University of Colorado Denver  
College of Engineering and Applied Science  
CVEN-3414 Water Supply and Distribution Systems

Spring 2019  
Lecture: Mon/Wed 12:30-1:45 pm  
Location: Plaza Building 112  
Office Hours: Mon 3:30-4:45 pm, Wed 2:00-3:30 pm  
→ and by appointment (with 24 hour notice)  
Instructor: David C. Mays, P.E., Ph.D.  
Office: North Classroom 2014-A  
Phone: 303-315-7570  
E-mail: david.mays@ucdenver.edu  
http://www.ucdenver.edu/dmays/3414

Catalog Description: Planning and design for potable water supply and distribution. Topics include the civil engineering design process, pressurized pipe networks, pump selection, water demand estimation, surface- and groundwater resources, and reservoir operation. Design project and field trip required. Prerequisite: CVEN-3313 Fluid Mechanics.

Course Objectives: At the end of the semester, you should be able to:

1. Define, understand, and apply the civil engineering design process.
2. Design the key elements of a water supply system, including pipe network design, pipe sizing, treated water storage reservoirs, and other appurtenances with appropriate cost estimates.
3. Utilize hydraulic design software such as EPANET.
4. Estimate water demand based on population, land use, and fire demand.
5. Outline the basic principles of water resources planning and management, with applications to groundwater supplies, surface water supplies, and reservoir operations.
6. Explain the importance of safety culture in the context of professional ethics.

Required Text

Supplemental Reading (on Course Website)
Hubly, D. (1998), Design, Chapter 2 in Design of Water and Wastewater Systems, Department of Civil Engineering, University of Colorado Denver, Denver, CO.

Field Trip
A field trip will be scheduled in the first half of the semester. We will visit a local community to review their water supply system, which will serve as a basis for our design project. Many of past students have considered this field trip to be a highlight of the course.

Design Project
Designs of a water supply system are a major part of this course. The design process will be accomplished by teams of students, giving you the experience working on a design team. The design will be summarized in a single report submitted by each team; each student will receive the grade assigned to their team's report. Guidelines and evaluation criteria will be provided.

Midterm: Covers weeks 1-7 on Wednesday 3/20/2019
Final Exam: To be scheduled during Exam Week (Monday 5/13/2019 to Friday 5/17/2019)
Grades: 25% midterm, 25% final exam, 25% project, 20% homework, 5% participation.

Homework
Homework will be assigned in class each Monday or through the “Assignments and Answers” link on the course website, and will be due in class Wednesday of the next week. Engineering paper is strongly encouraged but not required. I reserve the right to return homework for re-write and re-submit if it is (1) illegible, or (2) does not comply with the following standards:

1. At the top of each page, write your name, class number, homework number, due date, and page of total. For example, for a 5-page submission, the first page is 1 of 5, the second 2 of 5.
   → If you are submitting late, also write the date submitted on the first page.
2. Draw a picture for each problem. Use a straight edge for straight lines.
3. Briefly restate each problem in your own words. Do not copy the problem statement verbatim.
4. State what you are going to calculate under heading FIND.
5. State any relevant assumptions, including assumed precision of input numbers.
6. Indicate the units for all numbers, not just final results, except for dimensionless ratios.
   a. Please write 5 ft rather than 5’ and 8 in rather than 8”.
   b. Units like psi are fine for results, but use lb/in² to show unit cancellation in work.
   c. Use the same units (metric or US) as the problem statement.
7. Write each result, with the correct number of significant digits, on its own line.

These standards will help you establish the professional habit of producing clear calculations in compliance with given requirements. You will produce a set of documents that you may reference down the road for your FE exam or PE exam or both. These standards will also simplify grading, which means you get your homework back faster, and they keep the grader happy—which is always a good thing. Homework grades are A (100%), B (85%), C (75%), D (65%), and F (0%). Homework will be graded for correctness, approach, and presentation. To earn an A, you must clearly and correctly calculate all the problems while fully complying with the standards.
• Late homework will be penalized by 10% per class (except by 15% from A→B). However, no credit will be granted for assignments whose solutions have been posted online.
• Late homework not stating the date submitted will be penalized by one letter grade.
• Unstapled homework (with more than one sheet of paper) will be penalized by one letter grade.
• Except by prior arrangement, homework submitted electronically or any time outside office hours or class will be penalized by one letter grade.

Participation
Rationale for participation grade: Learning is an activity that we perform (like dancing, fixing cars, or skiing) rather than a commodity that we purchase. I will attempt to call on each of you each week. You are expected to reply every time. Why? Because you are training to become a professional, who will be called upon to speak up and answer technical questions. People will expect you to be prepared. This means you should complete the reading assignment before class. If you make a habit of missing class, your participation grade will suffer.

Communication
You are required to check your official university e-mail account at least once every 24 hours during business days, or arrange to have your e-mail from this account forwarded to another e-mail account that you check at least once every 24 hours during business days. For details, see the university website.*

Academic Integrity
This course will comply with the 2018-2019 Undergraduate Catalog or 2018-2019 Graduate Catalog, including the Academic Integrity And Discipline Policies,† and with the Student Honor Code for the College of Engineering and Applied Science. You must perform and present your own work. Studying with others may be useful, but copying assignments—from a solutions manual, from other students, from a paid tutor, or from any other source—or cheating on exams will not be tolerated. Midterm and final exams will be governed by an Exam Policy to be distributed separately. Importantly, to avoid plagiarism, cite your sources using American Society of Civil Engineers format.‡

General
• Snow Closure Hotline 877-556-3637.
• I am happy to work with students needing special accommodations. The university asks students to register with Disability Resources and Services (DRS), who then evaluate each situation on a case-by-case basis. I will provide accommodations per the official letter I receive from DRS.
• Missed exams will receive an F, except (a) when special arrangements have been made with me ahead of time, or (b) with documentation of a medical emergency.
• Unclaimed homework, reports and exams will be destroyed on or after 2/1/2019.
• Grades will not include plus or minus designations.
• Syllabus subject to revision.
• Students are responsible for all material presented in lecture, readings, homework, and communicated by e-mail.

Finally, this semester’s Academic Calendar and our Student Honor Code are attached below. If you have not done so already, please sign the Student Honor Code and return it to the department office.

Welcome to the class!

You will also receive an electronic bill to your university email account.

*Additional Billing/F

approval is not required to drop the class within the first 15% of class meetings.

Intensive and Module classes

and fees*.

Submitting a petition by the priority review deadline date guarantees the petitioner will be notified of a decision before the first day of the term.

You must DROP your classes via UCDAccess on this day in order to receive a refund of the $200 advance payment.

No classes. Campus open.

No classes. Campus open.

No classes. Campus open.

This is the date your degree will be recorded on your transcript; diplomas won't be mailed out until July 19.

For best course selection, register as soon as possible after your registration time assignment.

NEW students, prior to registering a $200 Registration Advance Payment is required, it will be applied to your tuition and fees*.

Please contact your academic advisor about how to petition for the Retroactive Withdrawal Process

Maymester Classes begin

Memorial Day Holiday – No classes

2/2016
Student Honor Code

The Honor Code outlined below is the College of Engineering and Applied Science statement on academic integrity. The Code articulates the College’s expectations of its students and faculty in establishing and maintaining the highest standards in academic work.

Honor Code Text
The Honor Code of the College of Engineering and Applied Science is a statement of its students, individually and collectively:

- Students will not give or receive aid during examinations.
- Students will not use any prohibited electronic devices during examinations.
- Students will not give or receive unpermitted aid in class work, in the preparation of reports, or in any other work that is to be used by the instructor as the basis of grading.
- Students will uphold the spirit and letter of the Honor Code and they will take an active role to ensure that others uphold the Honor Code and if they observe violations of the Honor Code they must report violations to their Department Chair.
- The Faculty of the College will do its part to ensure its confidence in the honor of its students. Faculty must ensure that precautions are in place to prevent the forms of dishonesty mentioned above. Faculty will also avoid, as far as practical, academic procedures that create temptations to violate the Honor Code. Faculty alone has the right and obligation to set academic requirements. However, the students and faculty will work together to establish optimal conditions for honorable academic work.

Violations of the Honor Code
Examples of conduct that will be regarded as being in violation of the Honor Code include:

- Copying from another’s examination paper or allowing another to copy from one’s own paper.
- Plagiarism in any shape or form. Plagiarism is defined as the use, without giving reasonable and appropriate credit to or acknowledging the author or source, of another person’s original work, whether such work is made up of code, formulas, ideas, language, research, strategies, writing or other form(s).
- Giving or receiving unpermitted aid either in person or via electronic devices.
- Engaging in unauthorized collaboration on academic assignments or examinations.
- Representing as one’s own work the work of another.

Penalties for Violating the Honor Code
Most student disciplinary cases have involved Honor Code violations. Of these, most cases arise when a student submits another’s work as his or her own, gives or receives unpermitted aid, or engages in unauthorized collaboration. If a violation occurs during a quiz or on a homework assignment, the student will receive a zero for that quiz or assignment. If a violation occurs on an examination, the student will receive a failing grade for the course. The standard penalty for a first offense may include suspension from the College of Engineering and Applied Science for a severe infraction of the Honor Code. The penalty for a second violation will be expulsion from the College of Engineering and Applied Science.

It is the responsibility of the student to seek clarification from the instructor when in doubt about these guidelines.

By signing below, I affirm that I have read and understood the Student Honor Code and will abide by its provisions.
