</tr>
<tr>
<td></td>
<td>Structure &amp; Function in the Human Nervous System.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Basic neuroanatomy &amp; neural systems with workshop</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>focus employing facilitated discussions &amp;</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>problem-oriented cases.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Laboratory sessions will employ brain specimens,</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>models &amp; image sets. Team-based projects are in-depth</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>exploration of topics with development of</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>collaborative presentations.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>ANAT 6321</td>
<td><strong>Human Histology</strong></td>
<td>4 cr.</td>
<td>(Fall, Spring)</td>
<td>Prereq: Restricted to ANAT students only.</td>
</tr>
<tr>
<td></td>
<td>Histology is the study of the tissues. By exploring</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>the human structure, function and organization at</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>the histological level, students will gain</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>important pattern recognition skills to integrate</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>microscopic knowledge with macroscopic gross</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>anatomy and other foundational anatomical sciences.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>(Will replace ANAT 6320)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>ANAT 6330</td>
<td><strong>Human Embryology</strong></td>
<td>2 cr.</td>
<td>(Fall, Spring)</td>
<td>Prereq: Restricted to ANAT students only.</td>
</tr>
<tr>
<td></td>
<td>This graduate level, introductory human embryology</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>course will emphasize developmental aspects of adult</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>anatomy and congenital malformations. Educational</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>value of three-or-four-dimensional models and other</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>ancillary learning resources for human embryology</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>will also be explored.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>ANAT 6410</td>
<td><strong>Strategies for Teaching in a Professional Program</strong></td>
<td>2 cr.</td>
<td>(Spring)</td>
<td>Course is crosslisted with SECE 5800, School of Education &amp; Human Development</td>
</tr>
<tr>
<td></td>
<td>This course is designed for graduates in health</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>education programs. Topics include conceptual change,</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>developing content-based instructional/pedagogical</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>skills, frameworks for making curricular decisions,</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>

</tbody>
</table>
This course is offered in a variety of technical and thematic areas in modern human anatomy. The specific topics vary from year to year. Note: The course includes lectures, discussions and workshops.

**ANAT 6840 Independent Study**
1.0-6.0 cr.
(Fall, Spring, Summer)
This course enables the student to pursue an investigation in a modern human anatomical field of choice toward completion of a capstone project with relatively minor supervision from faculty advisors.

**ANAT 6910 Teaching Practicum**
1.0-3.0 cr.
(Fall, Spring, Summer) Prereq: Course restricted to ANAT majors
Hands-on teaching course in which students apply pedagogical theories to practice in a professional program as a teaching assistant, lecturer or other instructional position.

**ANAT 6950 MSMHA Capstone Project**
1.0-8.0 cr.
(Fall, Spring, Summer) Prerequisite: Must be ANAT degree-seeking student.
The capstone project is a scholarly and/or research-based pursuit of knowledge and content development in the area of anatomical sciences, modern imaging and modeling technologies, and educational science completed as part of the MS in Modern Human Anatomy.

**CANCER BIOLOGY**

**CANB 7600 Cancer Biology**
3.0 cr.
(Fall, Spring) Prereqs: IDPT 7806, IDPT 7807, IDPT 7808, IDPT 7809 (BIOM Sci Core Courses)
This course integrates the examination of cancer at molecular, cellular, tissue and organismal levels. Course open to all graduate students from any program with an interest in mechanisms and models of cancer and will give broad appreciation for current issues/problems.

**CANB 7601 Pathobiology of Cancer Mini-Course**
1.0 cr.
(Spring) Prereq: IDPT 7806, IDPT 7807, IDPT 7808, IDPT 7809
Provide understanding of clinical issues associated with human cancer. Contains didactic and lab components. The latter will focus on pathology of human tumors at macroscopic/microscopic levels. Students will gain understanding of cancer diagnosis/epidemiology/treatment through student of specific tumor types.

**CANB 7610 Research Seminars and Journal Club**
1.0 cr.
(Fall, Spring) Current research topics in experimental pathology, virology, and tumor biology. Graduate students and faculty presentations.

**CANB 7611 Histophysiology**
3.0 cr.
(Spring) Discussions of cell interactions, tissue physiology, and renewal based upon the histologic cell types and structures present. Where pertinent, pathologic alterations will be introduced to facilitate identification of the important normal functions/structures.

**CANB 7640 Bioinformatics**
2.0 cr.
(Fall, Spring) Prerequisites: IDPT 7806, IDPT 7807, IDPT 7808, IDPT 7809; Corequisite: BIOS 6606
This course introduces basic concepts of bioinformatics needed to perform large-scale genomic data mining. A computer workshop will provide students with the relevant and minimal skills to analyze, access and visualize high-throughput data using open source programs and public databases.

**CANB 7650 Research in Cancer Biology**
1.0-10.0 cr.
(Fall, Spring, Summer) Prereq: Consent of instructor.
Research work in cancer biology.

**CANB 7660 Advanced Topics: Cancer Biology**
1.0 cr.
(Fall, Spring) The specific topics covered in this course vary from year to year. For Fall 2011 the topic will be "Cancer cells and their environment: how the extracellular milieu influences tumor progression" offered by Dr. Schedin.

**CANB 7670 Hypothesis Development & Experimental Design**
2.0 cr.
(Fall, Spring) Prereq: CANB 7600, IDPT 7806, IDPT 7807, IDPT 7808, IDPT 7809
Students will discuss recent research papers and develop new hypotheses that extend the findings in the papers. Research proposals to test the hypothesis will be written and an oral defense of the proposal will be performed.

**CANB 8990 Doctoral Thesis**
1.0-10.0 cr.
(Fall, Spring, Summer) Prereq: Consent of instructor.
Doctoral thesis work in cancer biology.

**CANDIDATE FOR DEGREE**

**CAND 6940**  Candidate for Degree  
(Fall, Spring, Summer) Prereq: Consent of instructor.  

1.0 cr.

**CLINICAL SCIENCE**

**CLSC 6060**  Systems Analysis and Design  
(Fall, Spring, Summer) Crosslisted: ISMG 6040.  
Collaborative offering with Denver Campus, emphasizing information requirements analysis, logical system specification, detailed system design. Topics include structured system development methodologies, prototyping, file design, systems architecture, systems testing, software design strategies. Students use case tool to develop system specifications.  

3.0 cr.

**CLSC 6080**  Database Management Systems  
(Fall, Spring, Summer) Crosslisted: ISMG 6080.  
Offered as a collaborative offering with the Denver Campus, this course focuses on the development and management of database systems to support business operations. Important subjects include semantic data modeling, normalization, SQL, fourth generation languages, and client-server database applications.  

3.0 cr.

**CLSC 6120**  Data Communications  
(Fall, Spring, Summer) Crosslisted: ISMG 6120 Prereq: Knowledge of computer programming.  
Offered as collaborative offering with Denver Campus. Course introduces the basic concepts of data transmission, principles governing the design and administration of both wide and local area networks, and technical issues pertaining to client server computing and open system interconnection.  

3.0 cr.

**CLSC 6210**  Research Seminars in Clinical Science  
(Fall, Spring, Summer)  
This course provides an overview of the types of clinical translational studies being conducted by senior CLSC doctoral students. The interactive seminar series structure allows for interdisciplinary scientific dialogue among students at various stages of training, mentors and faculty.  

1.0 cr.

**CLSC 6211**  Immersion in Community Engagement  
(Summer) Restrictions: Students need to contact the CLSC program prior to registering.  
This course focuses on community-based participatory research, community engagement and understanding health disparities through a community immersion experience.  

3.0 cr.

**CLSC 6251**  Assistive Technology: Advanced Practices in AT Assessment  
(Fall, Spring, Summer)  
Students will learn to use family-centered, trans-disciplinary methods of assistive technology assessment for individuals with low-incidence disabilities. Observations, videotaped learning activities, and supervised assessment sessions will facilitate understanding of best practice in this field.  

3.0 cr.

**CLSC 6260**  Conducting Clinical Trials for Investigators  
(Summer)  
Course is for investigators conducting clinical trials. Course covers good clinical practices/regulations that surround setting up and running clinical trials. Clinical studies and popular press articles highlighting what can go wrong in clinical trials will be reviewed and discussed.  

2.0 cr.

**CLSC 6261**  Assistive Technology: Implementation for Low Incidence Disabilities  
(Fall, Summer)  
This course provides an overview of low incidence populations (including intellectual, hearing, and vision impairments), relevant research, and implementation strategies in early childhood and classroom settings. Emphasis is on implementation techniques, and working with trans-disciplinary teams, supporting agencies, and families.  

3.0 cr.

**CLSC 6267**  Clinical Appraisal Seminars in Clinical Science  
(Fall)  
This course provides an overview of the approaches for critically appraising common study designs published in the clinical and translational sciences literature, as well as other sources of information.  

1.0 cr.

**CLSC 6270**  Assistive Technology: Advanced Fieldwork Experience in AT  
(Fall, Spring, Summer)  
Students participate in fieldwork experiences offering individually-tailored opportunities to engage in AT assessments, implementation of AT in various settings, family-centered Individual Educational Planning meetings, report-writing, outcomes-measurement, data-collection, practice, research-based methodologies. Peer-reviewed submission must be coordinated before grade assigned for course.  

2.0 cr.

**CLSC 6281**  Assistive Technology: Engineering and Biotechnology: Principles & Emerging Technologies  

3.0 cr.
Course brings together engineers, AT students in other health-care related areas. The students develop an understanding of engineering principles, technical design process, emerging technologies relevant to assistive technology in the context of support for children with low-incidence disabilities.

**CLSC 6300 Scientific Grant Review Process: CCTSI Proposals MS**  
1.0 cr.  
(Fall, Spring) Prereq: BIOS 6601, BIOS 6602 (or BIOS 6611, BIOS 6612) & CLSC 7500.  
Students will understand and participate in the process of scientific review of human subject research protocols submitted to the University of Colorado Denver Clinical Translational Research Centers at University Hospital and The Children’s Hospital.

**CLSC 6550 Applications of Biostatistics to Clinical Research Questions**  
1.0 cr.  
(Fall, Spring)  
Introduction to allow clinician-scientists to be critical consumers of medical literature by improving their ability to discuss statistical issues about their own research and research of others. Familiarity will be gained with commonly used statistical methods and statistical terms.

**CLSC 6590 Navigating the Clinical Research Regulatory Maze**  
1.0 cr.  
(Fall, Spring)  
This is a seminar series covering regulatory requirements and best practices related to FDA audits, billing, collaborative/team research, and distinguishing research from quality improvement projects. Prerequisites: For students with no clinical research experience, it is recommended they take “Getting Started: your introduction to Clinical Research” a 3 hr. lecture as one of their optional lectures, preferably before the course starts or within first 2 months of the course.

**CLSC 6608 Statistics for the Basic Sciences – CLSC Supplement**  
1.0 cr.  
(Spring) Coreq: CLSC 6606 (BIOS 6606) Restrictions: Enrollment in CLSC graduate program or permission of the instructor.  
This course provides an overview of epidemiology, logistic regression, and survival analysis, techniques that apply to many areas of clinical research.

**CLSC 6650 Guided Research Tutorial - Masters**  
1.0-3.0 cr.  
(Fall, Spring, Summer)  
An independent study course developed by the student and the appropriate faculty member based on the area of study. Students meet regularly with the selected course instructor, the student and course instructor will develop a course plan prior to registration.

**CLSC 6653 Key Concepts in Neurodevelopmental Disabilities I**  
2.0 cr.  
(Spring, Fall) Prereq: A degree in health care profession or related field or instructor consent.  
Course represents part one of two-part interdisciplinary course series focused on systems, options for diagnosis/assessment and alternatives for service provision related to children/youth/young adults with neurodevelopmental and related disabilities and their families to address this population’s special health care needs.

**CLSC 6654 Key Concepts in Neurodevelopmental Disabilities II**  
2.0 cr.  
(Fall, Spring, Summer) Prereq: A degree in health care profession or related field or instructor consent, and completion of CLSC 6653.  
This course represents part two of a two-part interdisciplinary course series focused on service provision, intervention strategies and service provision related to children/youth/young adults with neurodevelopmental and related disabilities and their families to address this population’s special health care needs.

**CLSC 6657 Cultural Factors in Healthcare**  
1.0 cr.  
(Fall, Spring, Summer) Prereq: A degree in health care profession or related field or instructor consent.  
Online course will introduce the subject of cultural/social determinants of maternal and child health in the present society, including worldviews on health perspectives (wellness versus illness), and address the impact of emerging demographic changes on systems of care.

**CLSC 6658 Interdisc. Approach to Promoting Early Parent Child Relationships- Part 1 Theory**  
2.0 cr.  
(Fall) Prereq: A degree in health care profession or related field or instructor consent.  
Part one of a two-part course series that will examine the theory and research relevant to the assessment of early parent-child relationships as well as the clinical application for interventions across disciplines that are intended to promote/improve child health outcomes.

**CLSC 6659 Interdisciplinary Approach to Promoting Early Parent Child Relationships – Part II: Measurement**  
3.0 cr.  
(Spring) Prereq: A degree in health care profession or related field or instructor consent. Completion of CLSC 6658.  
Part two of a two-part course that will examine research relevant to assessment of early parent/child relationships, identify intervention strategies by analyzing observational findings, as well as evaluate effectiveness of interventions across disciplines intended to promote/improve child health outcomes.

**CLSC 6660 Team/Consult/Leadership I**  
2.0 cr.  
(Fall, Spring, Summer)
CLSC 6661   Leadership Dialogues I
(Fall, Spring, Summer) Prereq: A degree in health care profession or related field or instructor consent.
This interdisciplinary leadership course focuses on leadership strategies needed for providing family-centered, culturally competent, community-based services for children with special needs and their families. 2.0 cr.

CLSC 6662   Leadership Dialogues II
(Fall, Spring) Prereq: A degree in health care profession or related field or instructor consent. CLSC 6661.
This interdisciplinary leadership course focuses becoming change agents to better provide family-centered, culturally competent, community-based services for children with special needs and their families. 2.0 cr.

CLSC 6663   Evidence-based Interventions for Youth with Autism and Other Neurodevelopmental Disorders
(Fall, Spring, Summer) Prereq: Degree in health care profession or related field or consent of instructor.
This interdisciplinary course reviews evidence-based practices in intervention for children with autism and other neurodevelopmental disorders, presented through lectures, critical readings of the literature, case discussions and case presentations. 3.0 cr.

CLSC 6664   Leadership Dialogues III
(Fall) Prereq: Degree in health care profession or related field or consent of instructor. Restrictions: Nursing only.
This interdisciplinary leadership course focuses on leadership strategies needed for providing family-centered, culturally competent, community-based services for children with special needs and their families. (Nursing only) 1.0 cr.

CLSC 6665   Leadership Dialogues IV
(Spring) Prereq: Degree in health care profession or related field or consent of instructor and CLSC 6664. (Nursing only)
Leadership Dialogues IV builds upon skills addressed in Leadership Dialogues III with the addition of content that integrates critical and systems thinking and ethical decision making with the leadership and team concepts and skills developed in LD III. (Nursing only) 1.0 cr.

CLSC 6666   Transdisciplinary Model of Early Intervention Service Delivery
(Fall, Spring, Summer). Prereq: Degree in health care profession or related field or consent of instructor. Restrictions: Course participants accepted by course instructor approval only.
This course provides instruction about the ENRICH model of community-based, family-driven, trans-disciplinary service delivery and will target service coordination/collaboration throughout Part C supports and services, best practice implementation of intervention strategies, and techniques for transferring out of Part C. 3.0 cr.

CLSC 6668   Screening/Assessment for Children/Youth with Autism & Neurodevelopmental Disabilities
(Fall, Spring, Summer). Prereq: Degree in health care profession or related field or consent of instructor.
This interdisciplinary course presents best practices in screening/assessment for autism, focusing on: identification of symptoms of autism; differentiation of autism from other disorders; recognition of symptoms; examination of culture on clinical presentation; and approaches to share observations. 3.0 cr.

CLSC 6672   Community Engagement and Participatory Research: A Seminar Series
(Fall, Spring).
Course provides overview of principles of and types of community engagement and community-based participatory research projects being completed across the campus and the region. The course covers methodological/theoretical constructs along with the practice of community-based participatory research/engagement through interactive seminars. 1.0 cr.

CLSC 6699   Masters Research Project: Publishable Paper
(Fall, Spring, Summer). Prereq: Consent of program. BIOS 6601 and 6602 OR BIOS 6611 and BIOS 6612, CLSC 7150, EPID 6630.
During course students working with his/her research mentor and research project committee to plan, execute, write Final Research Project in form of a publishable paper. In addition, students prepare for Final Research Project Examination. This is a capstone course. 1.0-6.0 cr.

CLSC 6800   Introduction to Health Information Technology
(Spring)
Course intended as overview to the dynamic environment of healthcare informatics. Goal of course is to prepare healthcare professionals to better utilize/manager the emerging communication technologies. A brief introduction to e-health, telehealth, electronic medical records, telecommunications, and bio-informatics is provided. 3.0 cr.

CLSC 6820   Fundamentals of Health Information Technology Management
(Fall). Crosslisted: HLTH 6072.
This course will provide an introduction to management of information technology in healthcare. A description of information processing, the origin, content and evolution of healthcare information systems and the methodologies deployed to acquire and manage information requirements will be discussed. 3.0 cr.

CLSC 6830   Practicum in Developmental Disabilities
(Spring, Summer, Fall) Prereq: Consent of instructor. 1.0-4.0 cr.
Practicum in developmental disabilities individually designed to give students and post-graduates observational experiences in clinical, teaching, or research service settings and systems for persons with developmental disabilities of all ages.

CLSC 6831 Practicum in Developmental Disabilities II 3.0 cr.
(Spring) Prereq: Instructor consent and CLSC 6830.
Practicum in developmental disabilities individually designed to give students and post graduates hands-on experiences in clinical, teaching, or research service settings and systems for persons with developmental disabilities of all ages.

CLSC 6950 Masters Research Project: Thesis 1.0-6.0 cr.
(Fall, Spring, Summer) Prereq: Consent of program. BIOS 6601, BIOS 6602, CLSC 7150, EPID 6630. During this course students plan, execute and write the Final Research Project in the form of a Masters thesis. In addition, students will prepare for the Final Research Project Examination. This is a capstone course.

CLSC 7101 Grant Writing I 1.0 cr.
(Spring) Prereq: BIOS 6601 and EPID 6630. Restrictions: CLSC students unless written approval of Course Director
The purpose of this course is to develop and improve your skills in writing successful grant applications and participating in the critique and review process of grants.

CLSC 7102 Grant Writing II 1.0 cr.
(Spring) Prereq: BIOS 6601, EPID 6630, CLSC 7101. Restrictions: CLSC students, unless written approval of Course Director.
The purpose of this course is to develop and improve your skills in writing successful grant applications and participating in the critique and review process of grants.

CLSC 7150 Ethics and Responsible Conduct of Research 1.0 cr.
(Fall, Spring, Summer)
Course provides overview of the field of ethics in clinical research. Topics include historical background, current regulations, IRB requirements on human subjects protection issues. Students will learn how to develop approaches to conduct ethical human subjects research in an optimal manner.

CLSC 7151 Lectures in Ethics and Responsible Conduct of Research 1.0 cr.
(Fall, Spring, Summer)
Course provides overview of the ethics field in clinical research. Topics include historical background, current regulations, IRB requirements on human subjects protection issues. This class is designed for non-CLSC students.

CLSC 7202 Clinical Outcomes and Applications 3.0 cr.
(Fall)
This course focuses on research methodologies in clinical care, costs, health systems, policy, and health outcomes, as well as an overview of major issues in clinical outcomes research. Students are provided with both theory and application through case studies.

CLSC 7300 Scientific Grant Review Process: CCTSI Proposals 1.0 cr.
(Fall, Spring) Prereq: BIOS 6601 BIOS 6602 or BIOS 6611 and BIOS 6612.
Students will understand and participate in the process of scientific review of human subject research protocols submitted to the University of Colorado Denver Clinical Translational Research Centers at University Hospital and the Children’s Hospital.

CLSC 7500 Practical Application of Molecular and Cell Biology Techniques for the Clinical Investigator 3.0 cr.
(Summer)
Designed to teach clinical investigators basic molecular and cellular biology techniques. Format will be hands-on with lectures designed to illustrate significance and clinical application of techniques. Weekly special topics lectures will cover cutting-edge technologies and their application.

CLSC 7650 Guided Research Tutorial – Doctoral 1.0-3.0 cr.
(Fall, Spring, Summer) Prereq: Consent of program, approved course plan. This course is closed registration.
This is an independent study course developed by student and appropriate faculty member based on the area of study. Students meet regularly with selected course instructor. Student and course instructor will develop course plan prior to registration of the course.

CLSC 7653 Dissemination and Implementation Research in Health 2 cr.
(Fall) Prereq: EPID 6630 or Course Director permission
Introduces dissemination and implementation (D&I) research and practice in the context of health (i.e., translational research in health).

CLSC 8990 Doctoral Thesis 1.0-10.0 cr.
(Fall, Spring, Summer) Prerequisite: Program consent. BIOS 6601 or BIOS 6611, BIOS 6602 OR BIOS 6680 and HSMP 6617, CLSC 7150, EPID 6630, BIOS 6648 or EPID 6626 or HSMP 6670. Restrictions: Only CLSC PhD students or collaborative CLSC and CSPH Health Services Research Students.
This course involves the student working with his/her research mentor and research project committee to develop, design and execute a clinical science doctoral study as well as to write up the project as a thesis.

### COMPUTATIONAL BIOSCIENCE

<table>
<thead>

</thead>
<tbody>
<tr>
<td>CPBS 7001</td>
<td>Computer Science for Biologists (Spring)</td>
<td>5.0 cr.</td>
</tr>
<tr>
<td></td>
<td>Introduction to fundamental concepts of computer science, the central ideas of computing, and practices of computational thinking; designed for Basic Science PhD programs. It will engage students in activities that allow them to competently apply CS tools to their field.</td>
<td></td>
</tr>
<tr>
<td>CPBS 7605</td>
<td>Ethics in Bioinformatics (Fall, Spring)</td>
<td>1.0 cr.</td>
</tr>
<tr>
<td></td>
<td>Discussions of professional conduct, social implications of research and questions raised by biomedical research, with an emphasis on topics relevant to computational biologists. Active student participation is required.</td>
<td></td>
</tr>
<tr>
<td>CPBS 7606</td>
<td>Statistics for the Basic Sciences (Fall, Spring)</td>
<td>3.0 cr.</td>
</tr>
<tr>
<td></td>
<td>Cross-listed: BIOS 6606. This course provides an overview of fundamental concepts in statistics such as hypothesis testing and estimation and it provides an overview of statistical methods (for example, regression and analysis of variance) that apply to many areas of science.</td>
<td></td>
</tr>
<tr>
<td>CPBS 7620</td>
<td>Advanced Genome Analysis (Spring)</td>
<td>2.0 cr.</td>
</tr>
<tr>
<td></td>
<td>Crosslisted Course: HMGHP 7620, STTB 7620, and MICB 7620. Introduction to genomics emphasizing gaining familiarity with: analysis, utilization of genomic data. Topics: sequencing, mapping genomes, transcriptomics, human genome, evolution, genomic disorders, bioinformatics, statistics, population variation, epigenomics, proteomics, metagenomics, microbiome analysis, functional genomics, ethics</td>
<td></td>
</tr>
<tr>
<td>CPBS 7630</td>
<td>Computational Methods for Data Challenges in Biomed (Fall)</td>
<td>3.0 cr.</td>
</tr>
<tr>
<td></td>
<td>Prereq: CPBS 7711 &amp; CPBS 7712. Covers three computational data modules: Bioinformatics, Clinical Informatics, and Public Health Informatics. Cases are from three biomedical big data initiatives; the Grand Opportunity Exome Sequencing Project (GO-ESP), The Cancer Genome Atlas (TCGA), and Library of Integrated Network-Based Cellular Signature (LINCS)</td>
<td></td>
</tr>
<tr>
<td>CPBS 7640</td>
<td>Bioinformatics in Linguistics (Spring)</td>
<td>3.0 cr.</td>
</tr>
<tr>
<td></td>
<td>Prereq: CPBS 7711; coreq: CPBS 7712. This course will be structured around understanding problems, understanding algorithms, and working through solutions from bioinformatics, computational biology, natural language processing, and linguistics.</td>
<td></td>
</tr>
<tr>
<td>CPBS 7650</td>
<td>Research in Computational Bioscience (Fall, Spring, Summer)</td>
<td>1.0 cr.</td>
</tr>
<tr>
<td></td>
<td>Prereq: Consent of Instructor. Research work in Computational Bioscience.</td>
<td></td>
</tr>
<tr>
<td>CPBS 7655</td>
<td>Statistical Methods in Genetic Association Studies (Fall) Cross-listed: BIOS 6655. Prereq: BIOS 6612 or permission of instructor.</td>
<td>3.0 cr.</td>
</tr>
<tr>
<td></td>
<td>This course is designed to give an introduction to statistical methods in genetic association studies. Topics include an introduction to population genetics topics relevant to genetic association studies, design strategies and analysis methods for case-control and family data.</td>
<td></td>
</tr>
<tr>
<td>CPBS 7659</td>
<td>Statistical Methods in Genomics (Fall)</td>
<td>2.0 cr.</td>
</tr>
<tr>
<td></td>
<td>Prereq: BIOS 6611 or equivalent graduate level statistics course with consent of instructor. Crosslisted Course: BIOS 6659 (sponsoring department) / BIOS 7659. This course will give an introduction to statistical methods for analyzing molecular sequences and genomic data. Topics include hidden Markov models for sequence alignment, molecular evolution and gene expression data analysis.</td>
<td></td>
</tr>
<tr>
<td>CPBS 7660</td>
<td>Analysis of Genomics Data Using R and Bioconductor (Fall, Spring, Summer) Pre/Coreq: BIOS 6602 or 6612, or consent of instructor.</td>
<td>2.0 cr.</td>
</tr>
<tr>
<td></td>
<td>This course provides students with hands on experience in solving real life biological problems using the statistical software R and Bioconductor. Students will work and communicate with participating researchers and clinicians on their case studies of genomics data.</td>
<td></td>
</tr>
<tr>
<td>CPBS 7711</td>
<td>Methods and Tools in Biomedical Informatics (Fall)</td>
<td>4.0 cr.</td>
</tr>
<tr>
<td></td>
<td>Prereq: Permission of instructor. Crosslisted: PHCL 7611 (non-sponsor) An introduction to the theory and practice of bioinformatics and computational biology. Topics include: the analysis of macromolecular sequences, structures, gene expression arrays, proteomics, and management of the biological literature.</td>
<td></td>
</tr>
<tr>
<td>CPBS 7712</td>
<td>Research Methods in Biomedical Informatics (Spring)</td>
<td>4.0 cr.</td>
</tr>
<tr>
<td></td>

<td></td>
</tr>
</tbody>
</table>
The CPBS faculty members will present lectures on the research currently being conducted in their laboratories. Students will plan, execute and report on their own research project. This course is beginning transition from well-educated students to independent researchers.

**CPBS 7785  Independent Study in Computational Bioscience** 1-3 cr.
(Spring, Summer, Fall) Prereq: Permission of Instructor.
This course is listed for the benefit of the advanced student who desires to pursue one or more topics in considerable depth. Supervision by a full-time faculty member is necessary.

**CPBS 7791  Readings in Computational Bioscience** 1.0 cr.
(Spring, Summer, Fall) Prereq: Permission of instructor.
A seminar style course in which students read and present recent publications from the primary computational bioscience literature.

**CPBS 7792  Special Topics in Computational Bioscience** 1-3 cr.
(Spring, Summer, Fall) Prereq: Permission of Instructor.
Topic varies by semester. Designed to give students a chance to evaluate critically some practical or theoretical problem under faculty supervision and to present results of their thinking to fellow students and instructors for critical evaluation.

**CPBS 8990  Doctoral Thesis** 1-10 cr.
(Spring, Summer, Fall) Prereq: Permission of instructor.
Doctoral thesis work in Computational Bioscience.

### CELL BIOLOGY, STEM CELLS & DEVELOPMENT

**CSDV 7000  Cells, Stem Cells, and Development: Advanced Topics Discussion** 1.0 cr.
(Fall, Spring) Restrictions: Students in the CSD program only, 2nd year and beyond.
This course is a student-led paper discussion focusing on advanced topics pertaining to cell biology, stem cells, and developmental biology. Students will select, present, and discuss primary articles on diverse topics within these fields.

**CSDV 7605  Stem Cells and Development: An Integrated Approach** 4.0 cr.
(Spring) Prereq: IDPT 7806, 7807, 7808, 7809 (BIOM Science Core Courses).
Integrative introductory course, incorporating related fields of Cell Biology/Developmental Biology/Stem Cells/Regenerative Medicine. Through lectures, discussions of current literature, student presentations; enrollees will gain a sophisticated understanding of basic cell biological concepts/experimental approaches underlying our current understanding of developmental/stem cell biology.

**CSDV 7650  Research: CSDV** 1-5 cr.
(Fall, Spring, Summer) Prereq: Consent of Instructor
Research work in Cell Biology, Stem Cells and Development.

**CSDV 7670  Advanced Topics: CSDV** 1 cr.
(Fall, Spring, Summer) Prereq: IDPT 7806, 7807, 7808, 7809.

**CSDV 7850  Independent Study: CSDV** 1-5 cr.
(Fall, Spring, Summer) Prereq: IDPT 7806, 7807, 7808, 7809 (BIOM Science Core Courses), and CSDV 7605
Independent Study is to allow students to take professional school course for credit or to gain a defined expertise with faculty mentor other than thesis advisor. Consent of faculty member offering the independent study and Program Director required.

**CSDV 8990  Doctoral Thesis** 1-10 cr.
(Fall, Spring, Summer) Prereq: Consent of the instructor
Doctoral Thesis work in Cell Biology, Stem Cells and Development.

### GENETIC COUNSELING

**GENC 6101  Psychosocial Aspects of Genetic Counseling I** 2.0 cr.
(Fall) Coreqs: GENC 6105, GENC 6110. Restrictions: Matriculated student in Genetic Counseling M.S. Program
This is the first course in a two-semester sequence addressing basic psychosocial and counseling theories, approaches, and resources necessary for the provision of genetic counseling to clients and their families in prenatal, pediatric and adult clinical settings.

**GENC 6102  Psychosocial Aspects of Genetic Counseling II** 2 cr.
(Spring) Prereq: GENC 6101 Coreqs: GENC 6105, GENC 6110. Restrictions: Matriculated student in Genetic Counseling M.S. Program
This is the second course in a two-semester sequence addressing basic psychosocial and counseling theories, approaches, and resources necessary for the provision of genetic counseling to clients and their families in prenatal, pediatric and adult clinical settings.

**GENC 6105  Basic Interviewing Skills  **  
1.0 cr.  
(Fall) Coreqs: GENC 6101, GENC 6110. Restrictions: Matriculation as genetic counseling M.S. student.  
This course covers fundamental theories and principles of effective patient/client interviewing in genetic counseling practice. Lectures are combined with hands-on role plays and interviews so that students may gain applied experience and receive feedback to foster skills development throughout course.

**GENC 6110  Topics in Medical Genetics I  **  
3.0 cr.  
(Fall) Course Restrictions: Matriculated student in Genetic Counseling M.S. Program.  
First course in a two-course sequence regarding principles of clinical genetics and genetic counseling, and development of clinical skills used in various medical genetics settings. Fall semester focuses on principles important in pediatric and general genetics settings.

**GENC 6111  Topics in Medical Genetics II  **  
2.0 cr.  
(Spring) Prereq: GENC 6110. Restrictions: Matriculated student in Genetic Counseling M.S. Program  
Second course in two-course sequence regarding principles of clinical genetics and genetic counseling used in various medical genetics settings, and development of clinical skills. Spring semester focuses on prenatal and adult genetics clinic settings.

**GENC 6120  Clinical Cytogenetics and Molecular Genetics  **  
3.0 cr.  
(Fall) Coreq: GENC 6121 Laboratory in Clinical Cytogenetics & Molecular Genetics. Restrictions: Matriculation into M.S. Genetic Counseling Program or Permission of Instructors.  
This course provides integrated instruction regarding human cytogenetic and molecular genetic principles, techniques, and diagnostic testing approaches used in clinical evaluation and risk assessment for genetic disorders/predispositions in prenatal and postnatal patient populations.

**GENC 6121  Laboratory in Clinical Cytogenetics and Molecular Genetics  **  
2.0 cr.  
(Fall) Coreq: GENC 6120 Clinical Cytogenetics & Molecular Genetics. Restrictions: Matriculation into M.S. Genetic Counseling program or Permission of Instructors.  
Course provides introduction to specific methodologies and interpretation of studies used in diagnostic cytogenetics and molecular genetics laboratories. Principles discussed in the co-requisite clinical cytogenetics and molecular genetics course will be applied through demonstrations, hands-on experiments, discussion of illustrative cases.

**GENC 6122  Seminar in Clinical Cytogenetics and Molecular Genetics  **  
1.0 cr.  
(Spring) Prereq: GENC 6120, GENC 6121. Restrictions: Matriculation into M.S. Genetic counseling Program or Permission of Instructors.  
Course requires students to apply theories/principles of cytogenetics and molecular genetics to analysis of cases that present in daily operations of diagnostic laboratories and formal critique of current research literature. Additionally, students present formal seminar integrating cytogenetic/ molecular genetic principles.

**GENC 6125  Embryogenetics  **  
1.0 cr.  
(Fall) Prereq: Matriculated student in M.S. Genetic Counseling program (GENC)  
Providing practical knowledge for genetic counseling this course on human embryology is focused on major developmental stages and organ systems with an emphasis on molecular genetic pathways and associated syndromes that arise due to their disruption.

**GENC 6130  Cancer Genetics and Genetic Counseling  **  
2.0 cr.  
(Spring) Prereq: GENC 6110, GENC 6120. Restrictions: Matriculation in MS Genetic Counseling Program.  
Course in providing genetic counseling services to clients with or at risk for hereditary cancer predisposition. Topics include clinical oncology, epidemiology, molecular biology of cancer, risk assessment, genetic testing, ethical/legal issues, clinical research considerations, psychosocial impact/support, specific genetic counseling approaches.

**GENC 6140  Human Inborn Errors of Metabolism  **  
2.0 cr.  
(Spring) Restrictions: Matriculated student in Genetic Counseling M.S. Program or instructor permission.  
Course provides systematic review of major metabolic disorders, including their clinical phenotypes, diagnosis, and management. Physiological and laboratory testing principles important to understanding these disorders will be reviewed. Psychosocial impact of metabollic disorders and genetic counseling approaches will be discussed.

**GENC 6150  Congenital Malformations and Disorders of the Newborn  **  
1.0 cr.  
(Spring) Prereq: GENC 6110. Coreq: GENC 6111. Restrictions: Matriculated student in Genetic Counseling M.S. Program or instructor permission.  
This survey course covers common major malformations and non-metabolic genetic disorders identified by newborn screening programs. Clinical phenotypes, diagnosis, management and etiology are addressed. Psychosocial impact of these conditions and genetic counseling approaches will be discussed.

**GENC 6170  Introduction to Clinical Research for Genetic Counseling Students  **  
1.0 cr.  
(Fall) Restrictions: Matriculated student in Genetic Counseling M.S. Program or instructor permission.
An introduction to clinical research including an overview of ethical principles, study methods and designs, practical execution, data analysis and presentation of results. Possible roles of a genetic counselor in the conduct of clinical research will be a course focus.

GENC 6201 Advanced Psychosocial Genetic Counseling 2.0 cr.
(Fall) Prereq: GENC 6101 and GENC 6102. Course Restrictions: Matriculated second year student in Genetic Counseling M.S. Program
This course examines advanced genetic counseling techniques as they relate to psychosocial theories, specific client characteristics and the client/counselor dynamic. Critical discussion of core topics and readings and case analysis will be used for instruction.

GENC 6210 Professional Issues in Genetic Counseling I 2.0 cr.
(Fall) Prereq: GENC 6101, GENC 6105, GENC 6110. Restrictions: Second year student in Genetic Counseling M.S. Program.
First course in a two-course sequence regarding professional practice issues of master’s level genetic counselors. The fall semester course focuses on professional standards, professional ethics, legal principles and health systems and policy issues relevant to genetic counselors.

GENC 6250 Risk Calculation in Genetic Counseling 1.0 cr.
(Fall) Prereq: GENC 6110. GENC 6120. Restrictions: Matriculation in M.S. Genetic Counseling Program.
This course covers pedigree analysis and risk calculation principles used by genetic counselors in clinical practice.

GENC 6610 Topic in Med Genetic 1 3.0 cr.
(Fall)

GENC 6910 Applied General Genetics Clinic 3.0 cr.
(Fall, Spring, Summer) Prereq: GENC 6101, GENC 6105, GENC 6110. Restrictions: Matriculation as M.S. Genetic Counseling Student.
This is a clinical rotation for Genetic Counseling M.S. students through a general genetics clinic serving a variety of referral indications. Students will learn and practice case management, history taking, risk assessment, counseling, and client advocacy skills.

GENC 6911 Applied Prenatal Genetics Clinic 3.0 cr.
(Fall, Spring, Summer) Prereq: GENC 6101, GENC 6105, GENC 6110. Restrictions: Matriculation as M.S. Genetic Counseling Student.
This is a clinical rotation for genetic counseling students through a prenatal diagnosis and genetics clinic. Students will learn/practice history taking, risk assessment, patient education and genetic counseling, case management, as well as observe prenatal diagnosis and ART procedures.

GENC 6912 Applied Metabolic Genetics Clinic 3.0 cr.
(Fall, Spring, Summer) Prereq: GENC 6101, GENC 6105, GENC 6110. Restrictions: Matriculation as M.S. Genetic Counseling Student.
This is a clinical rotation for genetic counseling students through a genetics clinic for inborn errors of metabolism. Students will work with patients referred for diagnostic evaluation, medical/nutritional management of specific conditions, follow-up of positive newborn metabolic screening results.

GENC 6913 Applied Regional & Specialties Genetics Clinics 1.0-2.0 cr.
(Fall, Spring, Summer) Prereq: GENC 6101, GENC 6105, GENC 6110. Restrictions: Matriculation as M.S. Genetic Counseling Student.
This is a clinical rotation for genetic counseling students through regional outreach genetics clinics and specialty/multidisciplinary clinics serving patients with various genetic conditions.

GENC 6914 Applied Hereditary Cancer Clinic 1.0 cr.
(Fall, Spring, Summer) Prereq: GENC 6110, PEDS 6601, PEDS 6602. Restrictions: Matriculation as M.S. Genetic Counseling Student.
This is a clinical rotation for genetic counseling students through a hereditary cancer clinic for individuals seeking genetic counseling and testing for genetic cancer predisposition syndromes.

GENC 6915 Applied Adult Medical Genetics Clinic 1.0 cr.
(Fall, Spring, Summer) Prereq: GENC 6101, GENC 6105, GENC 6110. Restrictions: Matriculation as M.S. Genetic Counseling Student.
This is a clinical rotation for genetic counseling students through a medical genetics clinic and clinical research settings providing diagnosis, management, risk assessment and genetic counseling for adults.

GENC 6919 Applied Medical Genetics Clinic – Clinical Elective 1.0-3.0 cr.
GENC 6920  Applied Medical Genetics – Laboratory Genetic Counseling Elective  1.0 cr.
(Fall, Spring, Summer) Prereq: GENC 6120, GENC 6121, GENC 6122. Restrictions: Matriculated student in GENC program who has completed required prerequisite courses listed; Permission of instructor.
An elective rotation for students desiring an advanced, applied training experience with genetic counselors based in a genetics diagnostic laboratory.

GENC 6940  Capstone Genetic Counseling  1.0-2.0 cr.
(Fall, Spring, Summer) Restrictions: Matriculated student in GENC program who has completed at least two semesters of required coursework; Permission of instructor.
Students will develop a proposal and complete an individualized scholarly project that contributes to the knowledge and/or practice of genetic counseling.

GENC 6950  Masters Thesis  1.0-6.0 cr.
(Fall, Spring, Summer). Restrictions: Matriculated student in Genetic Counseling M.S. Program Masters thesis research to be arranged with prior approval of the Graduate Program in Genetic Counseling.

HUMAN MEDICAL GENETIC

HMGP 7600  Survey of Human Genetics  3.0 cr.
(Spring)
Survey of human genetics, including Mendelian and other types of inheritance, chromosomes and cytogenetics, molecular and biochemical basis of genetic disease, quantitative genetics and gene mapping, developmental and cancer genetics, clinical genetics, and genetic screening and prenatal diagnosis.

HMGP 7610  Topics in Human Genetics  1.0-3.0 cr.
(Fall, Spring) Prereq: Graduate standing.
Two-semester course based on weekly HMGP seminar series. Students meet with speakers and discuss seminar or related topics and arranged readings. Grade based on class participation and required paper and presentation. Required for 1st and 2nd year HMGP students.

HMGP 7620  Advanced Genome Analysis  2.0 cr.
(Spring) Crosslisted Course: CPBS 7620, STBB 7620, and MICB 7620
Introduction to genomics emphasizing gaining familiarity with: analysis, utilization of genomic data. Topics: sequencing, mapping genomes, transcriptomics, human genome, evolution, genomic disorders, bioinformatics, statistics, population variation, epigenomics, proteomics, metagenomics, microbiome analysis, functional genomics, ethics.

HMGP 7621  Genome Analysis Workshop  3.0 cr.
(Spring) Students cannot have previously taken MOLB 7620. Cross listed with MOLB 7621 and STBB 7621.
Introduction to genomics emphasizing gaining familiarity with: analysis, utilization of genomic data. Topics: sequencing, mapping genomes, transcriptomics, human genome, evolution, genomic disorders, bioinformatics, statistics, population variation, epigenomics, proteomics, metagenomics, microbiome analysis, functional genomics, ethics.

HMGP 7630  Independent Study in Human Medical Genetics  1.0-2.0 cr.
(Fall, Spring, Summer) Restriction: Consent of the faculty member offering the independent study and Program Director required.
Independent study is intended to permit students to carry out directed reading and discussion with a specific faculty member to fill a specific need, and to gain defined expertise with a faculty member other than their thesis advisor.

HMGP 7650  Research in Human Medical Genetics  1.0-10.0 cr.
(Fall, Spring, Summer) Prereq: Consent of Instructor.
Research work in human medical genetics.

HMGP 8990  Doctoral Thesis  1.0-10.0 cr.
(Fall, Spring, Summer) Prereq: Consent of Instructor.
Doctoral thesis work in human medical genetics.

INTERDEPARTMENTAL

IDPT 5600  Topics in Biomedical Science and Research  4.0 cr.
(Summer)
Research internship for undergraduate fellows in Graduate Experiences for Multicultural Students (GEMS) program.

IDPT 6006  Obesity and Cardiovascular Disease  1.0 cr.
(Fall, Sping) Course will span two semesters, Fall and then Spring
The course will cover how obesity relates to cardiovascular disease including basic and clinical mechanisms on the pathophysiology of vascular biology, insulin resistance, risk factors, and outcomes, and how therapeutic interventions modify cardiovascular disease risk.

**IDPT 6939 Internship – Technology and Innovation**
(Fall, Spring, Summer) Prerequisite: Instructor Consent required
The internship provides hands-on learning opportunities for graduate students in institutions related to technology/biotechnology, computer science, engineering, innovation and entrepreneurship.

**IDPT 7160 Philosophical Foundations of Research Ethics**
(Spring) Crosslisted: CLSC 7160.
This course will examine the philosophical basis for current research ethics practices, address current ethical issues and controversies in biomedical research and provide students with knowledge and analytical skills to address the ethical dimensions of biomedical research.

**IDPT 7200 Scientific Writing for Doctoral Students**
(Spring) Restrictions: Must have passed preliminary examination; permission of instructor.
Scientific writing course for students engaged in research. Focuses on critical thinking, analytical writing, and oral presentation. Taught as a writing workshop, the course emphasizes effective communication with both professional and non-technical audiences.

**IDPT 7301 Introduction to Life Science Technology Commercialization**
(Fall, Spring)
Course designed to familiarize graduate level engineering, business, law, science students with fundamentals of life science technology commercialization including drugs, devices, diagnostics, healthcare IT and platform applications. Three consecutive 5-week classes, each 1 credit. Open to all graduate level students.

**IDPT 7304 The Legal and Regulatory Environment of Life Science Innovation**
(Fall)
This course is designed to familiarize graduate level engineering, business, law and science students with the fundamentals of life science technology commercialization including drugs, devices, diagnostics, healthcare IT and platform applications.

**IDPT 7305 Hands On Proteomics Workshop**
(Fall, Spring, Summer) Prerequisite: IDPT 7811, IDPT 7812, IDPT 7813, IDPT 7814, IDPT 7815 and Instructor permission.
4-day intensive hands-on workshop designed to provide comprehensive view of proteomics. Appropriate for individuals with little/no experience in mass spectrometry and/or high performance liquid chromatography. Participants learn introductory proteomics science and applicable protocols/technologies through extensive hands-on experience.

**IDPT 7642 Introduction to Laboratory Animal Research**
(Summer)
Provides basic knowledge on the use of laboratory animals, animal welfare and animal models. Includes general concepts on animal biology and husbandry for most common laboratory species and incorporates essential principles of anesthesia, analgesia, surgery and peri operative care.

**IDPT 7645 MSTP Seminar**
(Fall, Spring, Summer)
Designed to expose MSTP and physician scientist students to research programs and opportunities in biomedical sciences at the Anschutz Medical campus and selected departments of the UC Boulder campus.

**IDPT 7646 Tissue Biology and Disease Mechanism**
(Fall) Prerequisite: IDPT 7811, IDPT 7812, IDPT 7813, IDPT 7814, IDPT 7815
This course provides an overview of organ systems and disease through 1) a survey of the major systems, including the cellular and molecular mechanisms underlying their function and repair, integrated with 2) common diseases, current therapies, and their mechanistic basis.

**IDPT 7650 Research in Biomedical Sciences**
(Fall, Spring, Summer) Prereq: Consent of instructor.
Research rotation for students in the biomedical sciences Ph.D. program.

**IDPT 7651 MSTP Summer Research Rotation**
(Summer) Prereq: Acceptance into the MST Program and permission of MSTP Director.
This course is an 8-10 week laboratory rotation experience in an MSTP training laboratory.

**IDPT 7652 MSTP Advanced Topics**
(Fall, Spring) Prereq: IDPT 7811, IDPT 7812, IDPT 7813, IDPT 7814 and IDPT 7815; permission of instructor.
This course is designed for students in the MSTP and consists of in-depth small group (1-7 students) sessions that provide in-depth didactic and/or paper readings on subjects related to research rotations or thesis projects.

**IDPT 7655 Thesis Years – Foundations of Doctoring**
(Fall, Spring, Summer) Prereq: All Phase I and II SOM courses. Restrictions: Permission of Instructor.
This course is intended for MD or MD-PhD students who have successfully completed all coursework for Phases I and II of SOM curriculum, are on leave of absence from SOM and wish to maintain clinical exposure and training during the leave.

</table>
This course discusses ethical issues, conflicts of interest, and regulations for working with humans or animals. It also includes instruction on writing papers and grants, giving effective presentations and advice on finding jobs in academia and industry.

**IMMU 7630 Overview of Immunology**  
(Fall)  
An overview course in immunology for non-Immunology-program graduate students. The focus is human relevance and the practical use of immunology in a variety of fields. Students gain experience applying immunological knowledge to their own area of interest.

**IMMU 7650 Research in Immunology**  
(Fall, Spring, Summer) Prereq: Consent of instructor.  
Research work in immunology.

**IMMU 7662 Immunology**  
(Spring)  
This course covers the basic principles of the immune system. Included are discussions on (i) the innate and adaptive immune responses, (ii) the molecular and cellular basis of immune specificity and (ii) aspects of clinical immunology.

**IMMU 8990 Doctoral Thesis**  
(Fall, Spring, Summer) Prereq: Consent of instructor  
Doctoral thesis work in immunology.

---

**MICB 7620 Advanced Genome Analysis**  
(Spring) Crosslisted Course: CPBS 7620, STBB 7620, and HMGP 7620.  
Introduction to genomics emphasizing gaining familiarity with: analysis, utilization of genomic data. Topics: sequencing, mapping genomes, transcriptomics, human genome, evolution, genomic disorders, bioinformatics, statistics, population variation, epigenomics, proteomics, metagenomics, microbiome analysis, functional genomics, ethics.

**MICB 7650 Research in Microbiology**  
(Fall, Spring, Summer) Prereq: Consent of instructor.  
Research work in microbiology.

**MICB 7701 Molecular Virology and Pathogenesis**  
(Spring) Prereq: MICB 7706, MICB 7705 are desirable but not required. Restrictions: Permission of Instructor.  
Topics in this course include viral structure and genome organization, replication and expression of viral genomes, mechanism of action of tumor viruses, molecular aspects of virus-host cell interactions, animal models of infectious diseases and pathogenesis of human viruses.

**MICB 7702 Molecular Mechanisms of Bacterial Disease**  
(Spring) Restrictions: Permission of the instructor.  
Course focuses on molecular processes that bacteria utilize to cause disease in humans. The course content will use specific examples from pathogenic bacteria to illustrate common virulence mechanisms utilized to initiate, maintain and survive interactions with host cells.

**MICB 7704 Host Response to Infectious Disease**  
(Spring) Prereq: Biomedical Core Courses.  
This interactive graduate course, which provides an overview and specific examples of the host response to infectious disease. Current research and future directions in the field are discussed. Students are assessed via presentations, participation, and an exam.

**MICB 7705 Medical Microbiology**  
The course will focus on Microbiology, Infectious Diseases. Course content will focus on: pathogenicic bacteria, viruses, fungi, parasites; emphasis on microbial virulence determinants, host-pathogen interactions emphasizing host immune responses, signs, symptoms of disease presentation, epidemiology, and diagnosis of infectious diseases.

**MICB 7706 Fundamentals of Microbiology and Infectious Diseases**  
(Fall) Restrictions: Permission of the Instructor.  
Fundamentals of Microbiology is a course designed to introduce first year graduate students to the discipline of microbiology. The basics of microbiology will be presented to prepare the student for courses in medical microbiology, advanced bacteriology and advanced virology.

**MICB 8990 Doctoral Thesis**  
1.0-10.0 cr.
MOLECULAR BIOLOGY

**MOLB 7616  Topics in Molecular and Cellular Biology**  1.0 cr.
(Fall) Prereq: IDPT 7811, IDPT 7812, IDPT 7813, IDPT 7814, IDPT 7815.
Various topics in molecular and cellular biology will be selected every year. Each topic will be studied by a
faculty lecture and group presentations by graduate students of research papers.

**MOLB 7621 Genome Analysis Workshop**  3.0 cr.
(Spring) Restriction: Students cannot have previously taken MOLB 7620. Cross listed with STBB 7621.
A tutorial of skills needed to process genomics data sets and visualize their results. Taught experimentalists
with practical goals (e.g. to interpret the results of an experiment and gain biologically meaningful insight). Course is
designed to closely mirror HMGP 7620.

**MOLB 7650  Research in Molecular Biology**  1.0-10.0 cr.
(Fall, Spring, Summer) Prereq: Consent of the instructor.
Research work in molecular biology.

**MOLB 7661  Molecular Biology Seminar**  1.0 cr.
(Fall, Spring)
Seminar series provides a forum for the presentation of scientific experiments and information in molecular
biology by faculty, postdoctoral fellows, graduate students and invited outside guest speakers.

**MOLB 7800  Advanced Topics in Molecular Biology**  3.0-4.0 cr.
(Spring) Prereq: IDPT 7811, IDPT 7812, IDPT 7813, IDPT 7814, IDPT 7815. Restrictions: Permission of instructor.
Course offered in 4 blocks of 1 hour of credit each.
Course intended to teach graduate students to critically evaluate scientific literature. Course divided into 4
blocks, topics include nucleic acid, chromatin structure, DNA replication, RNA transcription, RNA processing, cell cycle
control, genetics of model organisms. Instructors choose papers, students; presentations.

**MOLB 8990  Doctoral Thesis**  1.0-10.0 cr.
(Fall, Spring, Summer) Doctoral thesis work in molecular biology. Prerequisite: Consent of Instructor

NEUROSCIENCE

**NRSC 7600  Cellular & Molecular Neurobiology**  3.0 cr.
(Fall)
A comprehensive, in-depth, discussion-based course intended for candidates for the PhD in Neuroscience.
Topics include ion channel structure and function, ionic basis of the resting and action potential, and the biochemistry and
physiology of direct and indirect synaptic transmission.

**NRSC 7610  Fundamentals of Neurobiology**  4.0 cr.
(Spring) Prereq: NRSC 7600 or equivalent at the discretion of the instructors.
The lectures will provide basic knowledge on the structure and function of the nervous system. The lectures will
be supplemented by discussion of primary research literature in neurobiology.

**NRSC 7614  Biological Basis of Psychiatric & Neurological Disorders**  2.0 cr.
(Spring) Prereq: IDPT 7812 or BMGN 5000/CSBI 5001.
This elective, for basic sciences graduate students and medical students, provides a survey of current clinical
and molecular aspects of human neuropsychiatric disorders. Both movement disorders and DSMIV diagnoses will be
covered. Contact Course Director for a list of topics.

**NRSC 7615  Developmental Neurobiology**  3.0 cr.
(Spring) Prereq: IDPT 5004, NRSC 7600 & NRSC 7610.
This course will cover fundamental principles regarding development of the nervous system. The format of the
course will consist of lecture plus reading of primary literature.

**NRSC 7616  Introduction to Biomedical Photonics**  3.0 cr.
The course introduces several principles of applying optical techniques to biomedical applications. Current development
of biophotonic research, such as microscopy, optical coherence tomography, optical spectroscopic techniques in tissues,
will be discussed.

**NRSC 7650  Research in Neuroscience**  1.0-10.0 cr.
(Fall, Spring, Summer) Prereq: Consent of instructor.
Research work in neuroscience.
NRSC 7657  MATLAB for Neuroscientists  2 cr.
(Fall, Spring, Summer)  .
MATLAB is an accessible programming environment that is widely used by scientists and engineers and offers powerful tools for data acquisition and data analysis. Students will develop their own MATLAB programs that are relevant to their particular line of research.

NRSC 7661  Grant Proposal Writing Workshop  1.0 cr.
(Spring) Prereq: NRSC 7610. Restriction: Students with adequate neuroscience background.
Course is practical workshop in grant-writing culminating in a mock review panel including course participants.
Students will examine various proposal types/formats, then write their own proposal in the format of NRSA fellowship application.

NRSC 7662  Survey of Neuroscience  1.0 cr.
(Spring, Fall)
Designed to expose first year graduate students to current topics in neuroscience.

NRSC 7670  Advanced Topics in Neuroscience  1.0-2.0 cr.
(Fall, Spring, Summer)  Prereq: NRSC 7600 or permission from instructor.
The course will consist of discussion of manuscripts relevant to a specific topic in neuroscience.

NRSC 7674  Quantitative Neuroscience  3.0 cr.
(Fall) Prereq: See Instructor. Note: This course is taught Downtown according to the Downtown calendar.
In this course, mathematical models and data processing strategies will be introduced as well as other cutting-edge research techniques to help students understand how these techniques can be applied to solve modern neuroscience problems.

NRSC 7675  Neuroscience, Ethics, and Philosophy  1.0 cr.
(Fall) Prereq: Successful completion of 1st year Graduate Courses.
Elective course provides overview of issues at the intersection of philosophy/ethics/neuroscience. Format involves lecture, student presentations, and relies heavily on student discussion. Topics focus on arguments relevant to the philosophy of mind along with their implications for the individual/society.

NRSC 7800  Teaching Neuroscience  1.0 cr.
(Spring) Prereq: NRSC 7610 Course Restrictions: Second year students in neuroscience or above.
Students will be guided in developing two class sessions in systems neuroscience to be presented in the Systems Neuroscience course, NRSC 7610. Each session will include a practice presentation and post-mortem critique.

NRSC 8990  Doctoral Thesis  1.0-10.0 cr.
(Fall, Spring, Summer) Prereq: Consent of instructor
Doctoral thesis work in neuroscience.

PHARMACOLOGY

PHCL 7560  Drug Metabolism & Pharmacogenetics I  1.0 cr.
(Fall) Crosslisted: TXCL 7560.
Course will focus on reactions that exogenous compounds undergo in mammalian systems and mechanisms of these reactions. Enzyme kinetics and unusual (idiosyncratic) drug responses that have a hereditary basis and the interrelationship between genes and drug metabolism will be discussed.

PHCL 7561  Drug Metabolism and Pharmacogenetics  2.0 cr.
(Spring) Crosslisted TXCL 7561.
Course will focus on reactions that exogenous compounds undergo in mammalian systems and mechanisms of these reactions. Enzyme kinetics and unusual (idiosyncratic) drug responses that have a hereditary basis and the interrelationship between genes and drug metabolism will be discussed.

PHCL 7600  Frontiers in Pharmacology  1.0 cr.
(Fall)
Course is intended to introduce students to cutting-edge pharmacology research and to the range of research opportunities available within the Pharmacology Training Program. Pharmacology Department faculty presentations will focus on cellular signaling, molecular mechanisms of drug actions, structure-based drug design.

PHCL 7602  Pharmacology Journal Club  1.0 cr.
(Fall, Spring)
The overall goal of the course is to teach the students to read and discuss current literature in their field and to gain a comprehensive view of the directions that lead to high-impact research. Students will present and discuss papers.

PHCL 7605  Ethics in Research  1.0 cr.
(Fall)
The Department of Pharmacology in the CU School of Medicine organizes and offers an interactive course entitled “Ethics in Research”. The course is designed to inform/sensitize students, trainees, faculty to problems of fraud, misconduct and unethical practices in scientific research.

</table>
PHSC 7622  Applied Database Research  
(Spring) Prereq: PHSC 7621, BIOS 6611/6602 or approval of course director. Restrictions: Currently enrolled in a graduate-level program of study. Course is second of two-course sequence in database research, providing students opportunity to apply theory and methods learned in PHSC 7621 to develop competency in conducting research using secondary datasets. Students conduct their own database project and complete manuscript describing findings.

PHSC 7650  Research Rotation in the Pharmaceutical Sciences  
(Fall, Spring, Summer) Prereq: Consent of instructor. Research work in pharmaceutical sciences.

PHSC 7651  Pharmaceutical Biotechnology  
(Fall) Crosslisted: CU Boulder CHEN 5900. Course covers role of bioengineering in development of pharmaceutical biotechnology products. In particular, the student will learn to apply solution thermodynamics as well as mass and heat transfer concepts to the stabilization/formulation of macromolecules and production of drug delivery systems.

PHSC 7652  Principles of Medicinal Chemistry  
(Spring, Fall) Prereq: One-year organic chemistry with lab. This survey course covers organic chemistry of drugs with respect to drug action: mechanism of action, structure-activity relationships, metabolism, dosage forms and rational drug design. Course encompasses traditional therapeutic categories of drugs as well as selected topics from current literature.

PHSC 7653  Protein Formulation  
(Spring) This course will provide instruction in rational design of stable therapeutic protein formulations with emphasis on the practical and mechanistic aspects of developing aqueous solution and freeze-dried formulations. Students will read papers from the literature and participate in critical discussions.

PHSC 7654  Advanced Topics in Pharmacology  
(Fall, Spring) Restrictions: Permission from instructor/Program Director. Considers special topic of current interest in pharmacology. Course may be repeated for credit with the instructor’s approval.

PHSC 7657  Advanced Topics in Medicinal Chemistry  
(Fall, Spring) Restriction: Permission from instructor. Considers special topic of current interest in medicinal chemistry. Course may be repeated for credit with the instructor’s approval.

PHSC 7658  Advanced Topics in Pharmaceutical Sciences  
(Fall, Spring). Restriction: Permission from instructor. Considers special topic of current interest in pharmaceutical sciences. Course may be repeated for credit with instructor’s approval.

PHSC 7660  Membrane Dynamics  
(Spring) This course will cover the basics of membrane bioenergetics in biological systems. The physical properties of membranes are described based on studies with liposomes, and the course further explores the use of liposomes as drug delivery vehicles.

PHSC 7665  Pharmacokinetic Principles & Applications  
(Spring) Cross-listed with TXCL 7665. A survey course to introduce students to pharmacokinetic and pharmacodynamics principles used in drug research and development. Taught by faculty from the School of Pharmacy, Department of Pharmaceutical Sciences. Phoenix Winnonlin Computer software will be used in the course.

PHSC 7670  Methods in Pharmaceutical Sciences and Molecular Toxicology  
(Spring) Restrictions: For Graduate Students in the Pharmaceutical Sciences and Toxicology programs. This course is designed to provide first year incoming graduate students with a basic understanding of methodological theory and the practical application of various bio-chemical, molecular and analytical techniques used in pharmaceutical sciences and molecular toxicology.

PHSC 7831  Case Studies in Biotechnology  
(Spring) Crosslisted: CU Boulder CHEN 5831. Course is required of all graduate students in interdisciplinary graduate biotechnology certificate program and those supported on NIH training grants. Reviews molecular genetics, product synthesis/purification, economics, intellectual property, and business planning. Working in teams, students present a biotechnology product plan.

PHSC 7911  Pharmaceutical Outcomes Research Practicum

This research practicum exposes students to a variety of experimental tools and techniques available to Rehabilitation scientists. Mentored practicum experiences are selected by each student with permission from the faculty mentor(s).

**RHSC 8900  Independent Study in Rehabilitation Science**  
1.0-3.0 cr.  
(Fall, Spring, Summer) Prereq: Instructor Permission. Restriction: Instructor permission required for students not enrolled in RHSC Program.  
This course is designed for the advanced student to pursue one or more Rehabilitation Science topics in considerable depth. Faculty supervision is required.

**RHSC 8990  Doctoral Thesis**  
1.0-10.0 cr.  
(Fall, Spring, Summer) Prereq: Instructor Permission. Restriction: Enrollment in RHSC Program.  
Doctoral thesis work in Rehabilitation Science.

### REPRODUCTIVE SCIENCES

**RPSC 7650  Research in Reproductive Science**  
1.0-5.0 cr.  
(Fall, Spring, Summer) Prereq: Consent of the Instructor  
Research work in Reproductive Science

**RPSC 7652  Special Topics in Reproductive Science**  
1.0-3.0 cr.  
(Fall, Spring, Summer) Prereq: Enrollment in PhD Program in Graduate School  
This course provides instruction in a specialized area of Reproductive Science. Course content and the extent of the course varies from year to year.

**RPSC 7801  Molecular Mechanisms of Reproductive Endocrinology and Metabolism**  
3.0 cr.  
(Spring) Prereq: Core Courses IDPT 7811, IDPT 7812, IDPT 7813, IDPT 7814, IDPT 7815. Restrictions: CU-AMC grad students; others by permission of the Course Director  
Endocrine systems will be covered from the molecule to the systems level. Pituitary secretions actions/regulation, regulation of water, ion, calcium balance, regulation of metabolism including insulin secretion/action will be discussed, the context of normal physiology, the mechanisms of endocrine dysfunction.

**RPSC 7802  Reproductive Development**  
1.0 cr.  
(Spring) Prereq: Core Courses IDPT 7811, IDPT 7812, IDPT 7813, IDPT 7814, IDPT 7815.  
Focus of course is developmental biology of reproductive systems. Sex determination, fertilization, implantation, development of placenta and mammary glands will be covered in lectures and discussions of current literature. Course is designed to follow Endocrinology and Metabolism in Spring semester.

**RPSC 8990  Doctoral Thesis**  
1.0-10.0 cr.  
(Fall, Spring, Summer) Prereq: Consent of the Instructor  
Doctoral thesis work in Reproductive Science

### STRUCTURAL BIOLOGY AND BIOPHYSICS

**STBB 7608  Molecular Interactions**  
3.0 cr.  
(Spring) Cross-listed with PHSC 7608.  
Provides chemical/physical basis for protein structure, folding, function & stability; presents methods/principles of protein/peptide purification & enzyme catalysis including electron transfer & mutagenesis. The role of molecular dynamics & use of molecular simulations in the investigations of protein-ligand/protein-protein interactions.

**STBB 7609  Biophysics & Spectroscopy**  
3.0 cr.  
(Spring) Cross-listed with PHSC 7609.  
This course will teach fundamentals of modern molecular spectroscopies and biophysical techniques as applied to biomolecules and the structural/dynamic information they afford.

**STBB 7620  Advanced Genome Analysis**  
2.0 cr.  
(Spring) Crosslisted Course: HMGP 7620, CPBS 7620, and MICB 7620microbiome analysis, functional genomics, ethics.  
Introduction to genomics emphasizing gaining familiarity with: analysis, utilization of genomic data. Topics: sequencing, mapping genomes, transcriptomics, human genome, evolution, genomic disorders, bioinformatics, statistics, population variation, epigenomics, proteomics, metagenomics,

**STBB 7621  Genome Analysis Workshop**  
3.0 cr.  
(Spring) Cross listed with MOLB 7621  
A tutorial of skills needed to process genomics data sets and visualize their results. Taught experimentalists with practical goals (e.g. to interpret the results of an experiment and gain biologically meaningful insight). Course is designed to closely mirror HMGP 7620.

**STBB 7631  Molecular Structure A**  
1.5 cr.
Gain an in-depth understanding of the underlying principles of an NMR experiment, so that student can turn NMR theory into NMR practice for their research.

**STBB 7632 Molecular Structure B**  
(Fall)  
Understand the theory and practice of structural determination using x-ray crystallography.

**STBB 7633 Molecular Structure C**  
(Fall)  
The purpose of this course is to provide students with a concise understanding of biological mass spectrometry and its application to study and characterize various classes of biomolecules in state of the art research. Course is 7.5 weeks.

**STBB 7650 Research in STBB**  
(Fall, Spring, Summer)  
Research work in Structural Biology and Biochemistry. 2 laboratory hours per week per credit.

**STBB 7660 Structure Seminar**  
(Fall, Spring)  
Seminar series provides a forum for the presentation of scientific experiments and information in structural biology by faculty, postdoctoral fellows and graduate students.

**STBB 7670 Independent Study in Structural Biology and Biochem**  
(Fall, Spring, Summer)  
This course is listed for the benefit of the advanced student who desires to pursue one or more topics in Structural Biology and Biochemistry in considerable depth. Supervision by a full-time faculty member is necessary.

**STBB 8990 Doctoral Thesis**  
(Fall, Spring, Summer)  
Doctoral thesis work in Structural Biology and Biochemistry.

---

### TOXICOLOGY

**TXCL 7310 Fundamentals of Pharmaceutical Sciences**  
(Fall) Crosslisted: PHSC 7310  
This core course explores key aspects of Pharmaceutical Sciences. Major themes will focus on macromolecular interactions, pharmaceutics, pharmacokinetics, pharmacodynamics, apoptosis, signal transduction and immunology. Critical thinking and problem solving skills will be emphasized via lectures discussions, and computer-based data analyses.

**TXCL 7322 Molecular and Target Organ Toxicology**  
(Fall) Prereq: Need discussion with and consent of Instructor.  
The course is designed to provide a foundation in molecular mechanisms of toxicity. Biochemical mechanisms underlying toxicity will be analyzed and integrated with discussions of reactive metabolites, oxidative stress, signal transduction, cell death and organ specific toxicity.

**TXCL 7323 Environmental and Target Organ Toxicology**  
(Spring) Prereq: Need discussion with and consent of Instructor.  
The course is designed to provide a fundamental understanding of environmental-related toxicants (e.g. solvents, pesticides, metals, radiation) with emphases on the molecular mechanisms underlying their organ specific toxicity and on risk assessment.

**TXCL 7325 Current Topics in Toxicology Research**  
(Fall, Spring)  
This is a mandatory 1-credit hour course for Toxicology program graduate students. Each student is expected to lead one discussion per year, papers discussed will be authored by the upcoming Toxicology seminar series speaker. Grade given after Spring semester.

**TXCL 7326 Current Concepts & Comprehensive Review of Physiology**  
(Spring)  
This course will consist of a comprehensive overview of the physiology of nervous cardiovascular, respiratory, renal, gastrointestinal, endocrine, and reproductive systems. Graduate students enrolled in this course will receive assignments concerning organ-specific, cell-cell interactions in overall physiology.

**TXCL 7330 Development of Drugs and Biologics**  
(Fall) Cross listed with PHSC 7330  
A survey course designed to introduce students to pharmacokinetic and pharmacodynamics principals used in drug research and development by faculty of the Skaggs School of Pharmacy, Department of Pharmaceutical Sciences. The Phoenix Winnonlin Computer software, is used to complete homework.

<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>TXCL 7340</td>
<td>Ocular Physiology, Pathophysiology &amp; Pharmacology</td>
<td>1.0 cr.</td>
</tr>
<tr>
<td>(Summer)</td>
<td>This interactive course will survey major diseases of the vision system. Lectures will cover the physiological basis for disease and current treatment options being used in the clinic, with emphasis on opportunities for new strategies to treat and prevent disease.</td>
<td></td>
</tr>
<tr>
<td>TXCL 7400</td>
<td>Ethical Issues in Toxicology and Pharmaceutical Sciences</td>
<td>1.0 cr.</td>
</tr>
<tr>
<td>(Fall)</td>
<td>The purpose of this course is to expose students to ethical issues in the fields of Toxicology and Pharmaceutical Sciences. Emphasis will be placed on research conduct, animal use, and other timely issues relevant in these fields.</td>
<td></td>
</tr>
<tr>
<td>TXCL 7452</td>
<td>Introduction to Clinical Pharmacology</td>
<td>3.0 cr.</td>
</tr>
<tr>
<td>(Fall, Spring)</td>
<td>Prereq: Permission of Course Director. Crosslisted with PHSC 7452.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>The course provides students with a foundational knowledge of clinical pharmacology, including pharmacokinetics, drug metabolism, assessment of drug effects, optimizing patient therapy and drug discovery and development. It is grounded in weekly topical lectures, supplemented by readings, discussion and assignments.</td>
<td></td>
</tr>
<tr>
<td>TXCL 7475</td>
<td>Advanced Topics in Toxicology</td>
<td>1.0-6.0 cr.</td>
</tr>
<tr>
<td>(Fall)</td>
<td>Prereq: Permission of instructor/Program Director. Considers special topic of current interest in toxicology. Course may be repeated for credit with instructor's consent.</td>
<td></td>
</tr>
<tr>
<td>TXCL 7555</td>
<td>Evidenced-Based Toxicology</td>
<td>2.0 cr.</td>
</tr>
<tr>
<td>(Fall, Spring)</td>
<td>Students perform literature research to address actual ongoing consultations made to a private practice of environmental toxicology. Questions of occupational/environmental safety, product safety, regulatory compliance, personal injury, medical monitoring are addressed by writing conclusions formed using principles of Evidence-Based Toxicology.</td>
<td></td>
</tr>
<tr>
<td>TXCL 7560</td>
<td>Drug Metabolism &amp; Pharmacogenetics 1</td>
<td>2.0 cr.</td>
</tr>
<tr>
<td>(Fall)</td>
<td>Crosslisted: PHCL 7561</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Course focuses on reactions that exogenous compounds undergo in mammalian systems and mechanisms of reactions. Enzyme kinetics/unusual drug responses that have hereditary basis is discussed. Interrelationship between genes/drug metabolism along with studies on polymorphic differences in genes encoding drug-metabolizing enzymes.</td>
<td></td>
</tr>
<tr>
<td>TXCL 7561</td>
<td>Drug Metabolism &amp; Pharmacogenetics</td>
<td>3.0 cr.</td>
</tr>
<tr>
<td>(Spring)</td>
<td>Crosslisted: PHCL 7561</td>
<td></td>
</tr>
<tr>
<td></td>
<td>This course will focus on the reactions that the exogenous compounds undergo in mammalian systems and the mechanisms of these reactions. Enzyme kinetics and unusual (idiosyncratic) drug responses that have a hereditary basis will be discussed.</td>
<td></td>
</tr>
<tr>
<td>TXCL 7562</td>
<td>Analytical Basis of Forensic Toxicology</td>
<td>2.0 cr.</td>
</tr>
<tr>
<td>(Summer, Fall)</td>
<td>Principles of analysis of abused drugs in biological samples within framework of legal requirements. Considerations include type of sample, routes/kinetics of metabolism, analytical methodology, possible interferences of physiological impairment. Agents include ethanol, cocaine, cannabinoids, amphetamines, opiates, phencyclidine, and anabolic steroids.</td>
<td></td>
</tr>
<tr>
<td>TXCL 7564</td>
<td>Environmental Risk Assessment and Applied Toxicology</td>
<td>2.0 cr.</td>
</tr>
<tr>
<td>(Spring)</td>
<td>Provides students with experience in risk assessment, environmental toxicology for public health and regulatory decision making. Topics include comprehensive human health risk assessments, baseline/probabilistic statistics, ecological risk assessment activities associated with emergency action, medical monitoring, role toxicology plays in courtroom.</td>
<td></td>
</tr>
<tr>
<td>TXCL 7575</td>
<td>Drug Development for the Toxicologist</td>
<td>2.0 cr.</td>
</tr>
<tr>
<td>(Spring)</td>
<td>Prerequisites TXCL 7322</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Overview of drug development process. Course will provide understanding of regulatory obligations required for submitting an N.D.A. as well as discussions related to additional corporate roles including activities for in vivo study conduct &amp; due diligence review for licensing opportunities.</td>
<td></td>
</tr>
<tr>
<td>TXCL 7650</td>
<td>Research Rotation in Toxicology</td>
<td>1.0-5.0 cr.</td>
</tr>
<tr>
<td>(Fall, Spring, Summer)</td>
<td>Research work in toxicology.</td>
<td></td>
</tr>
<tr>
<td>TXCL 7655</td>
<td>Pharmacokinetics and Toxicokinetics</td>
<td>2.0 cr.</td>
</tr>
<tr>
<td>(Fall)</td>
<td>Prereq: Permission of instructor/Program Director. This is a course on the pharmacokinetic analysis of xenobiotics. Absorption, distribution, metabolism and elimination of drugs will be discussed with focus on mathematical descriptions.</td>
<td></td>
</tr>
<tr>
<td>TXCL 7665</td>
<td>Pharmacokinetic Principles &amp; Applications</td>
<td>3.0 cr.</td>
</tr>
</tbody>
</table>
(Spring) Cross-listed with PHSC 7665
A survey course to introduce students to pharmacokinetic and pharmacodynamics principles used in drug research and development. Taught by faculty from the School of Pharmacy, Department of Pharmaceutical Sciences. Phoenix Winnonlin Computer software will be used in the course.

**TXCL 7670  Methods Pharmaceutical Sciences and Molecular Toxicology  2.0 cr.**
(Spring) Restriction: For Graduate Students in the Pharmaceutical Sciences and Toxicology programs.
This course is designed to provide first year incoming graduate students with a basic understanding of methodological theory and the practical application of various bio-chemical, molecular and analytical techniques used in pharmaceutical sciences and molecular toxicology.

**TXCL 8990  Doctoral Thesis  1.0-10.0 cr.**
(Fall, Spring, Summer) Prereq: Consent of the instructor.
Doctoral thesis work in toxicology.
