

Multiple Myeloma Research Foundation Funding Opportunities

No Deadline

More details are available on the website at
<http://www.themmr.org/research-programs/for-academic-researchers/>.

The MMRF supports innovative research efforts in the most promising areas of multiple myeloma research through several grant-making programs.

Biomarker Trials and Technology

The Multiple Myeloma Research Foundation (MMRF) is actively engaged in promoting the identification, testing and use of innovative biomarker approaches in clinical settings towards more tailored therapeutic treatments. The MMRF Biomarker Trials and Technology Award program will fund projects leading towards refined biomarker technologies, the next generation of MM diagnostics, and/or the conduct of clinical trials that prospectively evaluate the relationship between treatments and biomarker-based patient segmentation. Applicants from academia and/or industry, working alone or in partnership are eligible for this award. Applications will be accepted on an ongoing basis throughout 2011 for awards of up to \$500,000.
