American Parkinson Disease Association  
Funding Opportunities  
Deadline: March 1, 2013

More details are available on the website at http://www.apdaparkinson.org/research/research-opportunities/

George C. Cotzias, MD Memorial Fellowships
George C. Cotzias, MD was a pathfinder in the pharmacologic exploration of brain functions and in the treatment of Parkinson’s disease with levodopa. His work stimulated much of the current interest and research on the problems of neurological movement disorders. The American Parkinson Disease Association has established the Cotzias fellowship, in honor of his memory, to stimulate neurologists to follow his leadership. The goal of the Cotzias fellowship is to assist promising neurologists in establishing careers in research, teaching and clinical services relevant to the problems, causes, prevention, diagnosis and treatment of Parkinson’s disease and related neurological movement disorders. This is a fellowship of $80,000 per year for three (3) years. (Not renewable)

Roger C. Duvoisin, MD, Research Grant
The Roger C. Duvoisin, MD research grants are intended to provide support funds for established scientists affiliated with research or academic institutions located within the United States and presently not working on Parkinson’s disease research. A not-for-profit institution must sponsor the applicant and the principal goal of the grant is to support new research ideas proposed by a scientist already established in the neurological field. This is a grant for $80,000 per year for two (2) years. (Not renewable)

Research Grants
The APDA research grants are intended and available for a junior investigator to pursue research in Parkinson’s disease. The applicant must be affiliated with and perform the research project at an academic institution within the United States. This is a grant of $50,000 per year. (Renewable)

Post-Doctoral Fellowships
The APDA Postdoctoral fellowships are awarded to support post-doctoral scientists whose research training holds promise into new insights of geriatric psychology, pathophysiology, geriatric psychology, etiology and/or treatment of Parkinson’s disease. This is a fellowship of $35,000 per year for one (1) year.
