HEALTHY OFFICE WORKERS NEEDED FOR RESEARCH STUDY

We are looking for healthy men and women aged 18 years and older who **do not have a history of neck pain** to participate in a research study.

To participate in the study, you must be:

- (1) working at least 30 hrs/week in an office setting that requires you to use a computer for most of the workday
- (2) within 3 months of hire at your current job

The purpose of the study is to identify risk factors for the development of chronic neck pain in healthy office workers. The study involves physical examination by a physical therapist and non-invasive recordings of muscle activity. Volunteers will be asked to participate in one test session lasting up to 3 hours at the University of Colorado Denver Anschutz Medical Campus. Participants will also be asked to complete a brief online survey once a month for 12 months. Financial compensation is available.

If you would like to receive more information, please contact the Applied Neuromuscular Physiology Laboratory at the University of Colorado Denver:
