We are pleased and honored to announce

**Victor M Montori, MD, MSc** as the keynote speaker for the 2018 Engaging Communities in Education and Research (ECER) Conference.

**Victor M. Montori, MD** is a Professor of Medicine at Mayo Clinic. An endocrinologist and health services researcher, Dr. Montori is the author of more than 600 peer-reviewed publications and is among the top 1% of researchers with most cited papers in clinical medicine worldwide in the last decade. He is a Senior Advisor in the Center for Evidence and Practice Improvement at the Agency for Healthcare Quality and Research of the US Government. He also serves in the Editorial Advisory Board of the BMJ, and as Director of Late Stage Translational Research at the Mayo Center for Clinical and Translational Science. He is a recognized expert in evidence-based medicine and shared decision making, and developer of the concept of minimally disruptive medicine. He works in Rochester, Minnesota, at Mayo Clinic’s KER Unit, to advance person-centered care for patients with chronic conditions. He is also the co-founder of The Patient Revolution, an action and advocacy nonprofit dedicated to advance careful and kind care for all and is the author of the book Why We Revolt, a patient revolution for careful and kind care.

---

**Why We Revolt: for careful and kind care for all**

Industrial healthcare has corrupted its mission and it has stopped caring. Overwhelmed patients, patients who are treated as a blur, clinicians who lose their sense of meaning and burn out, bloated budgets and poor outcomes. What might it take to turn out away from industrial healthcare and instead turn toward careful and kind patient care for all? The path towards the right answer requires partnerships and contributions from a range of people in the lives of patients. We will discuss how a broad community, together as if we were to build cathedrals, can uncover and discover ways toward careful and kind care for all.

At this end of this conversation, attendees will be able to:

- Describe industrial healthcare and enumerate three characteristics
- Label at least 3 ways in which industrial healthcare detracts from patient care
- Apply the language of careful and kind care to problems of healthcare, education and research

---

Victor M. Montori, MD, MSc
Professor of Medicine
Investigator, Knowledge and Evaluation Research Unit
Consultant, Division of Endocrinology, Department of Medicine
Co-I Mayo Center for Clinical and Translational Science (CCaTS); Director of Late-stage Translational Research
Consultant, Division of Health Care Policy and Research, Department of Health Sciences Research
