What is Colorado AgrAbility?
We’re part of a national effort to help farmers and ranchers affected by an injury, long-term illness, or other functional limitation.

Our goal is to help people remain involved in agricultural work by providing assistance, information, and education.

No-Cost Assistance
We present options to help you continue doing what you love by:
- Visiting your farm to learn about your tasks and priorities.
- Suggesting solutions to specific difficulties noted.
- Implementing the solutions you choose, including referrals to funding resources.

Who can benefit?
Any person actively working in production agriculture, or a producer’s parent or child who has a condition that poses a functional limitation.

Conditions we may address include these and more:
- PTSD/Anxiety
- amputations
- back pain
- caregiver stress
- depression
- diabetes
- chronic fatigue
- impaired balance
- multiple sclerosis
- spinal cord injury
- low vision
- stroke
- brain injury
- hearing loss

Education
We offer presentations and workshops to health, agricultural, and other interested groups throughout Colorado. Contact us to schedule one in your community!
