Pharmacy Perspectives Goes Digital
Check out the spring 2010 issue of Pharmacy Perspectives now. For those of you who prefer being mailed a hard copy of the newsletter via the U.S. Post Office - don't worry. You will continue to do so. But for those of you who are reading this e-newsletter, you will automatically receive the Pharmacy Perspectives on-line as well. If you find that you only want just contact us and we'll take you off of our print mailing list. The beauty of going digital is that it saves money by reducing printing and postage costs and allows you to manipulate the file -- making fonts bigger or smaller, turning pages, etc. It also allows you to forward to friends, family and fellow alums. It's truly an interactive experience. Just click here. You'll be taken to the publication. On the left hand side you'll see a question mark and on the right hand side you'll see the cover of the publication. Either click on the question mark, which instructs you on how to manipulate the document, or run your cursor over the cover page and follow the pop up instructions.

School's Out for the Summer!
A collective sigh of relief could be heard Friday, May 14 when students finished finals. For the P-4's that leaves graduation and commencement week (May 24), and then "they're outta here!" Congratulations. You've earned the right to be called doctor. For the remaining classes that means a three month break to recharge. Have a great summer.

Prescription Drug Disposal Day June 5
The SOP is hosting a community-wide prescription drug disposal day on Saturday, June 5 from 9 a.m. - 1 p.m. In conjunction with the University of Colorado Hospital, University and Aurora Police Departments, and 9NEWS, the school will be collecting and disposing of controlled and non-controlled substances. Faculty and students are being asked to volunteer. If you're interested in helping that morning, contact Dana Brandorff. We need 10 students and 5 faculty members. Free food will be provided.

Pharmacotherapy Specialty Council Appointments
ACCP member Laura Borgelt, PharmD, FCCP, BCPS, who served as vice chair on the Pharmacotherapy Specialty Council of the Board of Pharmaceutical Sciences in 2009, was elected chair of the Council for 2010.

In the News
DOCP faculty member Sarah Anderson (PharmD '07) was seen on Fox 31 discussing the recent recall of children's OTC medications such as Tylenol, Benadryl and Zyrtec. Click here to watch the interview. DOPS faculty member and Cancer Research associate editor, Raj Agarwal (PhD), was quoted and interviewed for a piece in Natural News on a new study about bitter melon and its promising findings related to breast cancer. Bitter melon is a vegetable commonly eaten in India and China, which has been shown in previous studies to have a beneficial impact on blood sugar and cholesterol levels. Saint Louis University scientists conducted the study.
