HEALTHY POSTMENOPAUSAL WOMEN **needed to participate in a research study**

We are looking for women who:

- ❖ are age 45-70yr
- ❖ went through menopause within the past 6 years
- or
- are more than 10 years past menopause
- ❖ have never used hormone therapy for more than 6 months
- ❖ are willing to use estrogen patches for a 1 week
- ❖ are non-smokers
- ❖ are sedentary to moderately active

Purpose of the study:

To test whether estrogen has different effects on blood sugar early in menopause compared to many years after menopause.

Study volunteers will receive:

- ❖ physical exam, testing for diabetes, body fat and bone density
- ❖ monetary compensation
