Fondation Leducq
Funding Opportunity

Deadline: September 5, 2014

Fondation Leducq is a private foundation, based in Paris, France, dedicated to improving human health through international efforts to combat cardiovascular and neurovascular disease. Recognizing the potential of international collaboration to enhance research efforts in cardiovascular and neurovascular disease, the foundation created the Transatlantic Networks of Excellence in Cardiovascular and Neurovascular Research Program. The principal aim of this program is to bring together teams of researchers with complementary expertise and resources so that they can accomplish together what the members could not do individually.

The networks supported by the foundation should advance the science of cardiovascular and neurovascular disease, apply the knowledge gained through research towards the development of technology and therapeutics to improve human health, and support early-career investigators in cardiovascular and neurovascular disease. The Fondation Leducq currently awards up to four Transatlantic Network of Excellence grants per year, each for an amount not to exceed U.S. $6,000,000 over five years.
