<tbody>
<tr>
<td>DSAD 5502</td>
<td>Drawing Conclusions from Literature – Concepts</td>
<td>0.1-5.0</td>
<td>This course focuses on decision making in dentistry, the concepts section of the course will be presented and discussed segmentally through presentation of a research report on current hot topics.</td>
</tr>
<tr>
<td>DSAD 5505</td>
<td>REACH course</td>
<td>0.1-5.0</td>
<td>The course will establish, teach and evaluate campus-wide student competencies in teamwork, collaborative inter-professional practice and quality and safety focusing on underserved populations. Included is an exploration of roles of the different professions involved, and skills building in teamwork/communication.</td>
</tr>
<tr>
<td>DSAD 5855</td>
<td>Independent Study</td>
<td>0.1-5.0</td>
<td></td>
</tr>
<tr>
<td>DSBS 5500</td>
<td>Craniofacial Biology</td>
<td>0.1-5.0</td>
<td>Deals with the chemical basis of biological organization and function. Emphasis is given to topics most directly relevant to oral health and disease.</td>
</tr>
<tr>
<td>DSBS 5502</td>
<td>Microanatomy</td>
<td>0.1-5.0</td>
<td>This course will cover initially the structure and function of cells and tissues and progress to study the normal structural features of the organs of the body, as the basis for understanding pathologic conditions and disturbances of function.</td>
</tr>
<tr>
<td>DSBS 5504</td>
<td>Human Anatomy</td>
<td>0.1-10.0</td>
<td>Dental Anatomy covers the gross- and neuro-anatomy of the back, upper extremity, thorax, abdomen, and head and neck, and the embryology of the head and neck. Students will dissect cadavers and study computer generated cross-sections and reconstructions.</td>
</tr>
<tr>
<td>DSRE 5001</td>
<td>Introduction to Dentistry</td>
<td>0.1-5.0</td>
<td>To introduce the beginning dental students to the program with an overview of dental concepts and procedures.</td>
</tr>
<tr>
<td>DSRE 5500</td>
<td>Dental Morphology</td>
<td>0.1-5.0</td>
<td>Anatomical characteristics of the primary and permanent teeth in the human dentition, intra-arch relationships are considered in detail.</td>
</tr>
<tr>
<td>DSRE 5501</td>
<td>Dental Morphology Laboratory</td>
<td>0.1-5.0</td>
<td>Waxing full crowns of each tooth type to correct anatomical form, emphasizing intra-arch relationships.</td>
</tr>
<tr>
<td>DSRE 5504</td>
<td>Dental Materials Science 1</td>
<td>0.1-5.0</td>
<td>Basic information about materials science includes physical, chemical, mechanical, and biological properties. This information provides the background for the study of specific materials used in dentistry.</td>
</tr>

<tbody>
<tr>
<td>DSAD 5506</td>
<td>REACH Course</td>
<td>0.1-5.0</td>
<td>The course will establish, teach and evaluate campus-wide student competencies in teamwork, collaborative inter-professional practice and quality and safety, focusing on underserved populations. Included is an exploration of roles of the different professions involved, and skills building in teamwork/communication.</td>
</tr>
<tr>
<td>DSAD 5866</td>
<td>Independent Study</td>
<td>0.1-5.0</td>
<td></td>
</tr>
<tr>
<td>DSBS 5503</td>
<td>Microbiology</td>
<td>0.1-5.0</td>
<td>This course will review basic principles of general microbiology and present fundamentals of medical microbiology relevant to microorganisms of the oral cavity and sources of systemic infections with oral manifestations.</td>
</tr>
<tr>
<td>DSBS 5505</td>
<td>Immunology</td>
<td>0.1-5.0</td>
<td>Basic Information about the immune system; how it functions in the maintenance of health and how it can cause tissue injury.</td>
</tr>
<tr>
<td>DSBS 5508</td>
<td>Physiology</td>
<td>0.1-5.0</td>
<td>Deals with fundamentals of human physiology from basic cellular processes, such as membrane transport, to the organization and control of organ systems.</td>
</tr>
<tr>
<td>DSBS 5514</td>
<td>General Pathology</td>
<td>0.1-5.0</td>
<td>This course consists of lectures, laboratories, and discussions encompassing several basic biologic processes which interact to produce disease. These processes are considered at several levels of biologic organization ranging from clinical manifestations to molecular mechanisms.</td>
</tr>
</tbody>
</table>
**DSDD 5500 Infection Control**  Variable 0.1-5.0 cr.
This course reviews the fundamental principles of infection control including a focus on universal precautions, aseptic technique, methods of sterilization and regulatory issues.

**DSOP 5504 Principles of Operative Dentistry Direct Restoration 1**  Variable 0.1-5.0 cr.
This course is designed to teach students the principles of operative dentistry and the direct restoration of teeth from a problem specific approach.

**DSOP 5505 Principles of Operative Dentistry Direct Restoration 1 Lab**  Variable 0.1-5.0 cr.
This course integrates the principles of operative dentistry and direct restoration in a case-based laboratory environment.

**DSRE 5506 Occlusion 1**  Variable 0.1-5.0 cr.
This introductory course in articulation and occlusion deals with the principles of mandibular movement and reproducing these movements on an articulator. The various types of occlusions are considered as well as different treatment theories pertaining to occlusal philosophies.

**DSRE 5507 Occlusion 1 Laboratory 1**  Variable 0.1-5.0 cr.
The laboratory course includes waxing opposing dentitions to proper occlusion, obtaining intra-oral records on patient, and mounting patient models on an articulator.

**DSRE 5544 Cariology 1**  Variable 0.1-5.0 cr.
The course is intended to provide the basic science information about cariogenicity of plaque, caries etiology, nutrition, microbiological basis, patterns of progression and its relation to design for surgical treatment.

**PRMD 5000 Ethics in the Health Profession-Part I**  1.0 cr.
Required two-part course in ethics taught with dental, medical, nursing, pharmacy, physical therapy and physician assistant students. This course includes basic knowledge and skills in ethical theory and reasoning, professional ethics, and inter-professional approached to health care decision making.

**FIRST YEAR, Summer Semester**

**DSAD 5877 Independent Study**  Variable 0.1-5.0 cr.

**DSBS 5516 Organ Pathology**  Variable 0.1-5.0 cr.
This course, consisting of lectures and laboratory conferences, is designed to assist the student in learning the etiology, pathogenesis, and the changes in structure and function of specific disease entities on selected organ systems pertinent to the practice of dentistry.

**DSOD 5500 Health Data Collection 1**  Variable 0.1-5.0 cr.
Designed to introduce the student to the problem-oriented dental record and to a systems approach to the collection of health data. Includes both lecture and clinical phases.

**DSOP 5506 Principles of Operative Dentistry Direct Restoration 2**  Variable 0.1-5.0 cr.
Continuation of Principles of Operative Dentistry Direct Restoration 1. Designed to teach operative dentistry from a problem specific approach.

**DSOP 5507 Principles of Operative Dentistry Direct Restoration 2 Lab**  Variable 0.1-5.0 cr.
Continuation of Principles of Operative Dentistry Direct Restoration 1 Lab. Designed to teach operative dentistry from a problem specific approach.

**DSPE 5500 Periodontics 1**  Variable 0.1-5.0 cr.
This course is designed to make the student familiar with the normal periodontium, as well as the epidemiology, etiology and pathogenesis of periodontal disease.

**DSRE 5508 Indirect Single Tooth Restoration 1**  Variable 0.1-5.0 cr.
This course in restorative dentistry teaches the treatment of lesions and defects of single teeth using indirect restorative principles and techniques. Cast gold is the restorative material taught in this course.

**SECOND YEAR, Fall Semester**

**DSAD 6605 REACH Course**  Variable 0.1-5.0 cr.
This course will establish, teach and evaluate campus-wide student competencies in teamwork, collaborative interprofessional practice and quality and safety, focusing on underserved populations. Included is an exploration of roles of the different professions involved, and skills building in teamwork/communication.

**DSAD 6622 Managing Your Student Practice**  Variable 0.1-5.0 cr.
Course provides students with knowledge/skills to make the transition from pre-clinic to clinical patient. Competencies established in infection control, documentation/record keeping, patient management, medico-legal implications, ethical implications, professionalism, organization skills, communication skills, auxiliary utilization, and equipment/instrument utilization.

**DSAD 6855 Independent Study**  Variable 0.1-5.0 cr.
DSBS 6600 Pharmacology Variable 0.1-10.0 cr.
Intensive study of drugs used in dental practice with emphasis on the basic principles of drug action. Lectures and clinical correlations are employed.

DSFD 6606 Indirect Single Tooth Restoration 3 Variable 0.1-5.0 cr.
Course teaches fundamental concepts, preparation, provisionalization, and restoration of single teeth with full gold crowns. Fundamental concepts, preparation and restoration of single teeth with cast gold onlays including two onlay designs, a maxillary onlay design, and a mandibular onlay design.

DSFD 6607 Indirect Single Tooth Restoration 3 Lab Variable 0.1-5.0 cr.
Laboratory experience in cavity preparation, impression procedure, gold castings, and restoration of teeth with cast gold inlays and onlays.

DSON 6610 Oral Pathology 1 Variable 0.1-5.0 cr.
This course is a comprehensive review of the fundamental mechanisms and general principles of oral pathology, including developmental disturbances of oral and para-oral structures, benign and malignant tumors and cysts.

DSOT 6610 Orthodontics 1 Variable 0.1-5.0 cr.
Early physical and emotional development of the child is presented, emphasizing prenatal and neonatal influences on the craniofacial complex. The etiology and classification of malocclusion along with the development of disturbances of hard and soft tissues are introduced.

DSOT 6612 Orthodontics 2 Variable 0.1-5.0 cr.
Treatment planning for interceptive/corrective orthodontic procedures. Comprehensive diagnostic records taken. Lab techniques determine tooth size, arch length, mixed dentition and cephalometric analysis as well as the fabrication of fixed and removable appliances for interceptive and corrective orthodontic treatment are covered.

DSPE 6604 Periodontics 2 Variable 0.1-5.0 cr.
This course deals with the prevention, treatment and control of periodontal disease. Currently accepted therapies are discussed in detail. In addition, the student is taught how to evaluate new therapies which periodically become available.

DSPE 6605 Periodontics 2 Laboratory Variable 0.1-5.0 cr.
This course runs parallel with Periodontics 2. It is devoted to teaching the clinical skills necessary for the practice of periodontics within the context of a general dental practice.

DSRE 6600 Transition Clinic 1 Variable 0.1-5.0 cr.
This course provides second year dental students with methods and techniques for diagnosis, treatment planning, and record keeping for general dental practice and will also serve as a platform to train students in the correct use of the Axium software.

DSRE 6606 Indirect Single Tooth Restoration 2 Variable 0.1-5.0 cr.
Course teaches fundamental concepts, preparation, provisionalization, and restoration of single teeth with full gold crowns. Fundamental concepts, preparation and restoration of single teeth with cast gold onlays. Two onlay designs, a maxillary onlay design and a mandibular onlay design taught.

DSRE 6607 Indirect Single Tooth Restoration 2 Laboratory Variable 0.1-5.0 cr.
Course provides practical simulated clinical experience in preparation, provisionalization, and restoration of single teeth with full gold crowns. Two onlay designs, a maxillary onlay design, and a mandibular onlay design are practiced.

DSRP 6600 Combined Removable Prosthodontics Variable 0.1-5.0 cr.
Acquaints the student with principles of removable partial and complete prosthodontics. Includes principles of partial denture design and fabrication as they relate to preventive dentistry and diagnosis/treatment of endentulous patients. Problems of treating geriatric patients are discussed.

DSRP 6601 Combined Removable Prosthodontics Lab Variable 0.1-5.0 cr.
Laboratory exercises following lectures of principles of partial and complete removable prosthodontics. Students instructed in impressions, mounting casts, arrangement of artificial teeth, final waxing and familiarized with necessary steps in completing mandibular removable partial denture.

PRMD 6000 Ethics in Health Profession-Part II 1.0 cr.
Required two-part course in ethics taught with dental, medical, nursing, pharmacy, physical therapy and physician assistant students. This course included basic knowledge and skills in ethical theory and reasoning, professional ethics and inter-professional approaches to health care decision making.

SECOND YEAR, Spring Semester

DSAD 6606 REACH Course Variable 0.1-5.0 cr.
This course will establish, teach and evaluate campus-wide student competencies in teamwork, collaborative interprofessional practice and quality and safety, focusing on underserved populations. Included is an exploration of roles of the different professions involved, and skills building in teamwork/communication.
DSAD 6622 Managing Your Student Practice  
This course will address the University of Colorado School of Dental Medicine Clinic policy and procedure manual to assist each student in learning how to manage their dental school practice, making decisions that satisfy legal, societal, and ethical principles, to provide care for all patients and improve oral health. The course will also address issues in communication with the staff and faculty as well as understanding the regulatory requirements of a dental practice.

DSAD 6866 Independent Study  
Variable 0.1-5.0 cr.

DSEN 6610 Endodontics 1 & 2  
Course is an introduction to basic endodontics therapy. The philosophy of endodontics treatment and therapeutic techniques is discussed. Mechanisms of inflammation and repair are related to decisions in clinical practice.

DSEN 6611 Endodontics 1 & 2 Lab  
Variable 0.1-5.0 cr.

DSFD 6610 Fixed Prosthodontics  
Advanced pre-clinical lecture course. Ceramic restorations are included with discussion of pontic design and manipulation of gold solder. Dowel-core fabrication for endodontically treated teeth is covered. Clinical application is stressed and study of diagnosis and treatment planning is expanded.

DSFD 6611 Fixed Prosthodontics Laboratory  
1.0 cr.

DSOD 6602 Oral Radiology  
Variable 0.1-5.0 cr.

DSOD 6603 Oral Radiology Laboratory  
Variable 0.1-5.0 cr.

DSON 6612 Oral Pathology 2  
This course is a continuation of Oral Pathology 1.

DSPD 6620 Pediatric Dentistry 1  
Variable 0.1-5.0 cr.

DSPD 6625 Pediatric Dentistry 2  
Variable 0.1-5.0 cr.

DSPE 6605 Periodontics 2 Laboratory  
Variable 0.1-5.0 cr.

DSRE 6601 Transition Clinic 2  
Variable 0.1-5.0 cr.

DSRE 6608 Dental Materials Science 2  
Variable 0.1-5.0 cr.

DSRE 6612 Occlusion 2  
Variable 0.1-5.0 cr.

DSRE 6613 Occlusion 2 Laboratory  
Variable 0.1-5.0 cr.

DSRE 6644 Cariology 2  
Variable 0.1-5.0 cr.
### DSSD 6600 Clinical Dental Pharmacology
Integration of basic drug mechanisms with fundamentals of clinical pharmacology and patient care.

### DSSD 6604 Pain Control 1 (Local Anesthesia)
The anatomy of the nerve supply to the teeth and associated structures is covered. The techniques for administration of local anesthesia to the maxilla and mandible are demonstrated by the faculty and performed by the student.

### DSSD 6608 Prevention and Management of Medical Emergencies
The prevention, diagnosis, and management of medical emergencies are presented.

#### SECOND YEAR, Summer Semester

### DSAD 6655 Clinical Dentistry
This course is designed to recognize clinical education experiences. Learning is related to the amount of clinical activity you perform and the number of patients you serve. Patient management and scheduling efficiency are important skills to develop. Your student advocate, the patient coordinators and the faculty will work with you to improve your efficiency and skill. Dedication and a strong work ethic are required to perform well.

### DSAD 6877 Independent Study

### DSAD 7713 Community Assessment
Course exposes students to community and practice structures which they may be practicing during the ACTS Program and following graduation. Students collect descriptive information about community/practice setting. Students will research, observe, and conduct informal interviewing activities at personally selected sites.

### DSEN 6610 Endodontics 1 and 2
The course covers biology of the dental pulp and factors irritating the pulp and proper preventive measures. Endodontic procedures, such as pulp capping, pulpotomy, and pulpectomy are discussed from a biologic viewpoint. Diagnosis of pulp diseases and the relationship of clinical finding to those conditions are presented. This course is also an introduction to basic endodontic therapy. The philosophy of endodontic treatment and therapeutic techniques is discussed. Mechanisms of inflammation and repair are related to decisions in clinical practice.

### DSEN 6611 Endodontics 1 & 2 Lab
This is a laboratory course in basic endodontics techniques utilizing extracted natural teeth as models of clinical treatment.

### DSFD 6655 Clinical Fixed Prosthodontics
Clinical rotation in fixed prosthodontics.

### DSOD 6655 Clinical Oral Diagnosis
Clinical rotation in oral diagnosis.

### DSOD 6657 Clinical Oral Radiology
The purpose of this course is to provide students with experience in exposing radiographs and by completing written interpretations of all radiographs. Evaluation will be on a pass/fail basis.

### DSOP 6600 Pre-clinical Operative Dentistry Workshop
Practical restorative exercises in extracted natural teeth.

### DSOP 6610 Operative Dentistry Seminar 2
This course will present topics on operative dentistry relative to clinic patient care. Current materials and techniques as well as a review of fundamental concepts of operative dentistry will be taught.

### DSOP 6655 Clinical Operative Dentistry
Clinical rotation in operative dentistry.

### DSOS 7710 Oral and Maxillofacial Surgery
The diagnosis and treatment of oral and maxillofacial surgical problems including techniques for extraction of teeth, alveoplasty, biopsy, management of infection, treatment of maxillary and mandibular fractures, and suturing techniques.

### DSPE 6655 Clinical Periodontics
Clinical rotation in periodontics.

### DSRE 6604 Esthetic Dentistry
This course is designed to present information to students about those clinical dentistry procedures or concepts which are performed primarily to enhance dental esthetics.
Theory and indications treating mandibular instability with splints and equilibration. The etiology, diagnosis and treatment of occlusal trauma and mandibular dysfunction are introduced.

The laboratory portion of this course includes fabrication of different splint types. It also introduces the principles of equilibration and applying these principles to models.

An introductory clinic for dental students. Students will provide comprehensive dental care refining technical skills, learning patient management skills in a large group practice setting.

Clinical rotation in removable prosthetics.

Clinical rotation in fixed prosthodontics.

Pharmacological indications and contraindications and prevention and treatment of complications relating to use of nitrous oxide is presented.

This course is designed to acquaint the student with the evaluation, diagnosis, management, and pathology of the temporomandibular joint. Emphasis is on the multidisciplinary nature of treating disorders of the TMJ.

This course will provide students with guidance in completing the following Applied Dentistry Competency: Plan and implement a community health education intervention.

This course will establish, teach and evaluate campus-wide student competencies in teamwork, collaborative interprofessional practice and quality and safety, focusing on underserved populations. Included is an exploration of roles of the different professions involved, and skills building in teamwork/communication.

Course exposes students to community and practice structures which they may be practicing during the ACTS Program and following graduation. Students collect descriptive information about community/practice setting. Students will research, observe, and conduct informal interviewing activities at personally selected sites.

This course focuses on decision making in dentistry, during the hands-on section the students will be randomly assigned to research observations, and will design a research project/methodology to address their team’s assigned observation.

This course is designed to recognize clinical education experiences. Learning is related to the amount of clinical activity you perform and the number of patients you serve. Patient management and scheduling efficiency are important skills to develop. Your student advocate, the patient coordinators and the faculty will work with you to improve your efficiency and skill. Dedication and a strong work ethic are required to perform well.

Clinical rotation in endodontics.

Clinical rotation in fixed prosthodontics.

Presentations of actual treatment cases from the comprehensive patient care program are made by students and critiqued by the faculty.

Clinical rotation in oral diagnosis.

Clinical rotation in operative dentistry.
DSOS 7710 Oral and Maxillofacial Surgery
The diagnosis and treatment of oral and maxillofacial surgical problems including techniques for extraction of teeth, alveoplasty, biopsy, management of infection, treatment of maxillary and mandibular fractures, and suturing techniques.

DSPD 7700 Pediatric Dentistry 3
Course emphasizes diagnostic and treatment considerations for pediatric patients, including lecture materials and case presentations to facilitate a working knowledge of treatment planning/procedures covering sedation techniques as well as traumatic injuries, hospital dentistry and medically compromised patients.

DSPE 7755 Clinical Periodontics
Clinical rotation in periodontics.

DSRE 7712 Implant Dentistry
Concepts and applications of tissue integrated prostheses are presented and discussed. Topics include prosthetic techniques, diagnosis and treatment planning, analysis of current systems, qualifications and consent and clinical applications.

DSRE 7717 Comprehensive Patient Care Clinic B
Continuation of Comprehensive Patient Care Clinic A with additional emphasis on the treatment of pediatric, orthodontic, geriatric, and endodontics cases.

DSRE 7744 Cariology 3 – Section 1
Course provides students with a process to track patients at risk for caries, record actual caries experience, determine caries risk assessment, plan preventive care, document treatment (surgical and non-surgical) evaluate results achieved, and modify treatment as necessary.

DSRP 7755 Clinical Removable Prosthodontics
Clinical rotation in removable prosthodontics.

DSSD 7712 Dental Pain and Emergencies
This course covers the diagnostic and treatment considerations for the management of the patient in pain and other emergency problems encountered in general dentistry. Independent study assigned by course director.

THIRD YEAR, Spring Semester

DSAD 7706 REACH Course
This course will establish, teach and evaluate campus-wide student competencies in teamwork, collaborative interprofessional practice and quality and safety, focusing on vulnerable and underserved populations. Embedded within the curriculum will be an exploration of roles of the different professions involved, and skills building in teamwork/communication.

DSAD 7709 Public Health and Community Dentistry
This course exposes student to the public aspects of oral health care. It identifies the significance and scope of the public health programs at all levels of government and relates the public activities to the private sector.

DSAD 7723 Drawing Conclusions from Literature – Presentations
This course focuses on decision making in dentistry, the presentation of research section will be devoted to formal research presentations by each team. Presentation will follow generally accepted research presentation guidelines and will be followed by a question and answer period.

DSAD 7726 Dental Practice Planning
Teaches students to make basic decisions relating to planning/implementation of private practice. Primary focus on practice arrangements, business formats, dental associateships, buying a practice, designing and equipping dental office, financing practice, leases, debt management, personal/professional insurance, and selecting professional advisors.

DSAD 7866 Independent Study

DSDD 7700 Medical Problems and Physical Assessment
Course provides clinical basis for assessment of patient's medical history, status including systemic disease/physical findings. Directs student from normal interpretation/prevention to degrees of systemic pathophysiology that present acutely as medical emergencies, allowing for competent treatment.

DSDD 7702 Hospital Dentistry
This course provides an introduction to the hospital environment and the dental treatment of patients within that environment.

DSEN 7712 Endodontics 3
Course addresses topics of diagnosis and management of a variety of endodontic treatment problems such as periapical pathosis, traumatic injuries, surgical intervention, and bleeding.
## DSEN 7757 Clinical Endodontics
Clinical rotation in endodontics.  

### DSFD 7757 Clinical Fixed Prosthodontics
Clinical rotation in fixed prosthodontics.  

### DSOD 7712 Diagnosis and Treatment of Common Oral Lesions 2
Continuation of DSOD 7716  

#### DSOD 7724 Diagnostic Radiology
Basic concepts and interpretative principles for panoramic radiography, TMJ radiography, sialography, xeroradiography, and extraoral views will be presented. Additionally, advanced imaging modalities that have been made available to assist in radiologic diagnoses in dentistry will be introduced.  

### DSOD 7757 Clinical Oral Diagnosis
Clinical rotation in oral diagnosis.  

### DSON 7755 Clinical Oncology
One week course including lectures, seminars, tumor boards, surgery rounds, and radiation therapy conferences dealing with prevention, diagnosis, and treatment of head and neck neoplasia.  

### DSOP 7757 Clinical Operative Dentistry
Clinical rotation in operative dentistry.  

### DSOT 7720 Orthodontics 3
Provides students additional knowledge for clinical assessment/management of patients with orthodontic problems. Utilizes acquired knowledge from previous orthodontic courses to synthesize a general and orthodontic diagnosis, and preventive, restorative, and orthodontic treatment plan.  

### DSOT 7757 Clinical Orthodontics
Clinical rotation in orthodontics.  

### DSPD 7757 Clinical Pediatric Dentistry
Clinical rotation in pediatric dentistry.  

### DSPE 7757 Clinical Periodontics
Clinical rotation in periodontics.  

### DSRE 7719 Comprehensive Patient Care Clinic C
Comprehensive patient care activities with a focus on independence, student preparedness, technical skills, patient management and professionalism.  

### DSRE 7844 Cariology 3 – Section 2
Provides students with a process to track patients at risk for caries, record actual caries experience, determine caries risk assessment, plan preventive care, document treatment (surgical and non-surgical), evaluate results achieved, and modify treatment as necessary.  

### DSRP 7757 Clinical Removable Prosthodontics
Clinical rotation in removable prosthodontics.  

---

### THIRD YEAR, Summer Semester

#### DSAD 7759 Clinical Dentistry
In this course, students will learn patient management and scheduling efficiency through patient contact in a clinical setting. Students must possess dedication as well as a strong work ethic. Student advocates, patient coordinators, and faculty will facilitate student development.  

#### DSAD 7791 Community-based Clinical Dentistry 1
All students are required to complete assignments to practice in community-based sites of the ACTS Program. The specific objectives of these clinical assignments vary according to the site assigned to each student. Sites include multi-disciplinary community health care centers, institution or hospital based treatment centers, and private practices, providing care to underserved communities.  

#### DSAD 7877 Independent Study
Independent Study- assigned by course director.  

#### DSEN 7759 Clinical Endodontics
Clinical rotation in endodontics.  

#### DSFD 7759 Clinical Fixed Prosthodontics
Clinical rotation in fixed prosthodontics.
DSOD 7759 Clinical Oral Diagnosis  
Clinical rotation in oral diagnosis.  
Variable 0.1-5.0 cr.

DSOP 7759 Clinical Operative Dentistry  
Clinical rotation in operative dentistry.  
Variable 0.1-5.0 cr.

DSPE 7759 Clinical Periodontics  
Clinical rotation in periodontics.  
Variable 0.1-5.0 cr.

DSRE 7721 Comprehensive Patient Care Clinic D  
Continuation of Comprehensive Patient Care C with emphasis on effective practice management.  
Variable 0.1-5.0 cr.

DSRE 7944 Cariology 3 – Section 3  
This course provides students with a process to track patients at risk for caries, record actual caries experience, determine caries risk assessment, plan preventive care, document treatment (surgical and non-surgical), evaluate results achieved, and modify treatment as necessary.  
Variable 0.1-5.0 cr.

DSRE 7945 Treatment Planning and Case Presentation  
Treatment planning concepts and presentation formats, focused on multidisciplinary approach, key tooth analysis, phased treatment plans and case presentation format and technique.  
Variable 0.1-5.0 cr.

DSRP 7759 Clinical Removable Prosthodontics 1  
Clinical rotation in removable prosthodontics.  
Variable 0.1-5.0 cr.

FOURTH YEAR, Fall Semester

DSAD 8855 Clinical Dentistry  
In this course, students will learn patient management and scheduling efficiency through patient contact in a clinical setting. Students must possess dedication as well as a strong work ethic. Student advocates, patient coordinators, and faculty will facilitate student development.  
Variable 0.1-5.0 cr.

DSAD 8892 Community-Based Clinical Dentistry 2  
All students are required to complete assignments to practice in community-based sites of the ACTS program. The specific objectives of these clinical assignments vary according to the site assigned to each student. Sites include multidisciplinary community health care centers, institution or hospital-based treatment centers, and private practices providing care to underserved communities.  
Variable 0.1-10.0 cr.

DSAD 8895 Independent Study  
Variable 0.1-5.0 cr.

DSEN 8855 Clinical Endodontics  
Clinical rotation in endodontics.  
Variable 0.1-5.0 cr.

DSFD 8855 Clinical Fixed Prosthodontics  
Clinical rotation in fixed prosthodontics.  
Variable 0.1-5.0 cr.

DSFD 8861 Advanced Implant Prosthodontics Seminar  
A single unit full crown procedure on a patient is performed by the student with specific time restraints and evaluation criteria. The purpose of this is to demonstrate clinical proficiency in this specific technique.  
Variable 0.1-5.0 cr.

DSOD 8855 Clinical Oral Diagnosis  
Clinical rotation in oral diagnosis.  
Variable 0.1-5.0 cr.

DSOP 8855 Clinical Operative Dentistry  
Clinical rotation in operative dentistry.  
Variable 0.1-5.0 cr.

DSOS 8855 Clinical Oral and Maxillofacial Surgery  
This is a clinical oral surgery experience including routine and surgical removal of erupted and impacted teeth and use of intravenous sedation techniques.  
Variable 0.1-5.0 cr.

DSPD 8855 Clinical Pediatric Dentistry  
Course is a continuation from initial clinical courses and provides further experience in developmental, behavioral, preventive, diagnostic, and therapeutic care on a comprehensive basis for pediatric patients in the primary, transitional, and permanent dentition phases and patients with special health care needs.  
Variable 0.1-5.0 cr.

DSPE 8810 Periodontics 4  
This course emphasizes the interrelationships of periodontics and restorative dentistry and the management of advanced periodontal pathology is discussed.  
Variable 0.1-5.0 cr.

DSPE 8855 Clinical Periodontics  
Clinical rotation in periodontics.  
Variable 0.1-5.0 cr.

</table>
DSRE 8827 Comprehensive Patient Care Clinic F  
Variable 0.1-13.0 cr.
Continuation of advanced comprehensive patient care activities for DS 4 dental students not registered for Integrated Care Clinic Dentistry.

DSRP 8757 Clinical Removable Prosthodontics  
Variable 0.1-5.0 cr.
Clinical rotation in removable prosthodontics.

FOURTH YEAR, Summer Semester (as needed)

DSAD 8859 Independent Study  
Variable 0.1-10.0 cr.

DSAD 8894 Community Based Clinical Dentistry  
Variable 0.1-10.0 cr.
Students complete six weeks (may elect to take additional eighteen weeks) in a non-metropolitan, community based educational site. Current sites include rural community health centers, special patient care hospitals, and migrant health care programs as well as several private practice locations.

DSRE 8837 Comprehensive Patient Care Clinic G  
Variable .01-15.0 cr.
Continuation of advanced comprehensive patient care activities for DS 4 dental students not registered for Integrated Care Clinical Dentistry.

FOURTH YEAR, Fall Semester (as needed)

DENTAL INTERNATIONAL STUDENT PROGRAM
(The Dental curriculum is subject to change without notice.)

FIRST YEAR, Spring Semester

DISP 7100 Restorative Preclinical Simulation  
Variable 0.1-5.0 cr.
This seminar-based course introduces the student to an overview of contemporary restorative procedures in a simulated clinical environment.

DISP 7101 Restorative Preclinical Simulation Lab  
Variable 0.1-5.0 cr.
This laboratory-based course provides students with an overview of restorative techniques in a simulated clinical environment.

DISP 7102 Occlusion  
Variable 0.1-5.0 cr.
Course covering principles of intra and inter-oral relationships. Course will also cover diagnosis and treatment regarding the occlusion relationship.

DISP 7103 Occlusion Lab  
Variable 0.1-5.0 cr.
The laboratory portion of this course includes fabrication of different splint types. It also introduces principles of equilibration and applying these principles to models.

DISP 7104 Independent Student  
Variable 0.1-5.0 cr.

DISP 7105 Dental Materials  
Variable 0.1-5.0 cr.
This course will highlight contemporary dental materials and address their chemical composition and clinical application.

DISP 7106 Clinical Practice Ethics  
Variable 0.1-5.0 cr.
Case-based ethics discussion.

DISP 7112 Cariology  
Variable 0.1-5.0 cr.
Basic knowledge about dental caries and didactic instruction and exercises in identifying caries, learning and evaluating detection methods. Additionally, identifying and correlating factors that contribute to caries, and developing programs for prevention and management to reduce identified factors.

DISP 7113 Complete & Removable Prosthodontics  
Variable 0.1-5.0 cr.

DISP 7114 Complete & Removable Prosthodontics Lab  
Variable 0.1-5.0 cr.

DISP 7121 Endodontics 1 & 2  
Variable 0.1-5.0 cr.
Course is an introduction to basic endodontics therapy. The philosophy of endodontics treatment and therapeutic techniques is discussed. Mechanisms of inflammation and repair are related to decisions in clinical practice.

DISP 7122 Periodontics 2  
Variable 0.1-5.0 cr.
This course deals with the prevention, treatment and control of periodontal disease. Currently accepted therapies are discussed in detail. In addition, the student is taught how to evaluate new therapies which periodically become available.
DISP 7123 Periodontics 2 Lab Variable 0.1-5.0 cr.
This course is devoted to teaching the clinical skills necessary for the practice of periodontics within the context of a general dental practice.

DISP 7124 Clinical Dental Pharmacology Variable 0.1-5.0 cr.
Integration of basic drug mechanisms with fundamentals of clinical pharmacology and patient care.

DISP 7125 Pain Control 1 (Local Anesthesia) Variable 0.1-5.0 cr.
The anatomy of the nerve supply to the teeth and associated structures is covered. The techniques for administration of local anesthesia to the maxilla and mandible are demonstrated by the faculty and performed by the student.

DISP 7126 Prevention and Management of Medical Emergencies Variable 0.1-5.0 cr.
The prevention, diagnosis, and management of medical emergencies are presented.

DISP 7129 Infection Control Variable 0.1-5.0 cr.
This course reviews the fundamental principles of infection control including a focus on universal precautions, aseptic technique, methods of sterilization and regulatory issues.

DISP 7130 Oral Radiology Variable 0.1-5.0 cr.
Designed to introduce the students to basic radiology and to provide them with the necessary practical skills in preparation for clinical dentistry.

DISP 7131 Oral Radiology Lab Variable 0.1-5.0 cr.
The laboratory is designed to provide students with the necessary practical skills in preparation for clinical dentistry.

DISP 7132 Diagnostic Radiology Variable 0.1-5.0 cr.
Basic concepts and interpretative principles for panoramic radiography, TMJ radiography, sialography, xeroradiography, and extraoral views will be presented. Additionally, advanced imaging modalities that have been made available to assist in radiologic diagnoses in dentistry will be introduced.

DISP 7140 Pediatric Dentistry 1 Variable 0.1-5.0 cr.
Basic principles of clinical diagnosis and treatment of the child patient are introduced. Developmental aspects of the formation of the craniofacial complex are applied to clinical management of space maintenance, pulpal, restorative, and behavior management problems.

DISP 7160 Managing Your Student Practice Variable 0.1-5.0 cr.
Course provides student with knowledge/skills necessary to make the transition from pre-clinic to clinical patient. Competencies established in infection control, documentation, record keeping, patient management, medico-legal/ethical implications, professionalism, organization skills, communication skills, auxiliary utilization, and equipment/instrument utilization.

DISP 7163 Transition Clinic for ISP Students Variable 0.1-5.0
A mini-orientation of clinical methods and practices and introduction to the appropriate utilization of AxiUm software. This will include an overview of the SODM oral diagnoses and treatment planning processes, procedures and policies with both clinical and didactic components.

DISP 7321 Periodontics 3 Variable 0.1-5.0 cr.
This course is devoted to making the student familiar with the surgical management of periodontal disease. The indications and rationale for resection, reconstructive and mucogingival procedures are discussed.

DISP 7327 Periodontics 3 Laboratory Variable 0.1-5.0 cr.
The student is given the opportunity to practice a variety of clinical procedures. Pig mandibles are utilized for these laboratory exercises.

FIRST YEAR, Summer Semester

DISP 7113 Complete and Removable Prosthodontics Variable 0.1-5.0 cr.

DISP 7114 Complete and Removable Prosthodontics Lab Variable 0.1-5.0 cr.

DISP 7121 Endodontics 1 & 2 Variable 0.1-5.0 cr.
Course is an introduction to basic endodontics therapy. The philosophy of endodontics treatment and therapeutic techniques is discussed. Mechanisms of inflammation and repair are related to decisions in clinical practice.

DISP 7201 Independent Study Variable 0.1-5.0 cr.

DISP 7202 Case Presentation Variable 0.1-5.0 cr.
Patient care with development of treatment plan through presentation by student to students and faculty.
DISP 7203 Fixed Prosthodontics Variable 0.1-5.0 cr.
An advanced preclinical lecture course covering ceramic restorations along with discussion of pontic design and manipulation of gold solder. Dowel-core fabrication for endodontically treated teeth is covered. Clinical application is stressed and study of diagnosis and treatment planning is expanded.

DISP 7204 Fixed Prosthodontics Laboratory Variable 0.1-5.0 cr.
Emphasis on ceramic restorations and procedures involved in fabricating fixed bridges in the anterior of appearance zone. Restorations include direct pattern fabrication of dowel-cores to building up badly broken-down or fractured teeth.

DISP 7205 Comprehensive Patient Care Clinic A Variable 0.1-5.0 cr.
An introductory clinic for students providing comprehensive dental care refining technical skills, learning patient management skills in a large group practice setting.

DISP 7206 Clinical Restorative Variable 0.1-5.0 cr.
Combines clinical experience with diagnosis, treatment planning, restorative treatment. Students assigned a fully dentated/partially/fully edentulous patient needing restorative procedures. Restorative materials include amalgam, cast gold, and tooth-colored composite resins/porcelain. Emphasis on fabrication of restorations that function adequately.

DISP 7211 Endodontics 1 Laboratory Variable 0.1-5.0 cr.
This is a laboratory course in basic endodontic techniques utilizing extracted natural teeth as models of clinical treatment.

DISP 7216 Operative Dentistry Seminar Variable 0.1-5.0 cr.
This course will present topics on operative dentistry relative to clinic patient care. Current materials and techniques as well as a review of fundamental concepts of operative dentistry will be taught.

DISP 7220 Pain Control 2 (Nitrous Oxide Analgesia) Variable 0.1-5.0 cr.
Pharmacological indications and contraindications and prevention and treatment of complications relating to use of nitrous oxide is presented.

DISP 7221 Clinical Periodontics Variable 0.1-5.0 cr.
Clinical rotation in periodontics

DISP 7222 Orofacial Pain Variable 0.1-5.0 cr.
This course is designed to acquaint the student with evaluation, diagnosis, arrangement and pathology of the temporomandibular joint. Emphasis is on the multidisciplinary nature of treating disorders of TMJ.

DISP 7231 Health Data Collection 1 Variable 0.1-5.0 cr.
Designed to introduce the student to the problem-oriented dental record and to a systems approach to the collection of health data. Includes both lecture and clinical phases.

DISP 7232 Clinical Oral Diagnosis Variable 0.1-5.0 cr.
Clinical rotation in oral diagnosis.

DISP 7233 Clinical Dentistry Variable 0.1-5.0 cr.
In this course, students will learn patient management and scheduling efficiency through patient contact in a clinical setting. Students must possess dedication as well as a strong work ethic. Student advocates, patient coordinators, and faculty will facilitate student development.

DISP 7240 Pediatric Dentistry 2 Variable 0.1-5.0 cr.
Basic principles of clinical diagnosis and treatment of the child patient are introduced.

DISP 7314 Esthetic Dentistry Variable 0.1-5.0 cr.
This course is designed to present information to students about those clinical dentistry procedures or concepts which are performed primarily to enhance dental esthetics.

FIRST YEAR, Fall Semester

DISP 7300 Case Presentation 2 Variable 0.1-5.0 cr.
Presentations of actual treatment cases from the comprehensive patient care program are made by students and critiqued by the faculty.

DISP 7301 Comprehensive Patient Care Clinic B Variable .01-5.0 cr.
Continuation of Comprehensive Patient Care Clinic A with additional emphasis on the treatment of pediatric, orthodontic, geriatric, and endodontics cases.

DISP 7302 Clinical Restorative Variable 0.1-5.0 cr.
Combines clinical experience with diagnosis, treatment planning, restorative treatment. Students assigned a fully dentated/partially/fully edentulous patient needing restorative procedures. Restorative materials include amalgam, cast gold, and tooth-colored composite resins/porcelain. Emphasis on fabrication of restorations that function adequately.

**SECOND YEAR, Summer Semester**

- **DISP 8111 Cariology II-Section 2**
  Provides student with a process to track patients at risk for caries, record actual caries experience, determine caries risk assessment, plan preventive care, document treatment (surgical and non-surgical), evaluate results achieved and modify treatment as necessary.

- **DISP 8120 Endodontics 3**
  This course addresses topics of diagnosis and management of a variety of endodontic treatment problems such as periapical pathosis, traumatic injuries, surgical intervention, and bleeding.

- **DISP 8121 Endodontics 4**
  This is an advanced course in endodontics clinical practice. Endodontic implants, autogenous transplants, advanced surgical concepts and controversies will be included.

- **DISP 8123 Clinical Endodontics**
  Clinical rotation in endodontics.

- **DISP 8124 Clinical Periodontics**
  Clinical rotation in periodontics.

- **DISP 8125 Clinical Oral Maxillofacial Surgery**
  This is a clinical oral surgery experience including routine and surgical removal of erupted and impacted teeth and use of intravenous sedation techniques.

- **DISP 8127 Medical Problems and Physical Assessment**
  This course provides competent clinical basis for assessment of patient's medical history, current status including systemic disease/physical findings. Directs student from normal interpretation/prevention to systemic pathophysiology that presents as medical emergency, allowing for proper recognition/competent medical treatment.

- **DISP 8130 Clinical Oncology**
  An assignment of one week for students includes lectures, seminars, tumor boards, surgery rounds, and radiation therapy conferences on a health professional approach to the prevention, diagnosis, and treatment of head and neck neoplasia.

- **DISP 8131 Oral Pathology 2**
  This course is a continuation of DISP 7330.

- **DISP 8132 Forensic Dentistry**
  Introductory concepts and techniques in forensic dentistry are presented and discussed.

- **DISP 8133 Clinical Oral Diagnosis**
  Clinical rotation in oral diagnosis.

- **DISP 8160 Dental Ethics and Jurisprudence**
  This course prepares students for appropriate conduct consistent with the legal and ethical principles of the dental profession. It lays the foundations for each student's continued growth with respect to the legal and ethical obligations of professionalism.

- **DISP 8161 Practice Management**
  Understanding of basic management activities which must be continuously carried out in private practice. Primary focus on financial records, billing and collections, professional insurance, fees, clinical records, third party relations, case presentation, practice analysis, dental practice marketing, and personnel management.

- **DISP 8162 Dental Practice Planning**
  All students will be required to complete a minimum of six weeks and may elect an additional eighteen weeks experience in a non-metropolitan community-based educational site. The specific objectives of these clinical experiences vary according to the specific site of assignment. Current sites for student experiences include multi-disciplinary rural community health centers, special patient care hospitals for patients with psychiatric illness and neuropathologically impaired patients, and migrant health care program. Additionally, a number of private practice locations are available for students desiring private practice experience. (Students may be assigned or elect this course in the Spring or Summer semesters of the fourth academic year.)

- **DISP 8170 Diagnosis and Treatment of Common Oral Lesions 2**
  Continuation of DISP 7326

- **DISP 8176 Public Health and Community Dentistry**
  This course exposes student to the public aspects of oral health care. It identifies the significance and scope of public health programs at all levels of government and relates the public activities to the private practice of dentistry.

- **DISP 8203 Special Care Clinic**
  Variable 0.1-5.0 cr.
DISP 8105 Evidence Based Topical Reviews  Variable 0.1-5.0 cr.
Introduction to concepts of evidence based dentistry and hierarchy of evidence for clinically relevant topics. Students develop clinically relevant queries and submit PICO questions, bibliographies, publication critiques, and make presentations regarding he evidence for their topic to their classmates/faculty.

DISP 8125 Clinical Oral Maxillofacial Surgery  Variable 0.1-5.0 cr.
This is a clinical oral surgery experience including routine and surgical removal of erupted and impacted teeth and use of intravenous sedation techniques.

DISP 8200 Case Presentation  Variable 0.1-5.0 cr.
Patient care with development of treatment plan through presentation by student to students and faculty.

DISP 8201 Comprehensive Patient Care Clinic D  Variable 0.1-5.0 cr.
Continued provision of Comprehensive Patient Care Clinic C with emphasis on effective practice management.

DISP 8202 Clinical Restorative  Variable 0.1-5.0 cr.
Combines clinical experience with diagnosis, treatment planning, restorative treatment. Students assigned a fully dentated/partially/fully edentulous patient needing restorative procedures. Restorative materials include amalgam, cast gold, and tooth-colored composite resins/porcelain. Emphasis on fabrication of restorations that function adequately.

DISP 8204 Independent Study  Variable 0.1-5.0 Cr.

DISP 8211 Cariology II- Section 3  Variable 0.1-5.0 cr.
This course provides students with a process to track patients at risk for caries, record actual caries experience, determine caries risk assessment, plan preventive care, document treatment (surgical and non-surgical), evaluate results achieved, and modify treatment as necessary.

DISP 8220 Clinical Endodontics  Variable 0.1-5.0 cr.
Clinical rotation in endodontics.

DISP 8222 Clinical Periodontics  Variable 0.1-5.0 cr.
Clinical rotation in periodontics.

DISP 8231 Clinical Oral Diagnosis  Variable 0.1-5.0 cr.
Clinical rotation in oral diagnosis.

DISP 8232 Clinical Dentistry  Variable 0.1-5.0 cr.
Designed to recognize clinical education experiences. Learning related to amount of clinical activity performed and number of patients served. Patient management and scheduling efficiency skill development. Dedication and a strong work ethic are required to perform well.

DISP 8240 Clinical Pediatric Dentistry  Variable 0.1-5.0 cr.
This course provides experience in developmental, behavioral, preventive, diagnostic, and therapeutic care on a comprehensive basis for pediatric patients in the primary, transitional, and permanent dentition phases and patients with special health needs.

SECOND YEAR, Fall Semester

DISP 8105 Evidence Based Topical Reviews  Variable 0.1-5.0 cr.
Introduction to concepts of evidence based dentistry and hierarchy of evidence for clinically relevant topics. Students develop clinically relevant queries and submit PICO questions, bibliographies, publication critiques, and make presentations regarding he evidence for their topic to their classmates/faculty.

DISP 8203 Special Care Clinic  Variable 0.1-5.0 cr.

DISP 8251 Clinical Orthodontics  Variable 0.1-5.0 cr.
Clinical rotation in orthodontics.

DISP 8300 Case Presentation 6  Variable 0.1-5.0 cr.
Patient care with development of treatment plan through presentation by student to students and faculty.

DISP 8301 Comprehensive Patient Care Clinic E  Variable 0.1-5.0 cr.
Advanced comprehensive patient care including applied principles of practice management.

DISP 8302 Clinical Restorative  Variable 0.1-5.0 cr.
Combines clinical experience with diagnosis, treatment planning, restorative treatment. Students assigned a fully dentated/partially/fully edentulous patient needing restorative procedures. Restorative materials include amalgam, cast gold, and tooth-colored composite resins/porcelain. Emphasis on fabrication of restorations that function adequately.

DISP 8303 Independent Study  Variable 0.1-5.0 cr.
DISP 8310 Advanced Implant Prosthodontics Seminar
Students gain experience in clinical use of cast restorations. Emphasis is placed on the fabrication of restorations that are to function adequately in the patient's biologic environment.

DISP 8311 Cariology III
Variable 0.1-5.0 cr.

DISP 8321 Clinical Endodontics
Clinical rotation in endodontics.

DISP 8322 Periodontics 4
This course emphasizes the interrelationships of periodontics and restorative dentistry and the management of advanced periodontal pathology is discussed.

DISP 8323 Clinical Periodontics
Clinical rotation in periodontics.

DISP 8330 Clinical Oral Diagnosis
Clinical rotation in oral diagnosis.

DISP 8331 Clinical Dentistry
Variable 0.1-5.0 cr.
This course is designed to recognize clinical education experiences. Learning is related to the amount of clinical activity you perform and the number of patients you serve. Patient management and scheduling efficiency are important skills to develop.

DISP 8340 Clinical Pediatric Dentistry
Clinical rotation in pediatric dentistry

DISP 8350 Orthodontics
Variable 0.1-10.0 cr.
Early physical and emotional development of the child is presented, emphasizing prenatal and neonatal influences on the craniofacial complex. The etiology and classification of malocclusion along with the development of disturbances of hard and soft tissues are introduced.

POSTGRADUATE PERIODONTICS CERTIFICATE PROGRAM
(The Periodontics Certificate curriculum is subject to change without notice.)

First Year, Summer Semester

DPER 7100 Periodontics Specialty Clinic 1
1.0 cr.
In this postdoctoral course, students receive experiences with all accepted methods of periodontal treatment, dental implantology, and periodontal plastic procedures.

DPER 7101 Current Literature 1
1.25 cr.
In this postdoctoral seminar course, relevant readings in the periodontal literature relating to specific topics are assigned and critically discussed.

DPER 7103 Periodontal Literature Review Seminar I
1.25 cr.
In this postdoctoral seminar course, relevant readings in the periodontal literature relating to specific topics are assigned and critically discussed.

DPER 7111 Advanced Periodontal Concepts
1.3 cr.
This postdoctoral course is an intense review of periodontal procedures, in which residents are also instructed in periodontal case documentation procedures, intraoral photography, record keeping and clinical protocol.

DPER 7112 Postgraduate Dental Implantology Seminar 1A
0.7 cr.
In this initial lecture and seminar course, relevant readings in the dental literature relating to specific topics in dental implantology are assigned and critically discussed. A variety of cases are treatment planned by the residents. (Part 1 of three-semester course)

DPER 7113 Oral Medicine and Clinical Diagnosis
0.7 cr.
In this postdoctoral course, students review a variety of oral diseases and accepted methods of treatment of those as well as systemic diseases manifested in the oral cavity.

First Year, Fall Semester

DPER 7200 Periodontics Specialty Clinic 2
2.0 cr.
Prereq: DPER 7100
In this postdoctoral course, students receive experiences with all accepted methods of periodontal treatment, dental implantology, and periodontal plastic procedures.

DPER 7201 Periodontics Current Literature 1A
0.7 cr.
This postdoctoral course encompasses a review of the latest dental and medical journals for the most recent information related to the art, science, and practice of periodontics. Students prepare abstracts to be discussed at scheduled seminars. (Part 1 of two-semester course)
DPER 7202 Periodontics Treatment Planning 1A 0.3 cr.
In this postdoctoral seminar course, Periodontics and GPR residents present a documentation database, diagnosis and treatment plans for patients treated communally in these two clinics. (Part of two-semester course)

DPER 7203 Periodontal Literature Review Seminar 1A 1.7 cr.
In this postdoctoral seminar course, relevant readings in the periodontal literature relating to specific topics are assigned and critically discussed.

DPER 7204 Periodontal Case Presentations Seminar 1A 0.7 cr.
In this postdoctoral course, residents prepare and present a complete documentation database, diagnosis/prognosis, treatment plan, treatment procedures, and evaluation of treatment results in formal case presentations simulating the oral examination for the American Board of Periodontology. (Part of two-semester course)

DPER 7210 Advanced Periodontal Biology 2.0 cr.
This postdoctoral course develops a fundamental understanding of the microscopic anatomy, cell biology and physiology of the periodontal tissues in health, during disease progression, and following periodontal therapy.

DPER 7211 Pain Control & Sedation/Comprehensive Pain Management 1 2.0 cr.
This is a postgraduate course in pain control and sedation and patient evaluation to determine appropriate modalities of pain and anxiety control. (Part of two-semester course)

DPER 7212 Postgraduate Dental Implantology Seminar 1B 0.7 cr.
Prereq: DPER 7112
In this initial lecture and seminar course, relevant readings in the dental literature relating to specific topics in dental implantology are assigned and critically discussed. A variety of cases are treatment planned by the residents. (Part 2 of three-semester course)

First Year, Spring Semester

DPER 7300 Periodontics Specialty Clinic 3 2.0 cr.
Prereq: DPER 7100, DPER 7200
In this postdoctoral course, students receive experiences with all accepted methods of periodontal treatment, dental implantology, and periodontal plastic procedures.

DPER 7301 Periodontics Current Literature 1B 0.5 cr.
Prereq: DPER 7201
This postdoctoral course encompasses a review of the latest dental and medical journals for the most recent information related to the art, science, and practice of periodontics. Students prepare abstracts to be discussed at scheduled seminars. (Part 2 of two-semester course)

DPER 7302 Periodontics Treatment Planning 1B 0.5 cr.
Prereq: DPER 7202
In this postdoctoral seminar course, Periodontics and GPR residents present a documentation database, diagnosis and treatment plans for patients treated communally in these two clinics. (Part 2 of two-semester course)

DPER 7303 Periodontal Literature Review Seminar 2 6.0 cr.
Prereq: DPER 7203
In this postdoctoral seminar course, relevant readings in the periodontal literature relating to specific topics are assigned and critically discussed.

DPER 7304 Periodontal Case Presentations Seminar 1B 1.0 cr.
Prereq: DPER 7204
In this postdoctoral course, residents prepare and present a complete data base, diagnosis/prognosis, treatment plan, treatment procedures, and evaluation of treatment results in formal case presentations simulating the oral examination for the American Board of Periodontology. (Part 2 of two-semester course)

DPER 7305 Periodontal Research 1 1.5 cr.
Course requires student to select a research topic, define a research question, do a literature search on the topic, organize a research project, carry out the project, collect and analyze the results, and write a publishable manuscript on the project.

DPER 7311 Pain Control & Sedation/Comprehensive Pain Management 2 1.0 cr.
Prereq: DPER 7211
This is a postgraduate course in pain control and sedation, and evaluation of patients to determine appropriate modalities of pain and anxiety control. (Part 2 of two-semester course)

DPER 7312 Postgraduate Dental Implantology Seminar 1C 1.0 cr.
Prereq: DPER 7112, DPER 7212
In this initial lecture and seminar course, relevant readings in the dental literature relating to specific topics in dental implantology are assigned and critically discussed. A variety of cases are treatment planned by the residents. (Part 3 of three-semester course)

</table>
DPER 8206 Periodontics Clinical Teaching 1A 1.0 cr.
Postdoctoral periodontics students gain experience in instructing dental and hygiene students after receiving instruction in the basics of didactic and clinical teaching. *(Part 1 of two-semester course)*

DPER 8207 Minor Tooth Movement 1A 1.3 cr.
This didactic and clinical course will familiarize the resident with orthodontic procedures that can be utilized in comprehensive periodontal treatment. Clinical cases will be treated in conjunction with orthodontic residents and faculty. *(Part 1 of two-semester course)*

DPER 8212 Postgraduate Dental Implantology Seminar 2A 1.0 cr.
Prereq: DPER 7112, DPER 7212, DPER 7312
In this initial lecture and seminar course, relevant readings in the dental literature relating to specific topics in dental implantology are assigned and critically discussed. A variety of cases are treatment planned by the residents. *(Part 1 of two-semester course)*

DPER 8213 TMJ Clinic 1B (rotation) 1.0 cr.
Prereq: DPER 7313, DPER 8113
TMJ disorders are reviewed and treatment provided in these clinic sessions.

DPER 8221 Implants in the Orthodontic Patient 1.0 cr.
This postdoctoral course is an in-depth study of the use of implants in patients both for restorative dentistry and as an orthodontic anchorage.

DPER 8222 Periodontic/Orthodontic Treatment 1.0 cr.
This postdoctoral course is a study of the interdisciplinary care of the patient with periodontal and orthodontic needs and includes a review of the literature in conjunction with a periodontist and orthodontist.

Second Year, Spring Semester

DPER 8300 Periodontics Specialty Clinic 6 2.0 cr.
Prereq: DPER 7100, DPER 7200, DPER 7300, DPER 8100, DPER 8200
In this postdoctoral course, students receive experiences with all accepted methods of periodontal treatment, dental implantology, and periodontal plastic procedures.

DPER 8301 Periodontal Journal Club 2B 0.5 cr.
Prereq: DPER 7201, DPER 7301, DPER 8201
This postdoctoral course encompasses a review of the latest dental and medical journals for the most recent information related to the art, science, and practice of periodontics. Students prepare abstracts to be discussed at scheduled seminars. *(Part 2 of two-semester course)*

DPER 8302 Periodontics Treatment Planning 2B 0.5 cr.
Prereq: DPER 7202, DPER 7302, DPER 8202
In this postdoctoral seminar course, Periodontics and GPR residents present a documentation database, diagnosis and treatment plans for patients treated communally in these two clinics. *(Part 4 of two-semester course)*

DPER 8303 Periodontal Literature Review Seminar 4 2.0 cr.
Prereq: DPER 7203, DPER 7303, DPER 8203
In this postdoctoral seminar course, relevant readings in the periodontal literature relating to specific topics are assigned and critically discussed.

DPER 8304 Periodontal Case Presentations Seminar 2B 1.0 cr.
Prereq: DPER 7204, DPER 7304, DPER 8204
In this postdoctoral course, residents prepare and present a complete documentation database, diagnosis/prognosis, treatment plan, treatment procedures, and evaluation of treatment results in formal case presentations simulating the oral examination for the American Board of Periodontology. *(Part 2 of two-semester course)*

DPER 8305 Periodontal Research 4 1.5 cr.
Prereq: DPER 7305, DPER 8105, DPER 8205
Course requires student to select a research topic, define a research question, do a literature search on the topic, organize a research project, carry out the project, collect and analyze the results, and write a publishable manuscript on the project.

DPER 8306 Periodontics Clinical Teaching 1B 1.5 cr.
Prereq: DPER 8206
Postdoctoral periodontics students gain experience in instructing dental and hygiene students after receiving instruction in the basics of didactic and clinical teaching. *(Part 2 of two-semester course)*

DPER 8307 Minor Tooth Movement 1B 2.0 cr.
Prereq: DPER 8207
This didactic and clinical course will familiarize the resident with orthodontic procedures that can be utilized in comprehensive periodontal treatment. Clinical cases will be treated in conjunction with orthodontic residents and faculty. *(Part 2 of two-semester course)*
DPER 8308 Practice Management 1.5 cr.
This seminar series is designed to provide residents with an overview of the primary private practice options that they may pursue following residency training and how to evaluate various practice opportunities.

DPER 8311 Advanced Immunology/Microbiology 1.5 cr.
This postdoctoral course will review and update knowledge in the areas of microbiology and immunology relevant to homeostasis and pathology in the oral cavity.

DPER 8312 Postgraduate Dental Implantology Seminar 2B 1.0 cr.
Prereq: DPER 7112, DPER 7212, DPER 7312, DPER 8212
In this lecture and seminar course, relevant readings in the dental literature relating to specific topics in dental implantology are assigned and critically discussed. A variety of cases are treatment planned by the residents. (Part 2 of two-semester course)

DPER 8314 Advanced Topics in Pharmacology 1.5 cr.
This is an advanced course in Pharmacology that will provide residents with a review and update of pharmacology and an understanding of applied pharmacology and patient care.

Third Year, Summer Semester

DPER 9100 Periodontics Specialty Clinic 7 1.0 cr.
Prereq: DPER7100, DPER 7200, DPER 7300, DPER 8100, DPER 8200, DPER 8300
In this postdoctoral course, students receive experiences with all accepted methods of periodontal treatment, dental implantology, and periodontal plastic procedures.

DPER 9101 Periodontal Current Literature 3A 2.0 cr.
In this postdoctoral seminar course, relevant reading in the periodontal literature relating to specific topics are assigned and critically discussed.

DPER 9102 Periodontal Literature Review Seminar 5 6.0 cr.
In this postdoctoral seminar course, relevant reading in the periodontal literature relating to specific topics are assigned and critically discussed.

DPER 9105 Periodontal Research 5 0.5 cr.
Course requires student to select a research topic, define a research question, do a literature search on the topic, organize a research project, carry out the project, collect and analyze the results, and write a publishable manuscript on the project.

DPER 9106 Periodontics Clinical Teaching 2A 1.0 cr.
Prereq: DPER 8206, DPER 8306
Postdoctoral periodontics students gain experience in instructing dental and hygiene students after receiving instruction in the basics of didactic and clinical teaching. (Part 1 of two-semester course)

DPER 9107 Periodontics Specialty Elective 3.0 cr.
This postdoctoral course will allow the resident to gain extra experience and to concentrate in an area of his/her choosing such as research, teaching, dental implants, periodontal plastic surgery etc.

DPER 9115 Advanced Diagnosis of Oral Lesions 0.3 cr.
This program in oral pathology is designed to prepare the student to recognize, analyze, and appreciate primary and secondary disease conditions of the oral and paraoral regions which may present in patients under his or her care and to respond in an appropriate manner when these conditions manifest.

Third Year, Fall Semester

DPER 9200 Periodontics Specialty Clinic 8 8.0 cr.
Prereq: DPER 7100, DPER 7200, DPER 7300, DPER 8100, DPER 8200, DPER 8300, DPER 9100
In this postdoctoral course, students receive experiences with all accepted methods of periodontal treatment, dental implantology, and periodontal plastic procedures.

DPER 9201 Periodontal Journal Club 3A 0.5 cr.
Prereq: DPER 7201, DPER 7301, DPER 8201, DPER 8301
This postdoctoral course encompasses a review of the latest dental and medical journals for the most recent information related to the art, science, and practice of periodontics. Students prepare abstracts to be and discussed at scheduled seminars. (Part 1 of two-semester course)

DPER 9202 Periodontics Treatment Planning 3A 1.0 cr.
Prereq: DPER 7202, DPER 7302, DPER 8202, DPER 8302
In this postdoctoral seminar course, Periodontic and GPR residents present a documentation database, diagnosis and treatment plans for patients treated communally in these two clinics. (Part 1 of two-semester course)
DPER 9203 Periodontal Literature Review Seminar 5  
Prereq: DPER 7203, DPER 7303, DPER 8203, DPER 8303  
4.0 cr.
In this postdoctoral seminar course, relevant readings in the periodontal literature relating to specific topics are assigned and critically discussed.

DPER 9204 Periodontal Case Presentations Seminar 3A  
Prereq: DPER 7204, DPER 7304, DPER 8204, DPER 8304  
2.0 cr.
In this postdoctoral course, residents prepare and present a complete documentation database, diagnosis/prognosis, treatment plan, treatment procedures, and evaluation of treatment results in formal case presentations simulating the oral examination for the American Board of Periodontology. (Part 1 of two-semester course)

DPER 9205 Periodontal Research 6  
Prereq: DPER 7305, DPER 8105, DPER 8205, DPER 8305, DPER 9105  
2.0 cr.
Course requires student to select a research topic, define a research question, do a literature search on the topic, organize a research project, carry out the project, collect and analyze the results, and write a publishable manuscript on the project.

DPER 9206 Periodontics Clinical Teaching 2B  
Prereq: DPER 8206, DPER 8306, DPER 9106  
6.0 cr.
Postdoctoral periodontics students gain experience in instructing dental and hygiene students after receiving instruction in the basics of didactic and clinical teaching. (Part 2 of two-semester course)

DPER 9209 Periodontics Specialty Elective  
This postdoctoral course will allow the resident to gain extra experience and concentrate in an area of his/her choosing such as research, teaching, dental implants, periodontal plastic surgery, etc.  
2.0 cr.

DPER 9212 Postgraduate Dental Implantology Seminar 3A  
Prereq: DPER 7112, DPER 7212, DPER 7312, DPER 8212, DPER 8312  
1.0 cr.
This lecture and seminar course, relevant readings in the dental literature relating to specific topics in dental implantology are assigned and critically discussed. A variety of cases are treatment planned by the residents. (Part 1 of two-semester course)

Third Year, Spring Semester

DPER 9300 Periodontics Specialty Clinic 9  
Prereq: DPER 7100, DPER 7200, DPER 7300, DPER 8100, DPER 8200, DPER 8300, DPER 9100, DPER 9200  
2.0 cr.
In this postdoctoral course, students receive experiences with all accepted methods of periodontal treatment, dental implantology, and periodontal plastic procedures.

DPER 9301 Periodontal Journal Club 3B  
Prereq: DPER 7201, DPER 7301, DPER 8201, DPER 8301, DPER 9201  
0.5 cr.
This postdoctoral course encompasses a review of the latest dental and medical journals for the most recent information related to the art, science, and practice of periodontics. Students prepare abstracts to be discussed at scheduled seminars. (Part 2 of two-semester course)

DPER 9302 Periodontics Treatment Planning 3B  
Prereq: DPER 7202, DPER 7302, DPER 8202, DPER 8302, DPER 9202  
0.5 cr.
In this postdoctoral seminar course, Periodontic and GPR residents present a documentation database, diagnosis and treatment plans for patients treated communally in these two clinics. (Part 2 of two-semester course)

DPER 9303 Periodontal Literature Review Seminar 6  
Prereq: DPER 7203, DPER 7303, DPER 8203, DPER 8303, DPER 9203  
2.0 cr.
In this postdoctoral seminar course, relevant readings in the periodontal literature relating to specific topics are assigned and critically discussed.

DPER 9304 Periodontal Case Presentations Seminar 3B  
Prereq: DPER 7204, DPER 7304, DPER 8204, DPER 8304, DPER 9204  
1.0 cr.
In this postdoctoral course, residents prepare and present a complete documentation database, diagnosis/prognosis, treatment plan, treatment procedures, and evaluation of treatment results in formal case presentations simulating the oral examination for the American Board of Periodontology. (Part 2 of two-semester course)

DPER 9305 Periodontal Research 7  
Prereq: DPER 7305, DPER 8105, DPER 8205, DPER 8305, DPER 9105, DPER 9205  
3.0 cr.
Course requires student to select a research topic, define a research question, do a literature search on the topic, organize a research project, carry out the project, collect and analyze the results, and write a publishable manuscript on the project.

DPER 9306 Periodontics Clinical Teaching 2C  
Prereq: DPER 8206, DPER 8306, DPER 9106, DPER 9206  
1.5 cr.
Postdoctoral periodontics students gain experience in instructing dental and hygiene students after receiving instruction in the basics of didactic and clinical teaching. (Part 3 of three-semester course)
DPER 9309 Periodontics Specialty Elective 3.0 cr.
This postdoctoral course will allow the resident to gain extra experience and to concentrate in an area of his/her choosing such as research, teaching, dental implants, periodontal plastic surgery, etc.

DPER 9312 Postgraduate Dental Implantology Seminar 3B 1.0 cr.
Prereq: DPER 7112, DPER 7212, DPER 7312, DPER 8212, DPER 8312, DPER 9212
This lecture and seminar course, relevant readings in the dental literature relating to specific topics in dental implantology are assigned and critically discussed. A variety of cases are treatment planned by the residents. (Part 2 of two-semester course)

MS DENTISTRY CURRICULUM
(The MS Dentistry curriculum is subject to change without notice.)

Fall Semester

DSGD 5105 Research Methodology & Biostatistics 2.0 cr.
This graduate course in dentistry is an in-depth study of scientific research methods, study design and organization, data gathering, and the biostatistical tools required to analyze the results of a study and carry out a scientific research project.

DSGD 5205 Research Methodology & Biostatistics 2 2.5 cr.
This graduate course in dentistry is an advanced in-depth study of scientific research methods, study design and organization, data gathering, and the biostatistical tools required to analyze the results of a study. In addition, this course requires the student to prepare a research proposal.

DSGD 5311 Scientific Writing and Evaluation 1.5 cr.
This graduate course in dentistry is an in-depth study of scientific writing to prepare the student to evaluate the literature as well as to prepare a scientific manuscript for publication.

DSGD 5331 Diagnosis and Treatment of Craniofacial Pain 1.5 cr.
This graduate course in dentistry studies the structure and function of the cranio-cervical region and stomatognathic system. Diagnosis and management of abnormal function will be emphasized relative to each specific specialty area.

DSGD 5341 Fundamentals of Teaching / Communication 0.7 cr.
This graduate course in dentistry prepares students to communicate effectively with patients and their families to enhance treatment planning dialogues, facilitate case presentation and acceptance, and encourage behavioral changes toward attaining and maintaining systemic and oral health.

DSGD 5344 Advanced Radiology and Radiographic Interpretation 1.5 cr.
This graduate course in dentistry studies oral and maxillofacial radiology includes lectures and case studies in radiation physics, radiation biology, radiation hygiene, and radiographic techniques. In addition, this course will provide information on advanced imaging modalities and interpretative skills.

DSGD 6114 Advanced Oral Biology 2.3 cr.
This graduate course in dentistry is an advanced study of clinical oral pathology, bone biology, and microbiological aspects of the oral disease processes and conditions.

DSGD 6115 Biomechanics, Bioengineering and Biomaterials 1.1 cr.
This graduate course in dentistry studies the biological aspects of the biocompatibility of synthetic and biologically altered materials with tissues and cells of the human body. This will include the study of treatment tools and procedures and their effect on the Dentoalveolar structures.

DSGD 6201 Ethics, Practice Management & Jurisprudence 2.5 cr.
This graduate course in dentistry is an in-depth study of ethics, practice management, and jurisprudence as it relates to clinical practice. The course includes advanced study and lecture in practice financial and management areas with specific experiences varying with the different specialty areas.

DSGD 6209 Advanced Head & Neck Anatomy 1.6 cr.
This graduate course in dentistry is an advanced study of head & neck anatomy that is relevant to the dental specialist. It includes both actual & radiographic anatomical identification.

ORTHODONTICS CERTIFICATE PROGRAM
(The Orthodontics Certificate curriculum is subject to change without notice.)

FIRST YEAR, Fall Semester

DSOR 5101 Orthodontics 101 – Boot Camp 4.3 cr.
This post-doctoral course is an intense review of the breadth and scope of orthodontics including growth and development and the different clinical orthodontic modalities.

DSOR 5102 Dentofacial Growth and Development 1 2.0 cr.
This post-doctoral course is an in-depth study of human growth and development that includes basic embryology of the head and neck, growth theories and facial and dental arch changes throughout human life.

DSOR 5208 Current Literature Review 2 1.3 cr.
Prereq: DSOR5108
Course is the study, analysis and discussion of journal articles and topics that are prominent in orthodontics within the previous year. Post-doctoral students critically review and analyze the articles to determine advances in the art and science of orthodontics.

FIRST YEAR, Summer Semester

DSOR 5211 Treatment in Preadolescent Children 1.5 cr.
This post-doctoral course is a study of the orthodontic and pediatric care of the preadolescent patient, to include preventative and Phase I patient care.

DSOR 5842 Research 2 0.8 cr.
Prereq: DSORS841
Course requires student to select a research topic, define a research question, do a literature search on the topic, organize a research project, carry out the project, collect and analyze the results, and write a publishable manuscript on the project.

DSOR 5932 Clinical Orthodontics 2 9.5 cr.
Prereq: DSORS931
This post-doctoral course involves the advanced treatment of orthodontic problems and patient care. Supervision is provided by educationally qualified orthodontists to provide high quality and efficient clinical patient care.

DSOR 5301 Head and Neck Anatomy 1.5 cr.
This post-doctoral course is an advanced study of head and neck anatomy as it relates to orthodontic patient care.

DSOR 5304 Biomechanics 3 1.5 cr.
Prereq: DSORS5104, DSORS5204
This post-doctoral course is an in-depth, advanced study of orthodontic biomechanical systems and their effect on the craniofacial and dental structures. Included in this course are the protocols required to treat both skeletal and dental malocclusions.

DSOR 5306 Dento/Craniofac Anomalie 0.7 cr.

DSOR 5307 Treatment Planning 3 2.0 cr.
Prereq: DSORS5107, DSOR 5207
This post-doctoral course is the case-based study of advanced orthodontic treatment planning. Post-doctoral students are required to present patient diagnoses and proposed treatment plans for faculty and student discussion, to include treatment modality presentations by students.

DSOR 5311 Scientific Writing and Evaluation 1.5 cr.
This post-doctoral course is an in-depth study of scientific writing to prepare the student to evaluate the literature as well as to prepare a scientific manuscript for publication.

DSOR 5321 Orthognathic Surgical Treatment 2.5 cr.
This post-doctoral course is a study of the orthognathic surgical options and treatment of patients, including distraction osteogenesis and other advances in surgical techniques.

DSOR 5843 Research 3 1.7 cr.
Prereq: DSORS841, DSOR5842
Course requires student to select a research topic, define a research question, do a literature search on the topic, organize a research project, carry out the project, collect and analyze the results, and write a publishable manuscript on the project.

DSOR 5933 Clinical Orthodontics 3 5.5 cr.
Prereq: DSORS5931, DSOR5932
This post-doctoral course involves the advanced treatment of orthodontic problems and patient care. Supervision is provided by educationally qualified orthodontists to provide high quality and efficient clinical patient care.

DSOR 6101 Implants in the Orthodontic Patient 1.0 cr.
This post-doctoral course is an in-depth study of the use of implants in patients both for restorative dentistry and as orthodontic anchorage.

DSOR 6107 Treatment Planning 4 4.0 cr.
Prereq: DSORS5107, DSOR5207, DSORS307
This post-doctoral course is the case-based study of advanced orthodontic treatment planning. Postdoctoral students are required to present patient diagnoses and proposed treatment plans for faculty and student discussion, to include treatment modality presentations by students.

<td>This post-doctoral course requires the student to teach basic orthodontic diagnostic and treatment techniques to the pre-doctoral dental student.</td>
<td>0.3 cr.</td>
</tr>
</tbody>
</table>
DSOR 7848 Research VIII  
0.6 cr.  
Postgraduate course study requiring student to select research topic, define research question, do literature search on the topic, organize research project, carry out project, collect and analyze the results and write a publishable manuscript on the project.

DSOR 7934 Clinical Orthodontic VIII  
4.7 cr.  
This postgraduate course involves the advanced treatment orthodontic problems and patient care. Supervision is provided by educationally qualified orthodontists to provide high quality and efficient clinical patient care.

THIRD YEAR, Summer Semester

DSOR 7107 Treatment Planning 6  
2.2 cr.  
Prereq: DSOR5107, DSOR5207, DSOR5307, DSOR6107, DSOR6207  
This post-doctoral course is the case-based study of advanced orthodontic treatment planning. Post-doctoral students are required to present patient diagnoses and proposed treatment plans for faculty and student discussion, to include treatment modality presentations by students.

DSOR 7112 Orthodontic Clinical Teaching 2  
0.9 cr.  
This post-doctoral course requires the student to teach basic orthodontic diagnostic and treatment techniques to the predoctoral dental student.

DSOR 7108 Current Literature Review 6  
0.7 cr.  
Prereq: DSOR5108, DSOR5208, DSOR 5308, DSOR6108, DSOR 6208  
Course is the study, analysis and discussion of journal articles and topics that are prominent in orthodontics within the previous year. Post-doctoral students critically review and analyze the articles to determine advances in the art and science of orthodontics.

DSOR 7846 Research 6  
1.7 cr.  
Prereq: DSOR5841, DSOR5842, DSOR5843, DSOR6844, DSOR6845  
Course requires student to select a research topic, define a research question, do a literature search on the topic, organize a research project, carry out the project, collect and analyze the results, and write a publishable manuscript on the project.

DSOR 7936 Clinical Orthodontics 6  
6.4 cr.  
Prereq: DSOR5931, DSOR5932, DSOR5933, DSOR6934, DSOR6935  
This post-doctoral course involves the advanced treatment of orthodontic problems and patient care. Supervision is provided by educationally qualified orthodontists to provide high quality and efficient clinical patient care.

DSOR 7938 Clinical Problems 1  
0.7 cr.  
Course is a case-based course to study clinical problems encountered in the practice of orthodontics by the orthodontic specialist. It requires the student to analyze and then present the records of patients who encountered less than ideal results during treatment.

THIRD YEAR, Fall Semester

DSOR 7207 Treatment Planning 7  
4.0 cr.  
Prereq: DSOR5107, DSOR5207, DSOR5307, DSOR6107, DSOR6207, DSOR7107  
This post-doctoral course is the case-based study of advanced orthodontic treatment planning. Post-doctoral students are required to present patient diagnoses and proposed treatment plans for faculty and student discussion, to include treatment modality presentations by students.

DSOR 7208 Current Literature Review 7  
1.0 cr.  
Prereq: DSOR5108, DSOR5208, DSOR 5308, DSOR6108, DSOR6208, DSOR 7108  
Course is the study, analysis and discussion of journal articles and topics that are prominent in orthodontics within the previous year. Post-doctoral students critically review and analyze the articles to determine advances in the art and science of orthodontics.

DSOR 7209 Orthodontic Predoctoral Laboratory Teaching 2  
0.3 cr.  
This post-doctoral course requires the student to teach basic orthodontic diagnostic and treatment techniques to the predoctoral dental student.

DSOR 7212 Orthodontic Clinical Teaching 3  
1.1 cr.  
This post-doctoral course requires the student to teach basic orthodontic diagnostic and treatment techniques to the predoctoral dental student.

DSOR 7300 Current Literature Review VIII 3  
0.5 cr.  
This postgraduate course in dentistry is an advanced course studying orthodontic literature, concentrating on evidence based orthodontic treatment.
DSOR 7847 Research 7  1.7 cr.
Prereq: DSOR5841, DSOR5842, DSOR5843, DSOR6844, DSOR6845, DSOR7846
Course requires student to select a research topic, define a research question, do a literature search on the
topic, organize a research project, carry out the project, collect and analyze the results, and write a publishable
manuscript on the project.

DSOR 7937 Clinical Orthodontics 7  9.9 cr.
Prereq: DSOR5931, DSOR5932, DSOR5933, DSOR6934, DSOR6935, DSOR 7936
This post-doctoral course involves the advanced treatment of orthodontic problems and patient care.
Supervision is provided by educationally qualified orthodontists to provide high quality and efficient clinical patient care.

DSOR 7939 Clinical Problems 2  1.0 cr.
Course is a case-based course to study clinical problems encountered in the practice of orthodontics by the
orthodontic specialist. It requires the student to analyze and then present the records of patients who encountered less
than ideal results during treatment.

DSOR 7940 Orthodontic Retention I  3.0 cr.
Retention techniques, clinical studies in retention, and study of post-treatment changes in orthodontic patients. Prereq:
Successfully completing Years 1 and 2 of the postgraduate program in Orthodontics and Dentofacial Orthopedics.

DSOR 7941 Orthodontic Retention II  2.0 cr.
Retention techniques, clinical studies in retention, and study of post-treatment changes in orthodontic patients. Prereq:
Successfully completing years 1 and 2 of the postgraduate program in Orthodontics and Dentofacial Orthopedics and
successful completion of the DSOR 7940.
