Leukemia & Lymphoma Society
Career Development Program

Letter of Intent Deadline: September 8, 2014

More details are available on the website at:
http://www.lls.org/#/researchershealthcareprofessionals/academicgrants/careerdevelopment/

The Leukemia & Lymphoma Society (LLS) Career Development Program (CDP) offers you the opportunity to take part in basic, clinical or translational research to help treat leukemia, lymphoma and myeloma. We'll award you with stipends so you can devote yourself to leukemia research, lymphoma research or myeloma research. We offer career development awards for various stages of your research career. Please verify in our guidelines and instructions which award is appropriate for your level of experience and apply to that category of award.

Scholar
Award: $110,000 per year for five years
Requirements: You must be a highly qualified investigator who's shown a capacity for independent, sustained original investigation in the field of leukemia, lymphoma and myeloma. You should hold an independent faculty-level or equivalent position and have obtained substantial support for your research from a national agency.
Annual renewal: Based on a noncompetitive progress report review

Scholar in Clinical Research
Award: $110,000 per year for five years
Requirements: You must be a highly qualified investigator who holds an independent faculty-level appointment and is conducting original, independent applied research, often involving early-stage clinical trials that will advance the prevention, diagnosis or treatment of hematologic malignancies. You're expected to have concomitant support for your research from another source or agency.
Annual renewal: Based on a noncompetitive progress report review

Special Fellow
Award: $65,000 per year for three years
Requirements: You must be a qualified investigator who's completed a minimum of two years of postdoctoral research training and is continuing your research under the research sponsor's direction. This award is meant to permit you to begin to transition to an independent research program.
Annual renewal: Based on a noncompetitive progress report review
Special Fellow in Clinical Research (SFCR)

**Award:** $65,000 per year for three years

**Requirements:** You must be a researcher who holds a Ph.D., M.D. or equivalent degree and has completed at least two years of clinical hematology, oncology, hematology/oncology or hematopathology training or postdoctoral research training in a clinical discipline (such as cytogenetics or molecular pathology). You must show evidence that your career focus will be on preventing, diagnosing or treating leukemia, lymphoma or myeloma.

**Annual renewal:** Based on a noncompetitive progress report review

Fellow

**Award:** $55,000 per year for three years

**Requirements:** You must be a promising investigator with less than two years of postdoctoral research training. This award encourages you to embark on an academic career involving clinical or fundamental research in, or related to, leukemia, lymphoma or myeloma under a research sponsor's direction.

**Annual renewal:** Based on a noncompetitive progress report review
