

Cancer Research Institute

Deadline: April 1, 2012

More details are available on the website at <http://www.cancerresearch.org/Programs.aspx?id=242>.

Irvington Institute Fellowship Program

The Irvington Institute Fellowship Program of the Cancer Research Institute, formerly the Cancer Research Institute Postdoctoral Fellowship Program, answers the need for more researchers in the field of cancer immunology. It supports qualified young scientists at leading universities and research centers around the world who wish to receive training in cancer immunology. A panel of scientists drawn from our Scientific Advisory Council rigorously evaluates each candidate, the intended sponsor and training environment, and the nature and feasibility of the proposed project.

CRI has recently reevaluated its laboratory and research training programs in an effort to better align funding priorities with the overall mission of the organization—the support and coordination of laboratory and clinical efforts that will lead to immunological treatment, control, and prevention of cancer. As a result, CRI will now designate ALL fellowship funds to projects clearly related to the Institute's mission and that seek to solve the cancer problem through immunological means.

The fellowship provides stipends of \$50,000 for the first year, \$53,000 for the second year and \$57,000 for the third year. In addition, an allowance of \$1,500 per year is allotted to the host institution for use at sponsor's discretion to help pay for the fellow's research supplies, travel to scientific meetings or health insurance. Stipends and institutional allowances are not permitted to cover administrative expenses. Payments are made monthly in U.S. currency to the host institution.
