The therapies will include both individual therapies as well as group treatments. Beginning August 1, 2015, JFK providers will see all pediatric clients under the Children’s Hospital Colorado system. If you are a current JFK client and you are interested in continuing to work with a JFK clinician, you need only discuss this with your provider and he/she will get the process started. To determine the fee for your services as we change systems of care, you may call 720-777-0720 to obtain answers specific to your health insurance coverage. Please be advised that you will need your current insurance information and details about what services will be provided (e.g., billing codes) to obtain information about cost.

For our colleagues and community partners who refer families for psychotherapy, speech/language and occupational therapies, the referral process will transition from JFK to CDU under the Children’s Hospital Colorado system effective August 1, 2015. Please call the CDU directly at 720-777-6630 to get the process started or fax a referral to 720-777-7868.

Adult diagnostic and therapeutic services will remain at JFK Partners at the current time. JFK Partners’ educational programs, community outreach and research / training programs will continue as they are. In addition, the ENRICH early intervention home visiting program will also continue to operate in its current form and referral procedures will not change. Thank you for your patience in this transition. As always, JFK Partners and CDU are committed to providing the same level of service excellence as we continue to integrate our programs.

Please refer to the numbers below for more information.

- Pediatric Diagnostic Assessments and therapies call 720-777-6630
- Adult Diagnostic Assessments and Therapy call 303-724-7647
