To whom it may concern:

This letter signifies that the Anschutz Medical Campus (AMC) Faculty Assembly hereby supports Bridging Research and Aurora Neighborhoods for Community Health (BRANCH), a multidisciplinary student organization, in their efforts to develop and establish a community garden at AMC.

In addition to supporting BRANCH in their efforts, the AMC Faculty Assembly also feels that an AMC community garden will serve as a valuable resource for the campus, reinforcing the health living practices which the campus promotes in addition to providing faculty, students, and staff with an opportunity to garden and gain access to fresh local produce.

Finally, the AMC Faculty Assembly recognizes that BRANCH is heavily involved in building a partnership between AMC and the surrounding communities while fostering community internally at AMC, and that these community gardens are physical reminders of this partnership.

Signed,
X
