**DPTR 5901  Integrated Clinical Experience I**  
1.0 cr.  
Short-term clinical education experience providing initial foundation and understanding of clinical practice with emphasis on integration of didactic and clinical learning while working in a student team.

### FIRST YEAR, Spring Semester

**DPTR 5111  Exercise Science**  
2.0 cr.  
This course will provide students with the current state of knowledge in the physiology of exercise. A systems approach will be used to provide a thorough understanding of the acute and chronic adaptations to exercise training, with an emphasis on the mechanisms underlying these adaptations.

**DPTR 5161  Psychosocial Aspects of Care I**  
1.0 cr.  
This course is focused from the perspective of the practitioner as a person. General psycho-emotional issues and specific theories related to: practitioner self-awareness, emotions, spirituality, grief-loss-mourning, psych factors associated with the experience of pain will be presented. Introduction to motivational interviewing is included.

**DPTR 5301  Medical Conditions I**  
4.0 cr.  
Prereq: DPTR 5111.  
This course highlights the physical therapy management of patients with cardiovascular, pulmonary and metabolic disorders across the lifespan and healthcare settings. Physiology, medical management, diagnostic testing, clinical decision-making and medical screening are covered with implications for physical therapist’s practice.

**DPTR 5401  Musculoskeletal Conditions I**  
4.0 cr.  
This course introduces the examination, clinical decision-making and physical therapy management of musculoskeletal disorders across the life span, focusing on the lower quarter from the pelvis to the foot and ankle. Medical management, including radiology and pharmacology, are covered with implications for physical therapy interventions.

**DPTR 5501  Neuromuscular Conditions I**  
3.0 cr.  
Frameworks for clinical decision-making are discussed regarding management of people with neurologic conditions with emphasis on stroke, cerebral palsy and spinal cord injury. This course teaches clinical skills for examination, evaluation, and intervention, with emphasis on therapeutic handling, across the lifespan and across settings.

**DPTR 5631  Clinical Reasoning I**  
1.0 cr.  
This introductory course teaches students to integrate current evidence with critical reasoning in the ICF framework to facilitate patient-centered decision making in the examination, prognosis, and intervention for elementary patient cases across a variety of clinical practice settings.

**DPTR 5731  Healthcare Delivery I**  
1.0 cr.  
The course will include a basic overview of healthcare systems and payment systems. Concepts relevant to supervision and applicable laws to physical therapist practice will be reviewed, and patient quality improvement and safety will be introduced.

### SECOND YEAR, Summer Semester

**DPTR 6002  Clinical Anatomy II**  
3.0 cr.  
Prereq: DPTR 5001, DPTR 5101, DPTR 5011.  
This course follows a regional approach to gross anatomy of the systems of the abdomen and pelvis and supplemented by cross sectional anatomy radiographic and digital imaging. An in-depth study of upper and lower extremity arthrology through cadaver dissection is included.

**DPTR 6402  Musculoskeletal Conditions II**  
2.0 cr.  
Prereq: DPTR 5001, DPTR 5401.  
This course continues examination, clinical decision-making and physical therapy management of people with musculoskeletal disorders across the life span, focusing on the cervicothoracic spine and temporomandibular disorders. Medical management, radiology and pharmacology are covered with implications for physical therapy interventions.

**DPTR 6502  Neuromuscular Conditions II**  
2.0 cr.  
This course includes an in-depth exploration of people with neurodegenerative conditions across the lifespan, specifically as related to tests and measures, prognoses, and intervention approaches. Radiology and pharmacology as related to neuropathy are included.

**DPTR 6931  Clinical Education I**  
5.0 cr.  
Prereq: DPT students only.  
Eight-week, full-time clinical experience providing students with the opportunity to take on responsibilities of the professional physical therapist, including beginning to manage a caseload and participating in a healthcare team.
SECOND YEAR, Fall Semester

**DPTR 5162  Psychosocial Aspects of Care II**  
Prereq: DPTR 5161.  
Builds on knowledge, skills and attitudes gained in DPTR 5161 with additional focus on general issues and theories related to: changing behaviors, depression and anxiety, sexuality in rehabilitation, suicidal behavior, addiction in society, stress management and conflict resolution.

**DPTR 6102  Movement Science II**  
Prereq: DPTR 5001, DPTR 5101.  
Application of movement science in physical therapy practice with emphasis on human movement related to aging, clinical analysis, tests & measures, and prosthetics & orthotics. The prosthetic and orthotic unit is designed to build student competency in clinical management of individuals who require use of common prosthetic and orthotic devices.

**DPTR 6302  Medical Conditions II**  
Prereq: DPTR 5111, DPTR 5301.  
This course continues the physical therapy management of patients with varied medical conditions (cancer; rheumatic) occurring across the lifespan and health care settings. Physiology, medical management, diagnostic testing, clinical decision making and medical screening are covered with implications for physical therapist’s practice.

**DPTR 6403  Musculoskeletal Conditions III**  
Prereq: DPTR 5401, DPTR 6402.  
This course continues the examination, clinical decision-making and physical therapy management of people with musculoskeletal (MSK) disorders across the life span, focusing on upper extremity, pediatric, geriatric, in-patient, working adults and gender-specific conditions. MSK medical management, radiology and pharmacology are covered.

**DPTR 6503  Neuromuscular Conditions III**  
Prereq: DPTR 6502.  
This course progresses and synthesizes clinical skills, decision-making and reasoning (including use of frameworks and evidence) as applied the physical therapy management for people with neurological conditions across the lifespan. The physical therapist’s role across settings and the continuum of care will be explored.

**DPTR 6632  Clinical Reasoning II**  
Prereq: DPT students only.  
This advanced course teaches students to integrate current evidence with critical reasoning in the ICF framework to facilitate patient-centered decision making in the examination, prognosis, and intervention for complex patient cases across a variety of clinical practice settings.

**DPTR 6712  Professional Development II**  
Prereq: DPT students only.  
Explores professional roles and responsibilities related to the DPT. Extends beyond patient management to policy, advocacy, teamwork and practice settings. Overview of history of profession and our professional organization, current issues and trends. Looks at career options and post-professional opportunities.

**DPTR 6902  Integrated Clinical Experience II**  
Prereq: DPT students only.  
Two-week clinical education experience with emphasis on gaining breadth of experience, applying previously gained knowledge to a new clinical setting, engaging in advanced clinical reasoning, while continuing to practice psychomotor skills.

SECOND YEAR, Spring Semester

**DPTR 6303  Medical Conditions III**  
This course continues the physical therapist management of medical conditions. Integumentary, endocrine, transplant, geriatric and ICU care are emphasized. Physical therapist’s clinical decision-making and differential diagnosis are advanced while integrating physiology, medical and pharmacological management and diagnostic testing.

**DPTR 6633  Clinical Reasoning III**  
This course requires students to integrate evidence, patient values, and clinical expertise with the ICF model of clinical decision making for actual patient cases. Students will identify and answer focused questions regarding examination, intervention, and prognosis through literature searches and online collegial discussion forums.

**DPTR 6713  Professional Development III**  
1.0 cr.
Introduction to management and leadership in healthcare, including leadership styles/characteristics and leadership development. Explores professional development opportunities following PT licensure including residency/fellowship, continuing education and expectations of a first position as a new professional.

**DPTR 6732   Healthcare Delivery II 3.0 cr.**
Continued from HCD I. Focus on issues impacting the practice of physical therapy in diverse health care settings. Applicable laws will be revisited and expanded. Administration of physical therapist practice including management, marketing, human resources, risk management and financial management will be introduced.

**DPTR 6932   Clinical Education II 6.0 cr.**
This is a 10-week, full-time supervised clinical experience. Experience with emphasis on increasing independence in management of patients, becoming an integral member of the healthcare team and using self-assessment for professional development.

**DPTR 7112   Applied Exercise Science 3.0 cr.**
Prereq: DPTR 5111, DPTR 5301, DPTR 6302.
This course will focus on exercise prescription for complex patients with multi-system disease. Emphasis will be on clinical decision-making to tailor appropriate rehabilitation interventions to medically-complex patient populations.

**DPTR 7171   Health & Wellness 3.0 cr.**
Health promotion and primary prevention are recognized as integral aspects of PT practice. In this course students will use current models of health and disability to understand complex and dynamic relationships between various health factors and outcomes, and identify effective strategies for promoting individual and community health.

**DPTR 7212   Elective 1.0 cr.**
PT Core and Clinical Faculty Prereq: DPT students only.
Various topics; provides students with the opportunity to explore selected topics, related to clinical practice, in depth or topics that are outside of the scope of the set curriculum.

**DPTR 7641   Integrated Practice 3.0 cr.**
A synthesis of curricular content applied to highly complex situations illustrative and inclusive of clinical practice across the lifespan. Through retrospective and prospective reasoning, students will analyze and articulate decisions based on reasoning, evidence, and contextual realities with colleagues across health care professions.

**DPTR 7651   Clinical Reasoning Capstone 4.0 cr.**
Final course in the clinical reasoning sequence requires students to articulate and defend their clinical decision-making process in the exam, eval, management, and outcome assessment for a selected patient. Students will synthesize and integrate the evidence to inform decision making throughout each aspect of the patient management process.

**THIRD YEAR, Summer Semester**

**DPTR 7171   Health & Wellness 3.0 cr.**
Health promotion and primary prevention are recognized as integral aspects of PT practice. In this course students will use current models of health and disability to understand complex and dynamic relationships between various health factors and outcomes, and identify effective strategies for promoting individual and community health.

**DPTR 7212   Elective 1.0 cr.**
PT Core and Clinical Faculty Prereq: DPT students only.
Various topics; provides students with the opportunity to explore selected topics, related to clinical practice, in depth or topics that are outside of the scope of the set curriculum.

**DPTR 7641   Integrated Practice 3.0 cr.**
A synthesis of curricular content applied to highly complex situations illustrative and inclusive of clinical practice across the lifespan. Through retrospective and prospective reasoning, students will analyze and articulate decisions based on reasoning, evidence, and contextual realities with colleagues across health care professions.

**DPTR 7651   Clinical Reasoning Capstone 4.0 cr.**
Final course in the clinical reasoning sequence requires students to articulate and defend their clinical decision-making process in the exam, eval, management, and outcome assessment for a selected patient. Students will synthesize and integrate the evidence to inform decision making throughout each aspect of the patient management process.

**THIRD YEAR, Fall Semester**

**DPTR 7913   Clinical Education III 10.0 cr.**
Prereq: DPTR 6932.
This is a 16-week, full-time supervised clinical experience with emphasis on functioning as an entry-level clinician, and understanding the role of a Doctor of Physical Therapy within the complexities of the healthcare system through teamwork and collaboration. First phase of year-long internship.

**Independent Study 1.0-3.0 cr.**
An Independent Study option is available each semester. This course provides students with an opportunity to pursue content of their own choosing under guidance of a faculty mentor.

**PROGRAM REQUIREMENTS**

**Humanities**
Humanities will occur in each year of the program. Each humanities session exposes the student to stories of illness, disability, and accident, as a way to provide an exploration and analysis imaginative materials such as film, poetry and fiction that represent the vagaries of the human condition across the lifespan.

**Interprofessional Education Development (IPED)**
**IPED 5002 Interprofessional Education Development**
This course develops core competencies in teamwork and collaboration, values and ethics, and quality and safety for first-year health professions students. The course will be taught in a team-based format requiring individual preparation before each session followed by the application of that learning through team-based activities.

**IPED 6001: Interprofessional Education Development**
The course continues the development of core competencies in teamwork and collaboration, values and ethics, and quality and safety for second-year health professions students. This course is taught in a team-based learning format requiring individual preparation before each session followed by the application of that learning through team-based activities.

**IPED Clinical Transformations**
Clinical transformations is an interprofessional learning experience conducted at the Center for Advancing Professional Excellence, and is a collaborative health care simulation mimicking real-life scenarios in a structured and safe environment. The AHRQ TeamSTEPPS (Team Strategies and Tools to Enhance Performance and Patient Safety) Framework will be used.
