Pregnant Participants needed!

Your health – your baby's future! ***Join the Healthy Start study!***

The goal of Healthy Start is to understand what factors during pregnancy and early life influence a child's healthy growth and risk for obesity and future diseases.

We are looking for pregnant women with 23 weeks or less of gestation.

Participating mothers will have:

- Two in-person visits during pregnancy, one survey at delivery and one telephone survey after delivery.
- Each in person visit will include: a fasting blood draw (blood sugar, lipids and other blood markers); answering of study related questions; height, weight, blood pressure and skin fold measurements

Baby measurements at delivery:

- Length, weight, skin folds
- Body composition (no radiation involved)
- Cord blood collection after delivery (not from the baby)

You will be compensated for your participation!

If you are interested, please call us or e-mail us at:
